# CHAPTER 1: INTRODUCTION AND BACKGROUND

### 1.1. INTRODUCTION

This document represents the third revision of the 2021 to 2026 integrated development planning cycle for the Fetakgomo Tubatse Municipality. This document does not replace the 2021 to 2026 five (5) year Integrated Development Plan (IDP).

The revision process as required by legislation, and it is aimed to take into account experience gained thus far and performance trends as set out against respective five-year targets. The ultimate objective within each cycle, of course, always remains the improved implementation of the said dispensation's five-year strategy, as well as ensuring that the level of responsiveness towards community needs is improved over time.

The second Revised IDP and Budget is based on lessons learned from the previous revisions and planning cycle and changing environments and focuses on the following:

- Alignment with national and provincial issues of importance.
- Strengthening the analysis principles of strategic planning processes.
- Initiating a community-based planning process that starts to involve the communities in the analysis and planning processes.
- Ensure better coordination through a programmatic approach and focused budgeting process; and
- Strengthening performance management and monitoring systems.

It is important that the IDP developed by the Fetakgomo Tubatse correlate with national and provincial intent. The aim of this revision is to develop and coordinate a coherent plan to improve the quality of life for all the people living in the area – reflecting also issues of national and provincial importance.

One of the key objectives is therefore to ensure that there exists alignment between national and provincial priorities, policies and strategies and the Fetakgomo Tubatse LM's response to these requirements.

# 1.2. BACKGROUND

The Constitution of the Republic of South Africa, 1996 stipulates that the local sphere of government consists of municipalities which were established for the whole of the territory of South Africa – the so-called wall-to-wall municipalities. The Constitution and the Local Government: Municipal Structures Act, 1998 established a system of categories and types of municipalities. Accordingly, three categories of municipalities were identified. Category A municipality is metropolitan municipalities that have exclusive municipal executive and legislative authority in its area. Category B municipality is local municipalities which share municipal executive and legislative authority in its area with a Category C municipality within whose area it falls.

The objects of local government are set out in Section 152 of the Constitution. Accordingly, the objects are –

- a) to provide democratic and accountable government for local communities.
- b) to ensure the provision of services to communities in a sustainable manner.
- c) to promote social and economic development.
- d) to promote a safe and healthy environment; and
- e) to encourage the involvement of communities and community organisations in the matters of local government.

These objectives have been in practice for ten years, every part of the country now falls under the jurisdiction of a municipality, with many communities experiencing local and democratic government for the first time within the last decade.

Section 154(1) of the Constitution requires both the National and the Provincial Governments by legislation or other means to support and strengthen the capacity of municipalities to manage their own affairs, to exercise their powers and to perform their functions. Provincial supervision, monitoring and support of local government is a Constitutional obligation in terms of sections 154(1) and Section 155(6) and (7) of the Constitution.

The Fetakgomo Tubatse local municipality came into existence after the amalgamation of the Greater Tubatse Local Municipality and the Fetakgomo Local municipality in 2016 Fetakgomo Tubatse LM is a category C municipality.

# 1.3. LEGISLATIVE CONTEXT

Chapter 5 of the Municipal Systems Act (MSA), Act no 32 of 2000, states that a municipality must undertake developmentally oriented planning to ensure that it achieves the objects of local government as set out in Section 152 of the Constitution. It must further give effect to its developmental duties as required by Section 153 of the Constitution. Together with other organs of state, it must contribute to the progressive realisation of the fundamental rights contained in Sections 24, 25, 27 and 29 of the Constitution.

Integrated development planning and the product of this process, the Integrated Development Plan (IDP) is a constitutional and legal process required of municipalities. Planning in general and the IDP, is a critically important management tool to help transformation, growth, and development at local government level. It is an approach to planning that involves the entire municipality and its citizens in finding the best solutions to achieve good long-term development.

According to Section 25 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000)(MSA), each municipal council must, after the start of its elected term, adopt a single, inclusive and strategic plan the IDP for the development of the municipality which links, integrates and co-ordinates plans and takes into account proposals for the development of the municipality and which aligns the resources and capacity of the municipality with the implementation of the said plan. The IDP should

form the policy framework and general basis on which annual budgets be based and should be compatible with national and provincial development plans and planning requirements.

The IDP of a Municipality may be amended if and when circumstances require the amendment but must be reviewed annually regardless if there is changing circumstances or not (Section 34 of the MSA). Both amendment or review of the document must be in accordance with a prescribed process which process is described in the Process Plan (attached in Annexure C).

The Municipal Systems Act of 32, of 2000 as amended stipulates the core components of integrated development plan must reflect the following:

- a) the municipal council's vision for the long-term development of the municipality with special emphasis on the municipality's most critical development and internal transformation needs;
- b) an assessment of the existing level of development in the municipality, which must include and identification of communities which must include an identification of communities which do not have access to basic municipal services.
- c) the council's development priorities and objectives for its elected term, including its elected term, including its local economic development aims and its internal transformation needs;
- d) the council's development strategies which must be aligned with any national or provincial sectoral plans and planning requirements binding on the municipality in terms of legislation;
- e) a spatial development framework which must include the provision of basic guidelines for a land use management system for the municipality;
- f) the council's operational strategies;
- g) applicable disaster management plans;
- h) a financial plan which must include a budget projection for a least the next three years; and
- i) the key performance indicators and performance targets determined in terms of section 41.

Local Government: Municipal Structures Act, 1998, MSA, the Local Government: Municipal Finance Management Act, 2003 (MFMA) and the Local Government: Municipal Systems Amendment Act, 2003. These Acts form the cornerstones for municipal operations, planning, governance, and accountability. More specifically, the regulations of these Acts promote effective planning, budgeting, revenue and expenditure management, reporting, oversight, social and economic upliftment, universal access to essential services and effective performance management.

Several policies, strategies and development indicators have been developed to ensure that all other government activities are aimed at meeting the developmental needs expressed at the local government level. In terms of Section 153(b) of the Constitution, municipalities must participate in national and provincial development programmes and if they are required to comply with these programs they must align to these programmes.

|                        | Municipal Demarcation Act, 1998                                 |

#### 1.4. THE SCOPE OF THE INTEGRATED DEVELOPMENT PLAN (IDP)

The scope of Integrated Development Plan (IDP) in terms of the Department of Cooperative Governance Human Settlements & Traditional Affairs (COGHSTA) Limpopo Credible assessment IDP framework.

The IDP chapters must demonstrate the preparatory phase which must provide how the municipal planning process will unfold, clarifies the roles and responsibilities and alignment of planning processes e.g., powers and functions of the municipality, IDP structures and responsibilities, municipal priorities, IDP process plans adopted to develop the current IDP of the 2024/25 and lastly the public participation.

The development of 2024/25 Integrated Development Plan (IDP) will provide the overview of the IDP, and the process followed or unfold in all five phases, namely preparation, analysis, strategies, projects, integration, and the final approval phase of the IDP per Key Performance Areas.

#### 1.4.1. Phases And Activities of The Idp /Budget/Pms Process Plan

The table below shows the phases of the IDP Process and Activities entailed of IDP and Budget.

| PHASES OF THE IDP PROCESS |   |  |
|---------------------------|---|--|
| IDP PHASES                | ACTIVITIES  |  |
| Preparatory Phase         | <ul> <li>Identification and establishment of stakeholders.</li> </ul> |  |
|                           | Structures and sources of information.                                |  |
|                           | Development of the IDP Process Plan.                                  |  |

| Analysis Phase    | Compilation of levels of development and backlogs that suggest areas of intervention.  |  |
|-------------------|--|--|
| Strategies Phase  | Reviewing the Vision, Mission, Strategies, Objectives<br>Linkages of problem statements, development of strategies and<br>outcome.   |  |
| Projects Phase    | Identification of possible projects and their funding sources.   |  |
| Integration Phase | Sector plans, policies, by-laws summary inclusion and programmes of action.  |  |
| Approval Phase    | <ul> <li>Submission of Draft IDP to Council</li> <li>Public Participation and publication</li> <li>Review, Amendments of the Draft IDP according to comments;</li> <li>Submission of final IDP to council for approval and adoption</li> </ul> |  |

The Constitution of South Africa requires the municipalities to fulfil their required mandate to be developmental, therefore the Fetakgomo Tubatse Local Municipality prepared their second (2<sup>nd</sup>) review of 2023/2024.

# 1.4.2. <u>Municipal Planning and Reporting Cycle</u>

Section 21(1)(b) of the Local Government: Municipal Finance Management Act 56 of 2003 (MFMA) has general similarities and/or generally echoes Section 28(1) of the Local Government: Municipal Systems Act 32 of 2000 (MSA) thereby prescribing that the Mayor of the Municipality must at least 10 months before the commencement of the financial year, table in the Council a time schedule outlining key deadlines for the preparations, tabling and approval of the annual budget and also the review of the Integrated Development Plan.

