MAYOR FOREWORD

Her Worship Mologadi A Mphela

TAKING STOCK OF SERVICE DELIVERY

In keeping with President Jacob Zuma's call to embark on a radical socio-economic transformation in the fight against the triple challenges of poverty, inequality and unemployment, the Fetakgomo Municipality has approved a capital budget R19 million to improve access to service delivery and create jobs. As directed by the President we all have a duty to make a meaningful contribution to job creation and poverty alleviation while bridging the economic gap that continues to create inequality in our communities.

Our move is in all honesty a resonance to the key pillars of the National Development Plan (NDP). The NDP emphasizes the need for a more inclusive, dynamic, diverse and equitable economy that is able to absorb labour and accelerate growth and in doing so decrease unemployment and eradicate poverty. This move also found expression in President Zuma's sixth State of the Nation Address wherein he

highlighted that government holds a strong belief that: the most effective weapon in the campaign against poverty is the creation of decent work and creating that work requires faster economic growth.

To justify our contribution we have recruited and appointed 495 EPWP workers for maintenance of tarred roads within Municipal jurisdictions through labour intensive methods. The project entails routine maintenance of roads within the Fetakgomo Municipality for a period of twelve (12) months. The programme targets women and children belonging to the poorest households, residing in communities located in close proximity to the identified roads.

In moving the lives of the people forward, there has been a noticeable progress in some of the projects taking place during this financial year. For projects and progress refer to page 10.

Fetakgomo Local Municipality is committed to positively change its audit outcomes. In this regard, the management team has developed an External Audit Action Implementation Plan to address the findings of the prior year.

We have also appointed the

Pricewater Coopers to maintain and update the Asset Register in line with GRAP standards. Moreover, most of the audit findings emanated from the assets. The Minister of COGTA Mr. Pravin Gordhan has promulgated the redetermination of municipal boundaries in the country in preparation for 2016 Local Government elections for comments. Consequently, the Municipal Demarcation Board has in terms of section 26(3) of the Local Government Municipal Demarcation Act No 27 of 1998 invited submission of written representations or views on the proposed redetermination of municipal boundaries.

As a result Fetakgomo has indeed convened public participation on the 15th February 2015 and Mayor Magosi Forum on the 19th February 2015 to create awareness. The proposal is to de-establish or discontinue with 5 local municipalities in the province including Fetakgomo, Aganang, Mutale and the merger of Mokgopong and Modimolle. One of the key factors in the whole process is based on the sustainability of the Municipality looking at its potential to generate revenue and fulfill its constitutional mandate.

Till next edition, keep well, keep safe and stay blessed.

NEW FETAKGOMO WEBSITE GOES LIVE - www.fetakgomo.gov.za

In a bid to fortify its communication channels, the Fetakgomo Local Municipality has recently revamped its website which is now active, up and running. We can visit us on www.fetakgomo.gov.za.

The website represents a very critical aspect in the imaging of the Municipality. The look and feel of the website has to be of international standard. Regular update and fresh information cannot be compromised. The website is the face of the organisation, it speaks for the organisation.

One outdated picture is bad enough to give the Municipality a bad image

The revamped website seeks to ensure simplicity, functionality, interactivity and accessibility of useful information about Fetakgomo Municipality.

On the site you can learn more about the following:

- **FTM Leadership both Political and Administrative**
- **Heritage sites and LED projects**
- **Advertised Tender**
- **News and Upcoming Events**
- **Advertised Post and Employment Form**
- **Service Delivery Issues**
- **Contact**
- **Municipal Accolades**
- **Slides show with pictures of the key services we are rendering in order to market the municipality**
- **Hyperlinks**

The next phase of the website-re-engineering process will focus on interactivity on the social media platform. We are busy with a Facebook account, LinkedIn and twitter for easiest communication.

Meanwhile, please share with us your impressions and suggestions about the revamped website.

Email us at rachidil@fetakgomo.gov.za or call 015 622 8023/34

Together lets move fetakgomo forward

Continues from page 1

This year marks the 15th anniversary since the establishment of local government in December 2000. The ANC led government through the Minister of COGTA Cde Pravin Gordhan has again put the issue of local government as one of the key priorities in the next five years. The Presidential Local Government Going Back to Basic Summit was convened to zoom into specific challenges confronting this important sphere of government. Some of the

challenges identified which we are not immune from are: slow or inadequate responses to service delivery challenges leading to the breakdown of trust in the institutions. Social distance by our public representatives is also a major cause for concern. This reflects inadequate public participation and poorly functioning of ward committees. The low rate of collection of revenue continues to undermine the ability of Municipality to deliver services to communities.