The 2024/25 IDP/BUDGET AND PMS processes plan adopted by council on the 25 October 2024 Council resolution number: **SC31/2024** below is the process plan:

| MONTH     | ACTIVITY  | TARGET DATE |
|-----------|---|-------------|
|           | PREPARATORY PHASE                                       |             |
| July 2024 | Review of previous year's IDP/Budget process plan,      | July 2024   |
|           | MTEF included.  |             |
|           | EXCO provides political guidance over the budget        |             |
|           | process and priorities that must inform preparations of |             |
|           | the budget.   |             |
|           | IDP/Budget Steering Committee meeting.                  |             |
|           | Consultations with established Committees and           |             |

|              | forums (2025/26 IDP/Budget process plan)                       |              |
|--------------|--|--------------|
|              | IDP/Budget Exco meeting for 2025/26 IDP /Budget                |              |
|              | process Plan   |              |

# 1.5. IDP ASSESSMENT BY COGHSTA

The Limpopo provincial department annually conduct IDP assessments in terms of section 32 of Municipal Systems Act No. 32 of 2000. The table below shows the Fetakgomo Tubatse Local Municipality rating of the previous five years, and the alignment as sustained in the part years. the assessment criteria all key performance areas are assessed and MEC made general findings for all the municipalities in Limpopo Province.

| 2016/17 | 2017/18 | 2018/19 | 2019/20 | 2020/21 | 2021/22 | 2022/23 | 2023/24 |
|---------|---------|---------|---------|---------|---------|---------|---------|
| High    |

#### 1.5.1. <u>Performance Management Systems</u>

Performance Management system is a process which monitors the implementation of the organisation's strategy to ensure that targets set for the organisation and employees are met. It is therefore a management tool to plan, monitor, measure, and review performance to improve the efficiency, effectiveness of service delivery by the municipality.

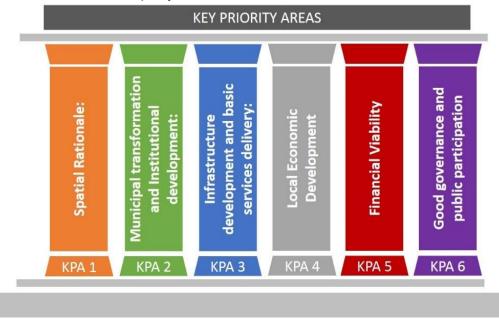

Municipalities are required according to Section 38 of local government: Municipal system act, 32 of 2000 to establish municipal performance management system that is commensurate with its resources; best suited to its circumstances; and in line with the priorities, objectives, indicators, and targets contained in its integrated development plan.

The development thereof of the performance management system must be managed by the executive committee or executive mayor of a municipality or, if the municipality does not have an executive committee or executive mayor, a committee of councillors appointed by the municipal council; assign responsibilities to the municipal manager, and system must be adopted council. The system must be devised in such a way that it may serve as an early warning indicator of under-performance. Below is the PMS cycle:

### 1.5.2. <u>Fetakgomo Tubatse Key Performance Areas</u>

The Fetakgomo Tubatse Local Municipality's IDP identified 6 pillars of key priority areas within the municipality.

# Primary Outcomes:

| Outcome 1: | Quality Basic Education                | Outcome 8:               | Human Settlement Development      |
|------------|--|--------------------------|-----------------------------------|
| Outcome 2: | Long and Healthy Life                  | Outcome 9:               | Developmental Local<br>Government |
| Outcome 3: | All People are Safe                    | Outcome<br>10:           | Environmental Protection          |
| Outcome 4: | Decent Employment<br>through Inclusive | Outcome<br>11:           | Regional Integration              |
| Outcome 5: | Skilled and Capable<br>Workforce       | Outcome<br>12:           | Developmental Public Service      |
| Outcome 6: | Competitive Economic<br>Infrastructure | Outcome<br>13:<br>System | Inclusive Social Protection       |
| Outcome 7: | Comprehensive Rural<br>Development     | Outcome<br>14:           | Social Cohesion                   |

#### **Key Governance Priorities**

# SUSTAINABLE DEVELOPMENT GOALS (SDGS) 2016

Source: http://www.za.undp.org/content/south\_africa/en/home/post-2015/sdg-overview/

The Integrated Development Plan (IDP) and Budget involves municipal officials, Councillors, as well as municipal key stakeholders both internal and external to the municipality. Below is the structure and responsibility identified institutionally.

| STRUCTURE         | RESPONSIBILITIES  |
|-------------------|---|
| Municipal council | consider and adopt the IDP Process Plan & time schedule for the                           |
|                   | <ul> <li>preparation, tabling &amp; approval of the annual budget</li> </ul>              |
|                   | <ul> <li>consider and adopt the IDP and annual Budget.</li> </ul>                         |
|                   | <ul> <li>ensure the municipal budget is coordinated with and based on the IDP.</li> </ul> |
|                   | adopt a Performance Management System (PMS)   |
|                   | Monitor progress, IDP implementation  |
|                   | Final Decision Making   |
| Municipal         | • The Municipal Manager has the responsibility to provide guidance                        |
| Manager           | and ensure the administration actively participates and supports the                      |
|                   | development and review of the IDP and Budget and alignment of                             |
|                   | PMS towards its implementation.   |

| STRUCTURE   | RESPONSIBILITIES  |
|---|---|

| 5 | Financial Viability | Financial Viability                    | To improve overall municipal<br>financial management                      |  |  |
|---|---------------------|--|---|--|--|
| 6 | Good Governance     | Good Governance & Public Participation | To promote a culture of<br>participatory democracy and<br>good governance |  |  |

# CHAPTER 2: STATE OF THE MUNICIPALITY

# 2.1. SITUATIONAL ANALYSIS

Section 26 of the Municipal Systems Act of 2000 indicates that an IDP must reflect, amongst others, an **assessment of the existing level of development in the municipality**. In answer to Section 26, an analysis of the Fetakgomo Tubatse LM with regards to the availability of infrastructure, the assets of the municipality as well as the provision of services was compiled. The Situational Analysis was compiled after a number of meetings were held with the municipality's Departments from July 2023. The aim of the meetings was to gather all the technical information that could be presented in the Situational Analysis.

# LOCATION

#### 2.2.1. National

Fetakgomo Tubatse is situated within the **Limpopo Province** which directly borders the Northwest, Gauteng, and Mpumalanga provinces and calls Botswana, Zimbabwe, Mozambique, and Eswatini its international neighbours.

#### 2.2.2. District/Regional

Within Limpopo, Fetakgomo Tubatse occupies the north-eastern portion of the **Sekhukhune District Municipality** which is bordered by the Waterberg, Capricorn, and Mopani District Municipalities with the Vhembe District being further north.

#### 2.2.3. Local

On the local level, Fetakgomo Tubatse shares the district with Makhuduthamaga, Ephraim Mogale, and Elias Motsaledi. It also borders the Lepelle-Nkumpi and Maruleng local municipality.

### 2.2.4. Vision and Mission:

| Vision  | "A developed platinum city for a sustainable human settlement"   |  |  |  |  |  |  |
|---------|--|--|--|--|--|--|--|
| Mission | Mission Statement: Committed to provide efficient integrated services, radical socio-economic transformation, industrialization and enabling environment through partnerships for a sustainable development. |  |  |  |  |  |  |
|         | Accountable through active community participation   |  |  |  |  |  |  |
|         | <ul> <li>Economic enhancement to fight poverty, inequality and<br/>unemployment</li> </ul>   |  |  |  |  |  |  |
|         | Render accessible, sustainable and affordable service  |  |  |  |  |  |  |
|         | Municipal transformation and institutional development; and  |  |  |  |  |  |  |
|         | Sustainable livelihoods through environmental management   |  |  |  |  |  |  |

# **2.3.** POLITICAL SEGMENT

The table below shows the number of councillors within the municipality:

| MUNICIPAL COUNCILLORS                  | NUMBERS |
|--|---------|
| Ward Councillors                       | 39      |
| Proportion Representatives Councillors | 38      |
| TOTAL                                  | 77      |

The table below shows the representation of different Political parties and Traditional Leaders in the Council:

| STAKEHOLDER         | NUMBERS |
|---------------------|---------|
| ANC                 | 54      |
| EFF                 | 14      |
| DA                  | 2       |

# 2.4. DEMOGRAPHICS

The imperatives to appropriately plan for the development of the Fetakgomo Tubatse Local Municipality (FTLM), it is critical to identify the essentials of FETAKGOMO TUBATSE LOCAL MUNICIPALITY: population, an appropriate demographics as well as the anticipated trends in development after amalgamation. The Fetakgomo Tubatse Local Municipality is a Special Economic Zones programme which must accommodate industrialisation within the municipality as mining town.

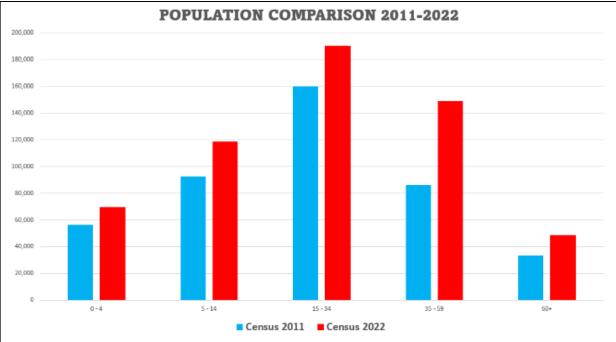

According to 2022 Stats SA information, the total population of Fetakgomo Tubatse has increased to 575 960 as compared to Census 2011 (428 948). Thus records an increase of 147 012. This represents an average annual increase of 13 364 people.

# 2.4.1. <u>Gender and Age</u>:

The table below indicates the population distribution of Fetakgomo Tubatse by gender.

| 2016 COMMUNITY SURVEY  |                    |            |                  | 2022 STATSSA |             |               |                    |

Source: StatsSA Census 2022

shows a steady increase in population per age in all age groups, safe for the age group between 35-59 year olds.

# 2.5. SPATIAL RATIONALE

The Municipal Systems Act no. 32 of 2000 (MSA) established a framework for municipal planning and performance management. The Act changed the way in which municipalities develop policies as it seeks to clarify sustainable development within local governance and the role that communities should play in the integrated development planning phase. Section 26 (e) states that the SDF should accompany the municipal IDP and that the SDF should provide guidelines for the compilation of a land use management system within the affected municipality.

According to the MSA, the SDF forms a core component as a sector plan of an Integrated Development Plan (IDP) and should provide basic guidelines for the municipality's land use management system. Therefore, all land development related IDP projects should be informed by the SDF and be spatially referenced in an endeavor to achieve the desired spatial pattern of a municipality.

In terms of Part B of Schedule 4 of the Constitution of the Republic of South Africa, 1996 municipal planning is a core function of the local municipalities. To give effect to the constitutional mandate, Section 34 of the MSA and Section 20 of Spatial Planning and Land Use Management Act No. 16 of 2013 respectively, call upon municipalities to formulate the Spatial Development Frameworks.

The spatial patterns that shape the Fetakgomo Tubatse Local municipality are shaped by the following features, which collectively create a distinct spatial character of the municipality; namely: Roads, Topography, Tenure arrangements, Mining Activities, Agriculture, Tourism.

#### The Spatial Planning and Land Use Management Act, 2013 (Act 16 Of 2013)

Spatial Planning and Land Use Management Act, Act 16 of 2013 is a legal framework that oversees spatial planning and land use management across municipalities in South Africa. The Act intended to repeal the Development Facilitation Act and other respective planning laws that were discovered to be unconstitutional. One of its rationales is the planning of the entire municipalities while making provisions for the wall-to-wall land-use schemes that cover the whole jurisdiction of the municipalities.

It seeks to promote consistency and uniformity in procedures and decision-making. SPLUMA requires national, provincial, and municipal spheres of government to prepare SDFs that establishes a clear vision which must be developed through a thorough inventory and analysis based on national spatial planning principles and local long-term development goals and plans. SDFs are thus mandatory at all the three spheres of government. Objectives of SPLUMA are:

- Provision for inclusive, developmental, equitable and efficient spatial planning in different spheres of government
- Provision of a framework for the monitoring, coordination and review of spatial planning and land use management systems
- To provide a framework for policies, principles, norms and standards spatial planning and land use management
- To address past spatial and regulatory imbalances, application procedures and decision-making authorities.

# 2.5.1. Strategic Vision and Objectives

# Spatial Vision

"A developed smart city for integrated sustainable human settlement".

# Objectives

- To provide the long-term spatial strategy and vision.
- To provide spatial logic to the IDP.
- To guide municipal planning and land use decisions.
- To support in the implementation of integrated sustainable human settlement.
- To manage building plan approvals and construction of building within the municipality.
- To administrative issues of encroachments, identification and relocation of boundary and property ownership.
- To manage the disposal and leasing of municipal properties.
- To align and complement the Provincial spatial vision.

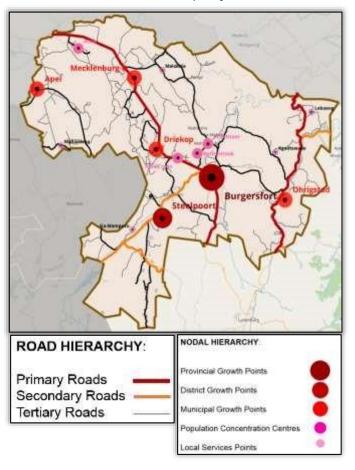

# 2.5.2. Growth Points, Settlement Distribution, and Movement Network

**Movement Network** 

The movement and settlement distribution within Fetakgomo Tubatse is deeply centred along the R37 and R555 roads with relatively few subsidiary roads conducting intense movement throughout municipality. This raises concerns for internal movement of goods, services, and people, and hinders the development and unlocking of (if any) areas outside the limited network that could hold any promise.

When placed alongside the information about income distribution and illegal settlement, begins to highlight concerns of high commuting costs and difficult access to services which intensify the illegal invasion of land.

The maps below indicate the major roads and settlements of the municipality:

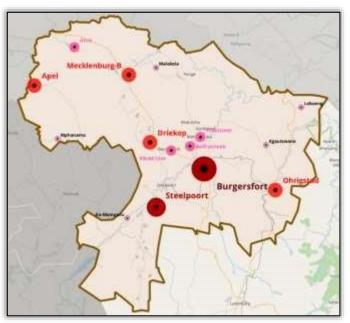

#### Growth Points

Burgersfort is the provincial growth point within Fetakgomo Tubatse and the largest regional anchor. It is one of the major trading towns in Limpopo and consist of a variety of land uses such as businesses, social facilities, government offices, warehouses, buses and taxi ranks.

#### Nodes

Based on the development trends in the Fetakgomo Tubatse Local Municipality, the settlement hierarchy was identified as follows:

#### Table: Nodes

| ORDER        | NODES                       | SETTLEMENT  |
|--------------|-----------------------------|---|
|              | Provincial Growth Point     | Burgersfort   |
| First Order  | District Growth Point       | Steelpoort  |
|              | Municipal Growth Point      | Ohrigstad, Driekop, Mecklenburg Apel  |
|              | Population Conce            | entration Riba Cross/ Mashamothane  |
| Second Order | Points (PCPs)               | Bothashoek , Praktiseer ,Atok   |
| Third Order  | Local Service Points (LSPs) | Kgautswana , Mampuru<br>and<br>extension , Malokela A and B<br>Leboeng , Mphanama |
| Fourth Order | Village Service Points      | Steelpoortdrift,<br>Apiesdoorndraai/Dresden Viljoenshoop                          |

## **Provincial Growth Point**

Burgersfort is identified as a provincial growth point and is located where the sections of R555 and R37 are coterminous, virtually at the centres of the Fetakgomo Tubatse. It is one of the major trading towns in Limpopo. It consists of higher order land uses such as retail shops, warehouses, government offices (e.g., Municipal offices), transport interchange facilities, e.g. taxi and bus rank, railway station; social facilities, etc. serving the hinterland of about 50 km. This town is located roughly in the geographic centre of the municipal area, and this makes it accessible to the majority of people. "Burgersfort is also a municipal capital of Fetakgomo Tubatse Local Municipality, which increases its status in the region.

A number of housing developments are planned on the northeast side of Burgersfort. This has also triggered numerous retail and service businesses. The town is also starting to experience problem characteristic of growing urban area, viz, the growth of informal settlements, traffic congestion on certain road section, rising land prices, declining capacity of bulk engineering infrastructure, etc. It also seems that the recent housing development does not match the required social facilities, such as schools and halls. The town is among the fast-growing small towns in and around Limpopo.

# **District Growth Point:**

Steelpoort is identified as the District growth Point. Steelpoort in comparison to Burgersfort, comprised more of manufacturing industries and mining related suppliers

whilst the latter is more dominated by the retail and service centre. This growth point mostly serves the mining community. There are about six operating mines around the town. Steelpoort town is characterized by a mixed used development; including heavy engineering enterprises; suppliers to the mines; transport facilities; building material suppliers; distributors/ wholesale, medium density housing and small retail component. About sixty per cent of industrial township, i.e. Steelpoort Ext 7 is occupied. Some of the service businesses related to mining have even emerged in fringe areas in the former Lebowa i.e. Tukakgomo and Eerste Geluk, Mapodile just south of Steelpoort.

The D4190 (Pelangwe to Mabulela) (15 km) road hugs Burgersfort, Polokwane, and other special places in Limpopo such as Moria, Podingwane et cetera. It is therefore a recognized priority road in this IDP/Budget because of its potential to increase economic fortune and viability of the FTLM. Lead to promotion and optimum exploration of tourism.

Furthermore, the D4200 Mphanama to Jane Furse to Apel (39 km), which links the Mphanama to Jane Furse which is one of the growth points of the district (SDM) in terms of the District's Spatial Development Framework.

# **Municipal Growth Point:**

The municipal growth points are Ohrigstad, Driekop, Apel and Mecklenburg. These settlements except Ohrigstad are expected to grow faster due to mining related development occurring around them. More services need therefore to be rendered in these settlements. Ohrigstad is a small rustic town located along major roads of R36. The town is stagnant with little building activity taking place. There are number of vacant stands and business premises in Ohrigstad.

These properties are also poorly maintained. Mecklenburg is located in the former Lebowa homeland territory along the R37 Dilokong Corridor. The settlement of Mecklenburg is anchored by the police station, Mines and the hospital, and surrounded by the series of hills forming an amphitheatre around an extensive flat land. The settlement is formed along the movement spine road (R37) and a number of roads taking off this main route at almost regular intersection. Generally, the housing densities in these areas are not more than 10 units per ha.