We also welcomed the 2015 National and Provincial Budget that will drive the implementation of the nine-point plan. This budget provides certainty, stability and prudent fiscal management necessary to take the South African economy through these tough economic conditions. In conclusion, welcome the return of the mortal remains of renowned struggle icons JB Marks and Moses Kotane to South Africa from Russia where they were buried 42 years ago

Standard Bank representative together with Fetakgomo Mayor hands over a cheque of R50 000 to top learners

The Fetakgomo Local Municipality 3rd Annual Matric Award Giving Ceremony took place on the 16th of January 2015 to recognize the class of 2014. The event took place at Moses Mabothe Civic Hall, with the class of 2015 filling the hall to witness the success of the class of 2014. These awards are about recognizing excellent achievements from students, teachers and circuits' offices. Learners were awarded certificates, trophies, cash, laptops and other accessories that will contribute to their post matric studies. The 2015 awards were pampered with sponsorship from Bokoni Platinum Mine which offered Apple mini ipad, Huawei y22 touch screen cellphone, Nokia 105 cellphone, HP Laptop, Laptop bag and Huawei E173 3G. Standard bank also offered R50 000 (Fifty Thousand Rands). As part of token of appreciation and good luck gesture for

MAYOR AWARDS R50 000 TO TOP LEARNERS

placing the Fetakgomo municipality's name on the map, the Mayor Mologadi A Mphela awarded these students each top learner per circuit receiving an amount of R5 000. The Mayor has realized that most of these learners comes from a previously disadvantaged background and would need assistance to move on to tertiary education. She also wanted to invest in their future and wellbeing of the students by donating this much needed financial support.

The ceremony was graced by Fetakgomo Mayor Cllr. Kukie Raesetja Sefala, Programme Director Ms Itumeleng Kekana from Capricorn FM, Ntate Moruti Reverend Dr Nchabeleng, Speaker of the Council Cllr KK Mamphekgo Hlabirwa, Members of Executive Committee and Councillors, Leaders of various political parties in the Council, Leaders of various civil society organisation and sector departments, Grade 12 Learners, leadership of unions, Circuit Managers, Principals of schools, SGB representatives and educators, Standard Bank, Bokoni Platinum Mine, Twickenham and Olifans River Granite, Faith Base Organisations, University of Venda Mr Takalani Dzaga, Dr. Ntšile Kgaphola and Dr Mokibe Nchabeleng and Outgoing grade 12 luminaries and their supporting parents.

continues on page 4

Continues from page 3

Fetakgomo Mayor said it was important that the Municipality work with the teachers that they have and not those they wish to have in order to improve the quality of teaching and learning. She further alluded that irresponsibly criticizing and condemning will not take our education system anywhere." We must encourage them to improve their subject content knowledge and their content pedagogy. We must support them so that they can become enthusiastic, competent, capable and reflective practitioners. There are many teachers who do an amazing job under very difficult and trying circumstances of limited resources, poor infrastructure and socio-economic deprivation. We salute them and commend them for their dedication to serve our nation." She said.

Among other things that the Mayor highlighted was "Adopt a School Campaign" by ward councillors. The municipality has also resolved to intensify the Back to School Campaign

which is an annual programme of visiting schools when they re-open in January and motivate learners, educators and school governing bodies. Last year we visited 12 schools and this initiative has worked for us as local government in strengthening our relationship with the Department of Education, organised labour and learners.

The big winner of the day was 17 year old Moroaswi Rantobeng Theophylus who was crowned top learner in the Municipality, for achieving 5 distinctions in Maths, Sepedi, Agriculture, Life Science and Physical Science. He also scooped the top learner in Maths and Physical Science in the Municipality. Top school in the municipality was awarded to Mphela-a-Marumo Secondary School, Circuit with quality results: Seotlong Circuit, Most Improved circuit: Mashung Circuit, Top Circuit in the Municipality: Seotlong Circuit, 100% pass school: Malengine Secondary School, Dinakanyane High School and Telelo Secondary School. The top learner is currently

doing BSC in Medical Science at the University of Limpopo

The following learners also received R5 000 each, Mohlala Mohubedu Mafiri from Lekentle(FET Witbank),Thobejane Thabo Mpe from Frank Mashile(currently with University of Limpopo-MEDUNSA doing B.Pharmacy),Seroka Ramakgahlele Louisa from Dinakanyane(at WITS doing Mechanical Engineering) Magoma Lawrence from Serokolo(at University of Johannesburg doing Mining Engineering)and Phasha Pricilla Ramogohlo from Tlou Phuti(doing BSC University of Johannesburg)
One of the learner interviewed by Modiredi official said "I did not have money for registration and frustrated. When I got amount of R5 000 from Fetakgomo I got relieved. The money helped me a lot.