# Corridors

The main transport routes within the municipality can be divided into the hierarchy of Primary, Secondary and Tertiary corridors.

| ORDER     | CORRIDOR  | DESCRIPTION   |
|-----------|---|---|
| Primary   | R37 (Dilokong<br>Corridor)                            | The Primary Corridor (R37) runs through the municipal area in a North-South direction, connects Burgersfort with Polokwane and Lydenburg.   |
| Secondary | R555 Regional Route<br>R36 Provincial Route           | The Secondary Corridors traversing the municipal<br>area is the R555 Regional Route (connecting<br>Steelpoort before crossing the R37 and ends at an<br>intersection with the R36 Route at Ohrigstad.) and<br>the R36 Provincial route (traversing the municipality<br>in a North-South direction to the east of the municipal<br>jurisdiction connecting Ohrigstad). |
| Tertiary  | Ngwaabe Corridor<br>D4190<br>D4200<br>D4252<br>D40454 | The Tertiary Corridors consist of the following routes<br>which form part of the central nerve system of the<br>municipality:<br>Ngwaabe Corridor to Jane Furse<br>Pelangwe to Mabulela (D4190)<br>Mphanama to Jane Furse to Apel (D4200)<br>Mphanama to Mashabela (D4252)<br>Road D40454 to Mphanama to Petseng to<br>Ntswaneng to Ga-Kgwete                         |

# Clusters

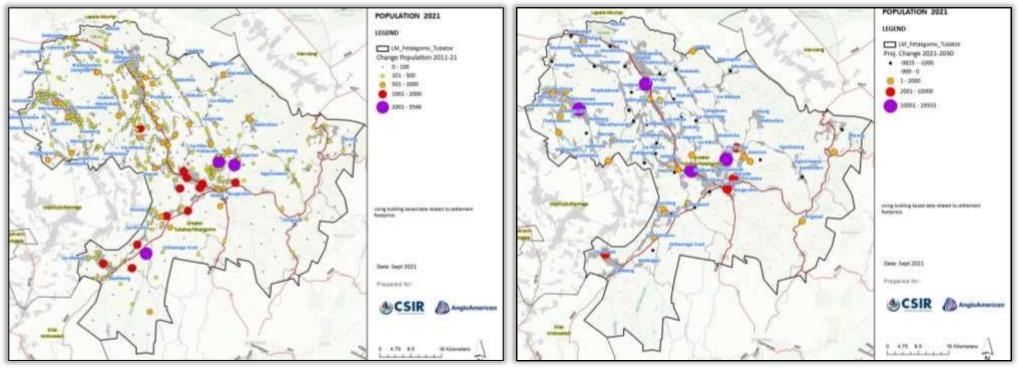

Previously the Municipality did not consist out of any clusters. The clusters should be used for administrative purposes. The primary objective is to ensure an adequate level of service delivery within the communities is reached in each cluster. The spatial form of the Municipal clusters is based on the Municipal ward boundaries. The Municipality is divided into 6 clusters, each representing different wards. The table below depicts the 6 clusters and the municipal wards located in each cluster. Table: Municipal Clusters

| CLUSTERS  | WARDS  |
|-----------|--|
| Cluster A | 4, 5, 7, 8, 10, 11, 13, 15, 17, 18, 19, 20, 21, 25, 30 |
| Cluster B | 2, 6, 12, 27, 28, 29, 31                               |
| Cluster C | 1, 24, 26  |
| Cluster D | 9, 14, 16, 22, 23                                      |
| Cluster E | 3, 36, 37, 38, 39                                      |
| Cluster F | 32, 33, 34, 35   |

# 2.5.3. Settlement Distribution

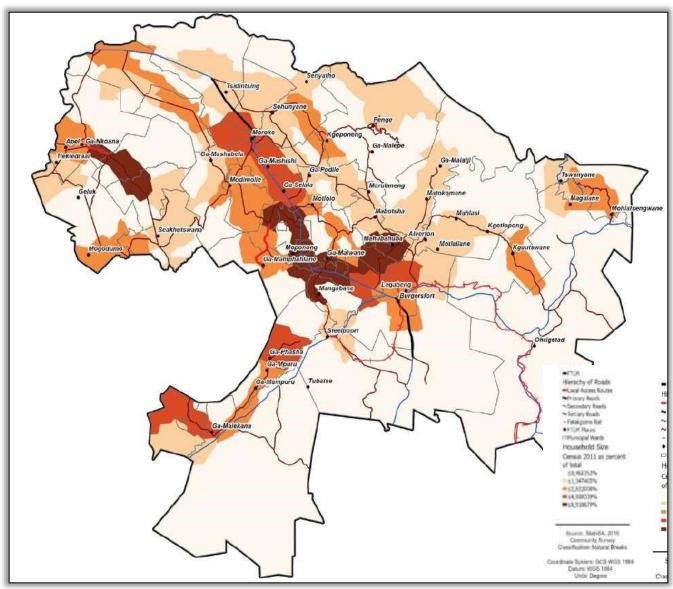

The largest settlements of Fetakgomo are clustered around the R555 and the R37 roads and it is these settlements that have the largest population and have experienced the largest growth.

The maps below indicate (1) areas that have experienced the largest growth in population and (2) the areas projected to have the largest population growth by 2030:

Source: CSIR Evidence Guide (2021)

The map below indicates the wards that have the highest household sizes as a percentage of the total population:

Source: FTLM Integrated Transport Plan (2020)

While there is a clear trend in terms of population concentration, we do see a sprawling effect away from the main movement network. This, again, stresses concerns for the provision of services such as transportation and, likewise, electrification, water, community facilities (and so forth) due to having to spread this infrastructure over greater distances (will be discussed later on). It also strains the income of citizens as they have to spend more capital on commuting to work which acts as a contributor to land invasion and informal settlements (slums and/or back yarding).

# 2.5.3.1 Public Transport

The Department of Transport and Community Safety (LDoT) is the public transport authority. The Sekhukhune District Municipality helps in respect of transport planning. As a challenge/backlog there is inadequacy of public transport in some areas within Fetakgomo Tubatse Local Municipality (FTLM). According to the norms and standards, public transport access should not be more than 10 minutes' walk. The dominant modes of public transport within Fetakgomo Tubatse Local Municipality (FTLM) are buses and taxi.

The envisaged plan will the modes of transport found in the area, via, railway and road transport. The road transport is the common public transport to provide service to the community in remote areas, i.e. buses (Greater North Transport) and mini-taxis. It also serves as the mode to transport raw materials to and from the mines including agricultural products. The route utilization survey recorded 405 taxi vehicles and 18 Great North Transport buses and a number of other private bus transport companies like, Sekhukhune express, Nnyana shakwane bus services, Mahlangu bus services, Thembalethu bus services, Midbank buses and Vuthimlilo and Segweka bus services are providing service in this municipal area.

Unregulated and influx of mini-taxis operating as metered taxis within the Burgersfort and Steelpoort areas are posing a threat to road users as majority of them are not road-worthy. The survey also showed a high volume of weekend operations to transport shoppers from rural hinterlands to Burgersfort. The taxi route survey showed that there were 71 taxi and bus routes in FTLM but in this survey the outward bound and inward bound route were individually identified.

These routes virtually penetrate all the villages around the urban centres of Burgersfort, Steelpoort and Ohrigstad. The spatial structure particularly the radial nature of public transport into and from Burgersfort town sees this town function as a focal point but there is no real inter-modal system to speak of. The buses and the taxis do not feed each other but generally compete along the same routes.

In terms of destination, Burgersfort functions as fulcrum of the local taxi movement with the rest going to Praktiseer, Polokwane, Gauteng and Ohrigstad or Steelpoort. There are long distance taxis operating from three urban nodes going to areas beyond municipal boundaries such as Polokwane, Witbank, Jane Furse, Middleburg, Marblehall, Tembisa and Johannesburg.

Railway transport of general freight is only rendered in Ohrigstad, Burgersfort and Steelpoort. There is no passenger train service, particular referring to daily commuter service, operating in the area. The department of Transport has since promised with the construction of multimodal transport facility in Burgersfort town but to date nothing is coming forth. The table below indicate the state of our taxi ranks and conditions of the facilities.

The availability of stable public transport and different modes of transport (taxis and buses) is a strength that is acknowledged by the Municipality. However lack of infrastructure has become a challenge. There is lack of public transport facilities and as such the overwhelming majority of the taxi facilities are informal. The National department of transport, Provincial department of transport together with the municipality is busy with the development of plans for the integrated modal transport facility in the Burgersfort town which will also add value to the transport service after its completion.

The Municipality together with the SANRAL is currently busy with plans of developing a transport facility in the Burgersfort town. Public transport is needed especially from Phageng to Jane Furse, from Jane Furse to Phageng and from Moralele section Garadingwana, to Jane Furse, Ga-Mampa, Ga – Selepe, Health Centre and Mphanama to Bopedi Shoping Complex. Taxis operating within the Municipality mainly use the tarred R37 (BurgersfortPolokwane), D4250 (Apel Cross-Lebowakgomo) and D4190 (Apel-Sekhukhune-Steelpoort) roads.

There are challenges facing transport insufficient taxi rank infrastructure, most of the mini or metered taxis are not road worthy and do not have operating permits, traffic congestion in Burgersfort town, no transport facilities in some parts of the municipality especially in rural areas, mushrooming of pick up points within town by mini taxis, mini taxi operating beyond their boundaries and delays by the department of road and transport to issue permits for taxis.

Transport Challenges:

- Dispersed & unbalanced settlements causing poor accessibility connectivity
- Lack of effective transport planning unit
- High concentration of traffic around town
- Lack of transport facilities

# 2.5.3.2 City Development Strategy, 2043

Fetakgomo-Tubatse Local Municipality (FTLM) embarked on a citywide development program, under the City Development Strategy. The latter is guided by the Municipality's vision of becoming a world class and inclusive city by 2043. In order to realise this broad goal, the FTLM has prioritised the rolling out of key catalytic infrastructure as a way of unlocking the socio-economic potential of the different development nodes within its jurisdiction. This will in turn attract potential private and public investment and create a sustainable trajectory towards the realisation of the city's broad development objectives.

Being a rural Municipality, the area under the FTLM exhibits different spatial and socioeconomic characteristics which demand unique spatial planning and infrastructure interventions to realise the Municipality's development objectives. Thus, the FTLM has subdivided the entire municipal area into spatial planning and development regions:

- Greater Praktiseer Region;
- Greater Steelpoort Region;

- Greater Apel Region;
- Greater Ohrigstad Region;
- Burgersfort; and
- R37 Spatial Development Corridor.

The FTLM is busy working on a detailed Regional Network Plan as well as Precinct Plans for each of these spatial development regions. The overall objectives of the Regional Network Plan is to identify key transportation network, development regions and nodes, develop precinct planning guidelines and the catalytic infrastructure required to bring to life the unique socio-economic opportunities for each region. The Precinct Plans will also be used by the FTLM in marketing the different regions to potential private and public sector investors for the realisation of the proposed spatial and socio-economic development initiatives. This Regional Network Plan has been developed for the six (6) Regions. Its development was informed by the prevailing local spatial and socio-economic context as well as the current planning guidelines and best practices under the Neighbourhood Development Program.

# 2.5.3.2 Fetakgomo Tubatse Special Economic Zone (SEZ)

The Fetakgomo Tubatse SEZ is located in the Eastern Limb of the Bushveld Igneous Complex in Steelpoort. There is already developed property for the manufacturing of the mining input supplies in Steelpoort which LEDA is in the process of acquiring (LEDA, 2017). The establishment of the Special Economic Zone (SEZ) in Fetakgomo Tubatse is driven by the projected mining and beneficiation outlook of the Platinum Group of Metals (PGM) in South Africa. According to LEDA (2017), the Fetakgomo Tubatse Special Economic Zone will impact positively on more than a million people in the province due to improved economic activities within the Dilokong Spatial Economic Initiative as well as improving economic progress within other districts and municipalities.

The SEZ is established to:

- Support local economic development,
- Create jobs and contribute to the National GDP,
- Facilitate the creation of an industrial complex,
- Develop infrastructure required to support the development of targeted industrial activities,
- Attract foreign and domestic direct investment,
- Provide the location for the establishment of targeted investments.
- Enable the beneficiation of mineral and natural resources;
- Take advantage of existing industrial and technological capacity,
- Promote integration with local industry and increasing value-added production.

Key Challenges:

- Inadequate capacity (Skills and Human Resource) to drive SEZ at District and Local level.

- Inadequate resources from the district to develop Regional Industrial Master plan which will guide the development of infrastructure projects No clear governance structures to oversee SEZ process.
- Lack of stakeholders support from both government and private sector.

Possible Interventions:

- There should be establishment of SEZ board in line with tripartite agreement to be signed by 3 spheres of government
- Provide budget and human capacity to drive Regional Industrial Master Plan.

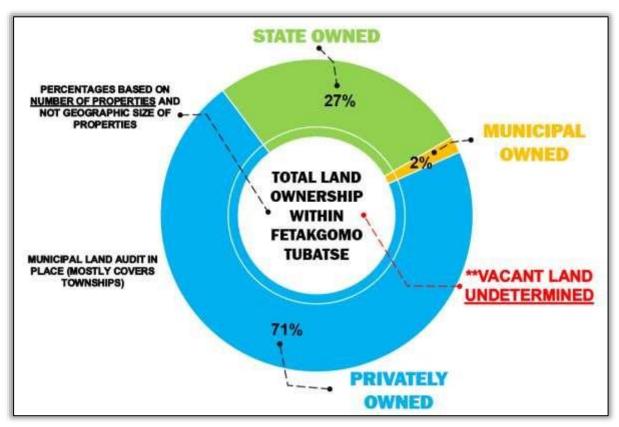

# 2.5.4. Summary of Key Spatial Challenges and Interventions

# 2.5.5. Land Claims and Land Ownership

:

Source: FTLM Land Audit (2018)

The majority of the municipality's settlements are under traditional authorities, who have jurisdiction over about 351 820 ha of land (approximately 62% of the municipality's land area). This shows that municipal authorities need to have continuous communication with traditional authorities to ensure a well-functioning municipality.

The map below indicates the areas under traditional authority:

Source: FTLM Spatial Development Framework (2020)

# Land Claims:

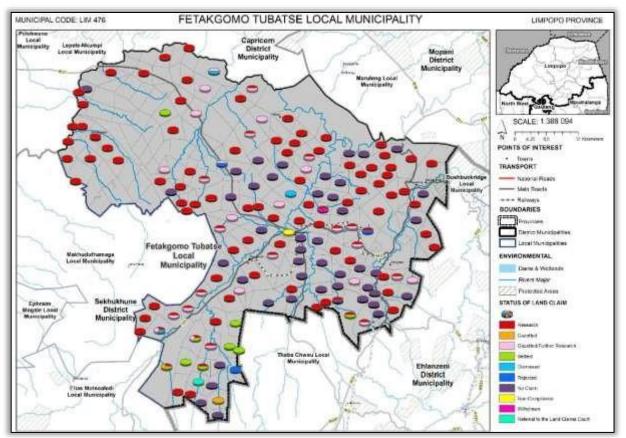

The table below indicates the number of land claims as well as the progress in the settlement of said claims (DALRRD, 2024):

| LAND CLAIMS                |     |  |
|----------------------------|-----|--|
| Number of forms submitted  | 820 |  |
| Number of claims submitted | 753 |  |
| Court                      | 6   |  |
| Deferral                   | 6   |  |

| Dismissed                             | 77  |
|---------------------------------------|-----|
| Financial compensation: Finalized     | 420 |
| Financial compensation: Not Finalized | 27  |
| Land restoration: Finalized           | 18  |
| Negotiations                          | 180 |
| Phase outstanding                     | 20  |

Source: DALRRD (2024)

The map below indicates the (approximate) distribution/location of land claims as well as the progress in the settlement of said claims:

Source: FTLM Spatial Development Framework (2020)

According to the municipality's SDF, 2020, approximately 60% of the municipal land is under claims. From the data received from DALRRD (2024), we see that claims under negotiation have reduced from (413) in 2017/18 financial year to (180) in the 2023/24 financial year. The reduction means that claims are being concluded which improve investor confidence and the progress of development due to finalisation of land claims. This will improve rural revitalisation which is a big strategic focus). This number is also practically lower since in comparison to claims (20) which are Outstanding and are likely to be pushed to negotiations as well.

## Land Availability

Government institutions are at the forefront of large-scale change as they begin to integrate, realign, and improve their efficiencies. These changes are far-reaching and involve the complex areas of financial restructuring, land availability and ownership, operational improvement, organizational development, legal challenges and changes to governance structures. Politicians and administrators also need to interact with the citizenry to gauge the extent of their needs and to ensure efficient and cost-effective service delivery methods. Efficient, effective and well-designed uniform service delivery systems will aid in utilizing the limited resources which is vital in ensuring the future success of the Fetakgomo Tubatse Local Municipality programmes. This is presumably, also part of the long-term intention of Fetakgomo Tubatse Local Municipality to introduce and sustain service delivery improvements within its jurisdiction. Interestingly, any Land Audit exercise reveals the relationship of a population to one another through the ownership, management and availability of land as a resource for sustainable development and nation-building.

The municipal land audit report has been prepared and adopted by Council in 2018. However, it is under review in the financial year 2024/25. The land audit covered mainly the townships within the jurisdiction of Fetakgomo Tubatse Local Municipality. The land audit report revealed that, the percentage of land owned by the municipality is only 1.7%, percentage of land owned by the state is 26.92%, percentage of land owned by the private persons is 71.34%, while the percentage for vacant land remains undetermined. The aforementioned percentages are the percentage of the number of properties and not the geographic size of properties. The table below shows the land ownership status as presented above.

| STATUS                                    |
|---|
| In place, it covered mainly the townships |
| 1.7%                                      |
| 71.34%                                    |
| 26.92%                                    |
| Undetermined                              |
| ties and not the geographic size of       |
|   |

Table : Summary of land ownership in terms of the Land Audit Report

# Land Invasions

"Land invasion" refers to the illegal occupation of land, with the intention of establishing dwellings/settlement upon it. Land invasions have become an overarching challenge in the municipality. Currently, private/State land is being invaded by communities at an alarming rate. The Municipality is currently gearing to fight against land invasion by appointing a Panel of service providers to assist in Land Invasion mitigation. The rationale behind is to ensure consistent monitoring of

municipal land as well as conduct evictions as and when the need arises through the implementation of a court order.

# Areas With Land Invasion In Fetakgomo Tubatse Local Municipality

The Municipality owns 1.7% of land as per the 2018 Land Audit Report. These areas are Mecklenburg A and B, Ga-Mapodile, Origstad, Fetakgomo Extension 1, Burgersfort Extension 10, Burgersfort Extension 5, Portion 8, 9, 10, 11 and 12 of the farm Aapiesdoorndraai 298 KT, Tubatse A and Praktiseer Extensions, Portion 2, 3, 4, 5, 6, and 7 Hoeraroep 515 KS. On a daily, the municipality fights against land invasion. In addition to the list in Land Invasion Prevention Strategy 2018, the identified municipal owned land with land invasions within the Fetakgomo Tubatse Local Municipality are as follows:

- Burgersfort Ext 10: Erf 474, 475, 479 and 480
- Mecklenburg A
- Mecklenburg B: Portion 5 of the farm Mecklenburg 112 KT
- Ga-Mapodile: Erf 587, 213, 390 and Erf 603
- Erf 1157 Tubatse A
- Aapiesdoorndraai: Portion 8,9,10,11,12 of the farm Aapiesdoorndraai 298 KT
- Fetakgomo extension 1(Portion 2 Hoeraroep 515 KS)
- Recently, the Municipality has seen new invasions on Portion 5, 6 and 7 Hoeraroep 515 KS, Portion 44 Aapiesdoorndraai 298 KT, Remainder of Aapiesdoorndraai 298 KT.

The Land Invasion Prevention Strategy 2018 is currently under review in the financial year 2024/25. The Municipality currently mitigates land invasion using the PIE Act which requires the court to make a ruling on the eviction of unlawful occupiers and through the appointment of an Anti-Land invasion task team to monitor and prevent land invasion on Municipal land. In addition, the Municipality is on a drive to make awareness on land invasion through publication of notices in the local newspapers, placing notice board on the land prone to land invasion and engagement with Magoshi. Land invasions are highly discouraged and prohibited within the municipal jurisdiction.