ECCLESIASTE 9:10-"Whatever your hands finds to do, do it with all your might, for in the grave where you are going there is neither working nor planning nor knowledge nor wisdom".

FETAKGOMO HOSTED A FRUITFUL CAREER EXPO

Unemployed graduates visit exhibition stalls to access information

Fetakgomo Youth Development Brigade is a non-profit organization founded by rural young unemployed youth with various tertiary qualifications. They found themselves loitering and idling around the dusty streets of rural communities of Sekhukhune District, Limpopo province.

The organization came into an existence around the month of January 2014, after holding consultative community meetings to share current frustrations that are premised on the realization that unemployed graduates from rural communities and the entire of Sekhukhune are faced with the challenge of lack of work experience. This problem has become a major stumbling block that continues to be every employer's requirement.

The Youth Brigade intends to subscribe to efforts that stimulates, empowers and promote joint action

amongst rural unemployed youth.

This effort has made our organization to partner with Services SETA and also brought a strong support from the Office of the Premier (Limpopo Province). The Services SETA and FYDB have then organized the extra-ordinary event (Career Guidance and Skills Development Expo) that was aimed at highlighting particular skills for positive career advancement, access to jobs and enhancing rural economies. The Expo hosted various stakeholders to ensure maximum participation and the inclusion of business, labour and communities. Such stakeholders were; Office of the Premier-Limpopo, Office of the Mayor-Fetakgomo, 18 SETAs, Government departments, Financial Institutions, Private Sector and other independent bodies.

The Fetakgomo Local Municipality has in return signed a service level agreement with the Youth Development Brigade to offer them office premises at Mohlaletsi Thusong Service Centre.

The Expo lasted for three days from 11th, 12th to 13th of February 2015. The Services SETA has during the event made public announcement that it will fund 190 candidates falling within its scope for Learnerships, Internships and Apprenticeships programme. The fund will benefit 66 candidates for Apprenticeship programme, 28 candidates for Learnership programme and 96 candidates for internship programme that will commence on the 1st of April 2015.

Service SETA Representative assisting unemployed graduates

MALOGENG LANDFILL SITE OPERATIONAL

Fetakgomo Local Municipality (FTM) is a legal permit holder for the establishment and operation of Malogeng Landfill Site (Malogeng Landfill); however the landfill site has been transferred to Sekhukhune District Municipality (SDM). Nevertheless, the two institutions have entered into a memorandum of understanding that the management and maintenance of the landfill site will be the duties of FTM.

The landfill is therefore an asset of the SDM. The permit was issued by the Department of Environment Affairs and Tourism {now known as Department of Environmental Affairs(DEA)} on 14 January 2009. The site is located on farm Diamant 422 KS, Sekhukhune District, Limpopo Province, in Malogeng fields, which is situated at about 4 km on the south of R37 and approximately 19 km north east of the main municipal offices. It is reported that the landfill site started operating in 2010. The authorised lifespan of the project is 20 years, counting from the date of issue. The

landfill is for general waste, which comes from the local communities, local clinics, shopping areas and the mine within the municipal jurisdiction

Evaluation of compliance with the work permit/environmental authorization

There has been a significant landfill improvement in the third and fourth quarter of the 2013/2014 financial year. This includes; the installation of weighbridge, construction of working offices, recycling facility, paving of some of the site roads, development of cells etc.

FTM is now able to weigh in and out the vehicles that brings waste on site. FTM is also complying in terms of reporting about the volumes waste received or reclaimed onsite to South African Waste Information System as it is a legal requirement. FTM has requested an assistance of landfill compactor and other required equipments from SDM.

However, SDM has not committed yet. The landfill cells opened onsite

are not yet operational. Bokoni Platinum Mine (Bokoni Mine) is currently supplying FTM with the last lining material (stone leachate) for Cell A only; the municipality has already appointed the contractor to line it.. The three other cells have been filled with base preparation layer (rock dump) and it needs to be lined as well. Three more lining material will have to be added on such cells as it was done in Cell A.

Skill transfer and recycling training

FTM in collaboration with DEA through Dyambwini Construction and Project Solutions have provided youth with twelve month experiential training in waste management in 2014. The project has been extended with eight months and will end in August 2015. There are four youth that are placed at Malogeng Waste Disposal Site to learn about waste disposal activities. The internship programme is funded by National Department of Environmental Affairs.