# Rationale behind land invasions

Land is a scarce resource that is in high demand with limited supply. The rapid economic growth in Fetakgomo Tubatse Local Municipality due to mining, agriculture, retail, trade and hospitality attracts migration of people from all over South Africa in search of employment opportunities. As a result, economic centres within the municipal jurisdiction increase in population on a daily. Consequently, an increase in population results in a high demand for housing and retail. When the demand is higher than the supply in the housing sector, a gap is identified, and opportunities emerge. Unfortunately, the opportunities that arise from this phenomenon results in land invasion. The following causes have been identified in the Land Invasion Prevention Strategy, 2018 as the leading causes of land invasion within the Municipality:

- Municipal land is not protected or demarcated
- Available land on the market is too expensive for majority of the population
- Unavailability of land within strategic locations
- High property services charges and rates
- Housing backlog
- Municipal townships with no infrastructure cannot be alienated to reduce housing backlog
- Citizens see land occupation as a quick and cheap way to jump the queue or housing waiting list
- Land politicization

# 2.5.6. Land Use Management Tool

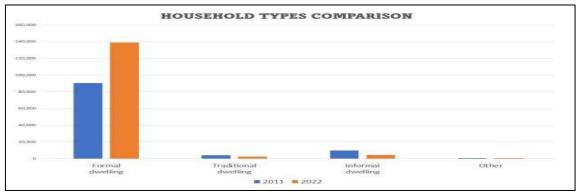

Spatial Planning and Land Use Management Act (SPLUMA) stipulates that the municipality is the authority of first instance as far as Spatial planning and land use management is concerned. As required by SPLUMA, the municipality has developed, approved and gazetted the following:

- Fetakgomo Tubatse Spatial Planning Land Use Management By-law in 2018
- FTLM Land Use Scheme, 2021
- Spatial Development Framework, 2020
- External Appeal Authority

In addition, to deal with land use management, the municipality is part of the Sekhukhune District Municipal Joint Tribunal.

# 2.5.7. Housing Types

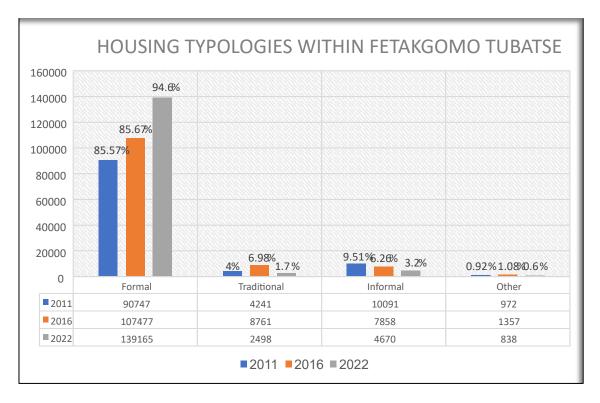

The Municipality has signed an MOU with The Housing Development Agency for development of Townships and RDP housing. HDA is a housing development authority in FTLM. It is worth noting that the Municipality is faced with the highest amounts of backlogs in almost all areas of development and strategic measures are being put in place to fight this pandemic. In the financial year 2023/24 the Municipality has acquired various properties namely Mashifane Extension 2 and 3; Erf 8361 Burgersfort Extension 57; Portion 93 (a portion of Portion 22) Mooifontein 313 KT and Remaining Extent of Portion 11 of the Farm Mooifontein 313 KT. The Municipality plans to acquire more land from the state and private owners for sustainable development to achieve the City Development Strategy.

Source: StateSA Census (2022)

The housing typology for the municipality consists mostly of formal housing (94,6%). This proportion changed from 2016 to 2022. A small decrease in the proportion of informal settlements has been recorded from 6,26% in 2016 to 3,2% in 2022. This shows progress in addressing the housing backlog). However, the has been a decline in the traditional settlements from 6,98% in 2016 to 1,7% in 2022. This represents a progression in the provision of formal housing through implementation of Rural Densification Programme . The Rural Densification Programme seeks to advance spatial transformation and the overall housing trajectory since traditional (often rural) settlements are generally rather isolated and removed from the main urban network (the effects of this discussed in the sections above).

Additionally, the existing housing seems to skew away from higher density types (cluster, flats/blocks of flats, semi-detached) and more towards the lower density typologies which ties back to the sprawl of settlements away from the main urban network which (again) increases the costs of service provision (undermining the quality of said housing) and motivates illegal occupation of land and stresses.

Source: StatsSA Census (2011); Community Survey (2016) and StatsSA Census (2022)

# 2.5.7. Housing Backlogs

The need for housing within the Municipality is increasing on alarming rate due to the influx of people into town for employment opportunity. The alarming urbanization is triggered by the thriving of mines around Burgersfort and Steelpoort. The housing backlog in a statistical perspective that there are 16755 (8%) within the municipality.

Although all most wards have previously benefited from the RDP housing implementation, about 16755 (8%) households still in need of RDP houses.

| WARD NO | PRIORITIES | VILLAGES   |
|---------|------------|--|
| 01      | Housing    | Need RDP Houses at Mapareng ,Makgalane                   |

# 2.5.8. ENVIRONMENTAL MANAGEMENT ZONES

The map below depicts the environmental management zones in Fetakgomo Tubatse Local Municipality. The environmental layers consist of hydrology, protected areas, swelling clays, dolomitic areas, slope, CBA's, existing cultivation and high potential agricultural land.

# **Environmental Management Zones**

The table below summarises the environmental consideration applicable to the municipality. The symbols depicted on the left illustrates whether development is allowed or not in the management zones, or whether there might be certain development implications. The meaning for each symbol is listed below: For the illustration of the spatial proposals, different colours were used to differentiate between the environmental layers.

| Management<br>Zone | Description  |   |
|--------------------|--|---|
| Hydrology          | According to DACE (2009:17), the following standards apply for rivers systems; 100m buffer | • |

# **Environmental Management Zones**

|  | zone from the edge of the riparian zone for<br>rivers/streams outside the urban edge and a 32m<br>buffer zone from the edge of the riparian zone for<br>rivers/streams within the urban edge. According<br>to DACE (2009:17), the following standards apply<br>for dams and wetlands; 30m for wetlands<br>occurring inside the urban edge, 50m for wetlands<br>occurring outside the urban edge. |          |
|--|--|----------|
| Protected<br>areas   | All protected areas should be maintained and well<br>managed. Only certain developments will be<br>allowed with the approval of involved<br>environmental stakeholders.  | <b>+</b> |
| Swelling<br>Clays  | Vertical movements of expansive clay can occur<br>below structure foundations upon changes in<br>moisture content. The loss of vegetation increases<br>the moisture level in the soil as well as the clearing<br>of large trees which normally occurs when<br>development takes place.   | •        |
| Dolomitic<br>areas   | Dolomitic land can be unstable, and may even<br>be dangerous. Specialist building techniques<br>may be necessary, and certain types of<br>development<br>may not be safe.  | •        |
| Slope  | Slopes that exceeds 25% is not recommended for<br>any development. Building on steep slopes<br>involves high costs for extending infrastructure as<br>well as environmental risks such as, landslides,<br>increased speed of fires which all lead to the loss<br>and/or damage to property.  | •        |
| CBA's  | Manage further loss of natural habitat, Control of illegal activities, such as hunting and waste dumping. Degraded or disturbed CBA 1s and CBA 2s should be prioritized for rehabilitation   | <b>+</b> |
| Existing<br>cultivation &<br>high<br>potential<br>agricultural<br>land | The protection of existing and high potential<br>agricultural land is crucial to ensure food security.<br>The agricultural sector is also important in terms<br>of employment opportunities.   | <b>+</b> |

• No Development will be allowed within these environmental areas

- Not recommended (Only with approval from involved DEA
- Development implications (High-risk area) Increased cost of development
- Development implications (Medium-risk area) Increased cost of development.

#### Rationale behind environmental management areas

The following table specifies the land use guidelines for land applicable to areas where CBA's and ESA's are relevant.

- "Y" (Yes) means the land use or activity is compatible with the management objective for the CBA/ESA.

- "R" (Restricted) means the land use or activity is compatible only if undertaken subject to certain restrictions.

- "N" (No) means the land use or activity is not compatible, even with restrictions.

- When an "R" is indicated for permissible land use activities, the developer of the bioregional plan must describe what the restrictions will be. This should be informed by any applicable policy that has been developed by either the Province or the Municipality, whichever is more restrictive.

For the purpose of the spatial proposals different colour schemes will be used to differentiate between the various environmental management zones. The next section deals with nodes, corridors and clusters identified in the Municipality.

# 2.5.9. Biodiversity

Critical Biodiversity Areas (CBA & ESA) is the collection of sites that are required to meet the region's biodiversity targets, it is thus important that they are maintained in

the appropriate condition for their category. Critical biodiversity areas are areas of the landscape that need to be maintained in a natural or near-natural state in order to ensure the continued existence and functioning of species and ecosystems. In other words, if these areas are not maintained in a natural or near-natural state then biodiversity targets cannot be met. Maintaining an area in a natural or near-natural state state can include a variety of biodiversity-compatible land uses and resource uses.

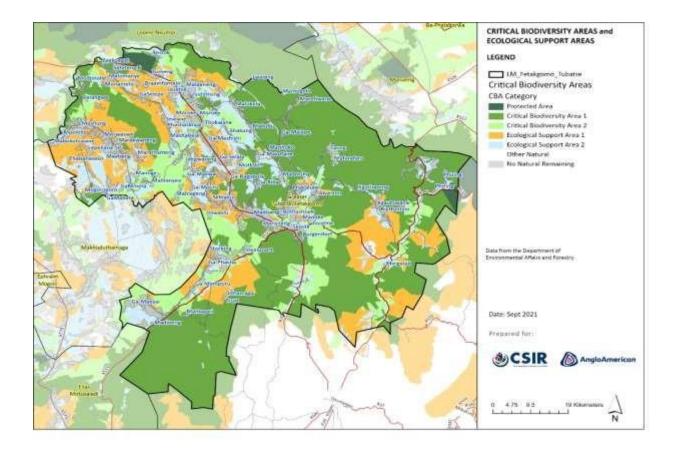

The following table shows the CBA categories in the municipality and the amount of land they cover. CBA 1 covers the largest area in the municipality as it covers 50% of the municipal area. CBA 2 and ESA 2 cover 15% of the municipal area. ESA 1 covers 19% of the municipal area.

| ENVIRONMENTAL CATEGORIES     | HECTARES | PERCENTAGE |
|------------------------------|----------|------------|
| Critical Biodiversity Area 1 | 286 331  | 50.3%      |
| Critical Biodiversity Area 2 | 83 974   | 14.7%      |
| Ecological Support Area 1    | 108 583  | 19.1%      |
| Ecological Support Area 2    | 82 792   | 14.5%      |
| No Natural Remaining         | 1 671    | 0.3%       |
| Other Natural Area           | 1 614    | 0.3%       |
| Protected Area               | 4 480    | 0.8%       |
| Total                        | 569 445  | 100.0%     |

# Table: Biodiversity areas and land cover

The below map indicates the critical Biodiversity Areas and Ecological support Areas by CSIR (2021).

According to the FTLM SDF (2020), "one of the key supporting strategies for growth management is to achieve more efficient utilisation of public transport and to prevent lowdensity outward expansion and development on valuable environmental areas such as, high potential agricultural land and other important ecological areas. This can be achieved through densification. It is recommended that all vacant stands within the urban and rural edges must first be developed before any outward development are considered. The urban/rural edge "settlement boundary" will be used as a tool to control development within the municipality". Therefore, there is need to densify in line with the FTLM densification policy and spatial development framework to ensure optimum land utilization given that 50.3 % of our land is listed as Critical Biodiversity Areas.

# Rivers

The area is covered by a number of rivers and streams, providing habitable areas along it and its branches. The municipality's current Integrated Development Plan (IDP) seeks the conservation of its natural environment, and one of the objectives identified for the achievement of this goal is the protection of groundwater quality and river systems for water supply to communities. This is because the rivers are the key source of drinking water for the many communities that do not have access to piped water. The following are the rivers within the municipality: Groot-Dwarfs; Klein-Dwars; Steelpoort; Tubatsane; Moopetsi; Spekboom; Mabitsana; Tshwetlane; Hodupong; Matadi; Mabogwane; Olifants; Motse; Monametsi; Pelangwe; Mohlaletsi; Ohrigstad; Vyehoek; Mantshibi; Waterval; and Eloffspruit.

The rivers and watercourses within the municipality flow into various dams within and around the Fetakgomo Tubatse Local Municipal boundary, stretching into dams in other municipalities. This shows that the water system within the municipality is not isolated, it is a system that functions together with the watercourses in its neighboring municipalities. Implications for land use management:

No agricultural activity should take place closer than 32 meters from any riverbank. Developments below a dam wall, must take cognizance of the dam failure flood line.

No development within the specified flood line and where the integrity of a riverbank may be compromised.

## Dams

Dams within the municipal area are the following:

Tubatse Dam; Tweefontein Mine Return Water Dam; Richmond Dam; Lepellane Dam; and Vlakfontein Dam. Implications for land use management:

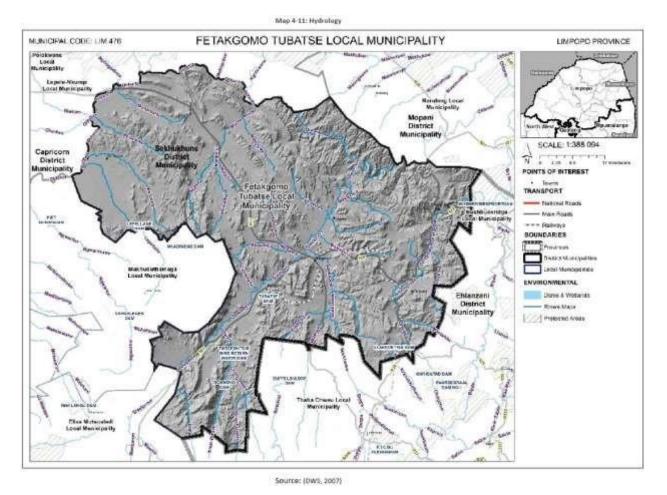

- Existing settlements should be encouraged to relocate outside of these flood lines.
- No future settlements within the 1:100-year flood line and dam failure flood lines.
- No development should be closer than 32m from the high-water mark of any unprotected dam, until such time as the Disaster Management Plan identifies settlements that are at risk of being flooded.

#### Wetlands

Wetlands occur as individual endorheic pans, linear riverine systems, slope depression, flat and fringe wetlands. All wetlands are temporary – i.e., filling up briefly after summer rains. Pans are of ecological importance in arid regions for their ability to hold water and often unique associated biota. A large amount of mining activities within the municipal area may pose a threat to natural wetlands and should be very carefully managed.

# Hydrology

To sustain the growth of specific riverine ecosystems adequate water flow and good quality water are required. The integrity of aquatic habitat and water quality are major determinants of the biological communities in a system. The biological integrity of the system will be adversely affected if for a number of reasons habitat is lost or degraded. Thus, habitat availability and diversity are important in supporting diverse biological communities and provides an indication of the current ecological integrity of an ecosystem.

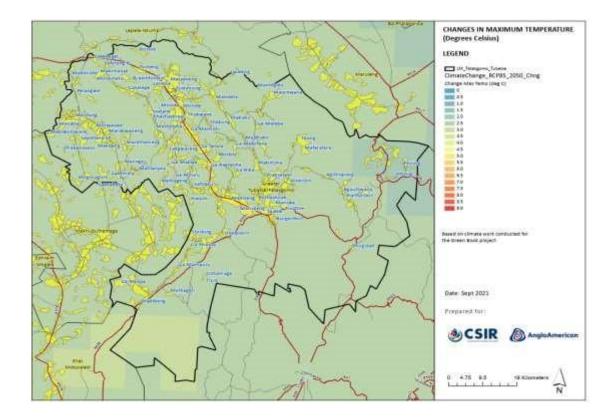

# Climate

# Temperature

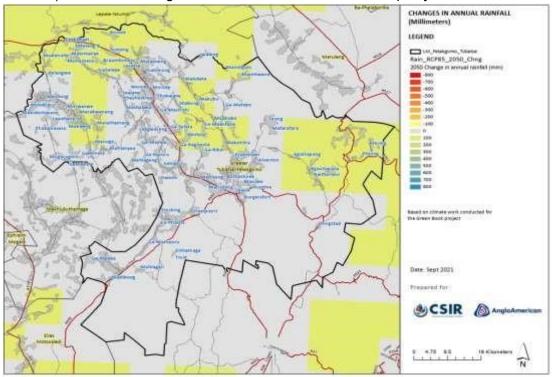

The minimum annual temperature in Fetakgomo Tubatse Local Municipality varies largely between 4.1°C - 8 °C, whereas the maximum annual temperature varies largely between 25.1°C - 31°C. The following maps show the changes in weather temperatures in the municipality.

The change in the number of considering the RPC 8.5 low mitigation scenario reflects for 2050 the expected increase in maximum temperatures over the region.

# Rainfall

Rainfall occurs mainly during late summer (February) and can be highly unpredictable, with rainfall patterns within the municipality being highly variable. 63% of the Limpopo Province is occupied by the rainfall class of 401-600 (mm a<sup>-1</sup>) (ARC-ISCW, 2005) which is the range in which most of the local municipality falls.

# Air Quality

The Air Quality Act is there to protect the environment by providing reasonable measures for the protection and enhancement of the quality of air in the Republic. The Act aims to prevent air pollution and ecological degradation as well as securing ecologically sustainable development while promoting justifiable economic and social development. Air pollutants are defined as substances which, when present at high enough concentrations, produce significant negative impacts on people and/or the environment. The main or key pollutants that are likely to be detected in the district include SO2, NOX, CO, PM and VOCs. The origin and health impacts associated with these pollutants will be discussed in a later chapter.

The Fetakgomo Tubatse Local Municipality is found in the Northern eastern part of the district. The main towns in the area are Burgersfort and Steelpoort. The main activity in this area is the mining of chrome and platinum. There are also three chrome smelters in the area. This then means that the area is likely to have air pollutants like sulphur dioxide, nitrous oxides, chromium (VI) and particulate matter. There is also significant traffic in the area due to the transportation of minerals which introduces a substantial pollution from the vehicles. Other pollutants like pesticides can also emanate from the farms around Ohrigstad towards Burgersfort, of which the extent has not yet been determined.