LEBELO LA MONABO LA GO HLOMPHA OFISI YA MEYARA (MAYOR'S MARATHON) 2015

Ngwaga wa 2015 e tlile go ba ngwaga wa boraro ka tatelano ya go se kgaotše, ge masepala wa Fetakgomo o swara lebelo la monabo la go tsebja ka Fetakgomo Mayor's Marathon.

Badudi ba masepala wa Fetakgomo, ba province ya Limpopo le ma-Afrika Borwa ka bophara, bao ba nago le lerato la mabelo a menabo, ba eletšwa go itukišetša go tšea karolo go lebelo la ngwaga wo. Ka lehlakoring la Masepala, ditukišo di gare di tšwela pele, gore nako

ge e fiha ebe gore dilo ka moka di eme ga botse di letetše gore nakana ya go thoma e lle. Lebelo le beakanyeditšwe go phethagala ka di **28 June 2015**. Bjale ka mehleng, menabo e sale yona yela ya **21.1 km, 10km le 5km**. Batšeakarolo ba sa gopotšwa gore monabo wa 5km bjale ka mehleng ke **Fun Run** yeo e senago **difoka(prizes)**.

- ✍ All these 2015/16 projects have been advertised as part of forward planning implementation and contractors are expected to be on site in May/June 2015.
- ✍ Based on the above, it is projected that the 2014/15 MIG expenditure will be 100% by June 2015.

PRESIDENTIAL AND PREMIER HOTLINE QUERIES' FETAKGOMO RESPONSE: A NOD!

Since February 2014 Fetakgomo Local Municipality responded all Presidential and Premier Hotlines service delivery complaints timely.

Timely responses do not necessarily mean building of bridges, houses, etc but entail honest answers to complainants in time coupled with cascading of queries to relevant sector departments and agencies.

There is generally a higher percentage of water related complaints in Fetakgomo. Cases related to supply of water are normally referred to Sekhukhune District Municipality. Some complaints that relate to supply of water were due to illegal connections, inconsistent supply of water through tankers and unavailability of diesel or pump operators to operate the pumps.

Fetakgomo also received complaints related to poor conditions of the roads due to rain and insufficient graders to blade the roads. Communication challenge between the Department of Roads & Transport, and municipalities (both district and local) with regard to ownership of some roads seem to contribute to slow response with regard to cases about poor conditions of the roads

There is also a trend that is continuing where one person reports same cases using different names or different people reporting the same case.

Since 2009, South Africans can now dial 17737 (toll-free from a landline) to get through to a call centre at the President's office with questions or gripes about government service delivery. Some callers may even find themselves speaking to Jacob Zuma himself!

Callers will have the option of being helped in a variety of languages, and calls will be recorded and logged for quality, tracking and monitoring purposes. A call log will help the Presidency monitor turnaround times and gather information – to tell them, for example, which government department receives the most complaints.

The R4-million service is operational between 7.30am and 10pm, and has 21 well-informed hotline agents, backed up by 43 public liaison officers, dedicated to answering inquiries.

Each government department, each province

and every municipality assigned investigators and modifiers to help handle inquiries that cannot be solved by the Presidency alone.

Zuma's word of advice

Zuma visited the centre on its first day of operation, 14 September 2009, to offer a word of advice to the call centre agents.

"You may receive calls from very angry people, who would have been provoked by your colleagues from other departments," Zuma said.

"Remain calm, patient and be humane and human. You will solve a lot of problems if you remain human and avoid being technical."

Zuma added that part of the call centre agent's job was to improve the government's image.

"We want people to be able to tell us what their problems are with service delivery, so that we can assist directly."

He urged the staff to work together to eradicate the stigma that makes people think anything from the government is bad or is of inferior quality. "You are the frontline of government communications and citizen care and support," Zuma said. "Smile when you take those calls, as people can feel your mood wherever they are." During the premier hotline launched on the 7th April 2009, Limpopo Premier Cassel Charle Mathale said "all complaints lodged would be attended to within 30 days and if they were not attended the call centre system would automatically flash a reminder of action to be taken"

The toll-free hotline 0800-864-729 runs by private service-Deloitte in all languages spoken by people in the province. It operates from Monday to Friday between 8am and 10pm. The hotline will ensure that the government is able to provide efficient, effective, excellent, equitable and empowering service to the people in the province. Limpopo is the first province to launch its hotline after President Zuma launched his in 2009

TOGETHER LETS MOVE FETAKGOMO FORWARD