One key element, which is of paramount importance for the Fetakgomo Tubatse Local Municipality is to put real time air pollution monitoring measures in place as soon as is practically feasible, so as to determine the extent of the problem and/or the concentrations of air pollutants in the area of jurisdiction, since air pollution has economic and social implications. This will also allow for accurate dispersion modelling. Currently, the district has three passive air quality monitoring stations which are being monitored by an independent company. The pollutants being monitored include SO2, NOX and Fallout dust. The results that are being obtained indicate the following:

# Surface pollution

FTLM is conducting waste management awareness and cleanup campaigns within its jurisdiction, and in a process to develop the new Burgersfort Waste Disposal Site in the Burgersfort Area to accommodate disposers to minimize traveling costs. The figure below shows municipal landfill sites (old and new) in Burgersfort and the other one in Malogeng. The planned transfer stations are located in Leboeng, Mphanama and Dilokong cluster.

Waste management services within Fetakgomo Tubatse Local Municipality (FTLM) involve waste management awareness and education, recycling initiatives, waste collection, clearing of illegal dumps, storage, transportation, disposal of general waste as well as monitoring, enforcement of by-laws and relevant legislations. The services are intended to eradicate illegal disposal of waste, the deleterious effects of waste on human health and the natural environment. However, the municipality still

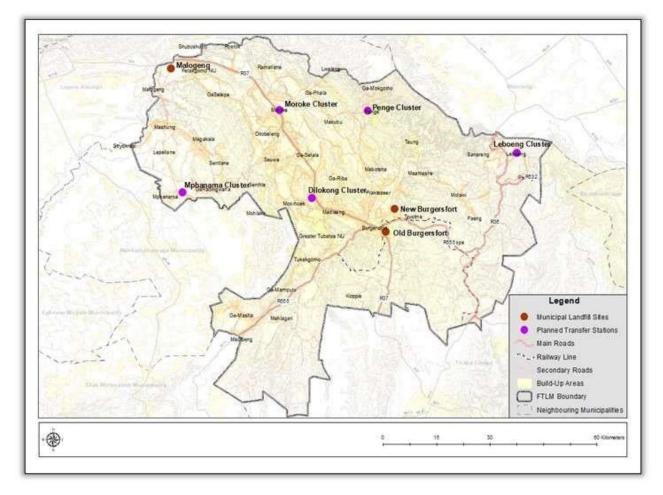

experiences unauthorized disposal of waste, especially in areas that are not receiving the waste collection, along main roads, and informal business outlets.

| NO | AREA                               | WARD NO      |
|----|------------------------------------|--------------|
| 1  | Burgersfort                        | Ward 18 & 31 |
| 2  | Bothashoek                         | Ward 20      |
| 3  | Gowe and Mooihoek                  | Ward 7       |

| 13 | Ga-Nchabeleng                      | Ward 36      |
| 14 | Apel                               | Ward 35      |
| 15 | Mashilabele                        | Ward 38      |
| 16 | Driekop Post Office-<br>Maditameng | Ward 7 &19   |
| 17 | Ga-Mashishi                        | Ward 15      |
| 18 | Mashifane Park                     | Ward25       |
| 19 | Mashung, Mabopo,                   | Ward 36,     |
| 20 | Alverton                           | Ward 23      |
| 21 | Dreseden                           | Ward 24      |
| 22 | Lerajane                           | Ward 39      |

Refuse collections are done in the following areas:

| 23 | Appiesdoringdraai<br>Motaganeng | Ward 18 |
|----|---------------------------------|---------|
| 24 | Ohrigstad                       | Ward 01 |
| 25 | Mpahanama                       | Ward 37 |
| 26 | Atok                            | Ward 34 |

Old mining areas such as Penge, Taung, and Krommelenboog etc are regarded as the most hazardous areas due to the asbestos remains exposed either by rain or life stock. Emphasis must also be made on the mines and agricultural activities that are currently taking place in the area in making sure that they are restricted from using hazardous chemicals that might result as a threat to the environment. There is a need for the Municipality to develop Environmental management policy and strategy in making sure that the environment is managed properly.

Source: FTLM, 2024

# 2.6. LOCAL ECONOMIC DEVELOPMENT

# 2.6.1. <u>Context</u>

The Constitution of the Republic of South Africa, 1996 (Act 108 of 1996) mandates that municipalities must structure and manage its administration, budgeting and planning processes to give priority to the basic needs of the community, and to promote the social and economic development of the community.

This section provides a synopsis of the municipal economy assessment and highlights its competitive and comparative advantage. Although Fetakgomo economy remains predominantly rural, the current key economic drivers present a great potential for the improvement in the economic conditions of the general community of the Fetakgomo Tubatse Local Municipality

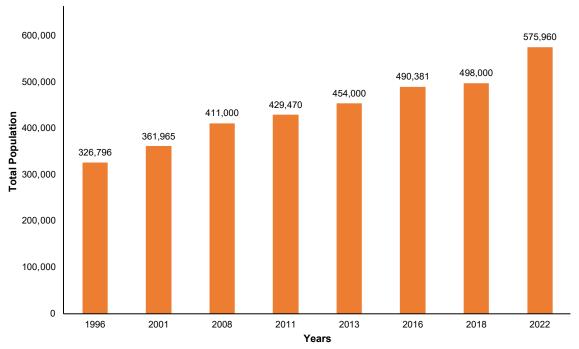

The municipality's economic activity centres on the main movement and settlement clusters identified in the previous sections (most intensely along the R555 and R37 close to Burgersfort and Steelpoort).

# 2.6.2. <u>Population Profile</u>

# Population growth

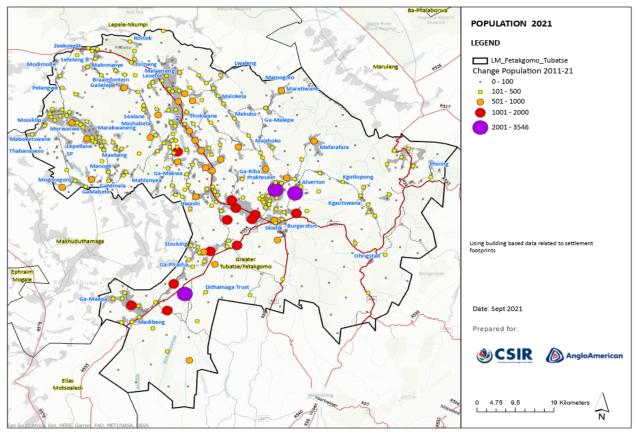

Since the establishment of the FLTM in 2016 there has been an increase in population of 14.9 percent from 490,381 in 2016 to 575,960 in 2022. Over the intercensal period, 2011 to 2022, South Africa has observed an increase in population by 16.6 percent<sup>1</sup>, however FLTM population increased by 25.4 percent. The high increase could be attributed to exclusion of other municipalities before the 2016 amalgamation of Fetakgomo and Greater Tubatse local municipalities. The high population growth implies that there are more births or more migration into FTLM. Consequently, the municipality needs to plan adequately for services provision so that both the quality and the quantity of services matches the increasing population. There should also be deliberate efforts to accelerate job creation opportunities and other youth empowerment programmes in FTLM.

<sup>&</sup>lt;sup>1</sup> https://www.statssa.gov.za/?p=16716

Population growth of Fetakgomo Tubatse Local Municipality over the last 16 years Global Insight, (2023)

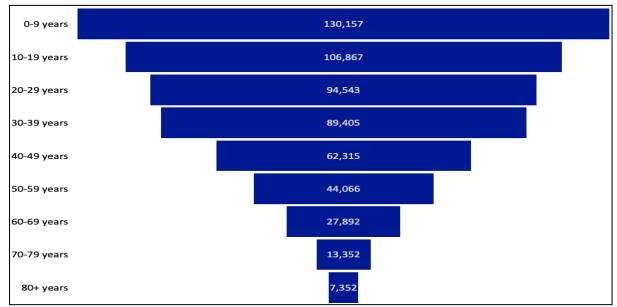

The figure above indicates that the areas of largest population growth for example at Praktiseer and Alverton area has experienced some large increase in population change.

FTLM Population Changes from 2011 to 2021 (CSIR Evidence Document)

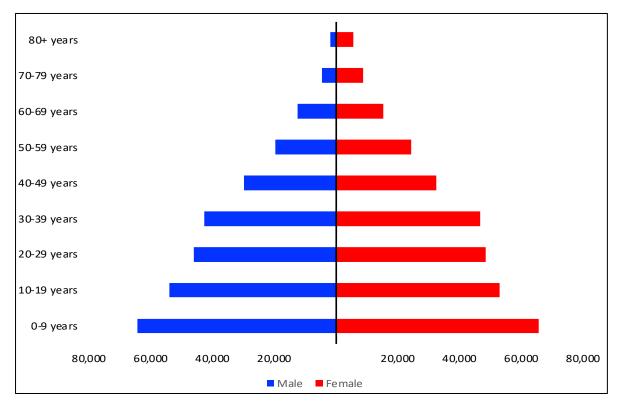

# **Population Structure**

FTLM population structure is dominated by youth as it is more imbalanced towards the youth population (<35 years of age). The highest population concentration is on the years below 9 years, for both males and females. The total population contribution of the below 19 years' age group is about 237,047 people which is approximately 41.1 percent of the entire FTLM population (Fig. 2-3). This indicates that the composition of the population is growing especially among infants, teenagers and youth. Demand for expenditure on schooling as percentage of total budget will therefore be high. This requires that the municipality in collaboration with other stakeholders be able to provide support mechanisms towards basic education as per the norms and standards of education. This includes adequate schools to avoid overcrowding and to also provide transport in areas that fall outside the acceptable norm of 5km radius to public schools. Proper school facilities and improved equipment to enhance sound and effective learning should also be provided e.g., Computers and Tablets. The learners should have access to minimum sets of textbooks and should also have access to learner ratio 1:40 and 1:35 in Primary and secondary schools respectively.

Age distribution of the FLTM population in 2022 (Statistics South Africa, 2022)

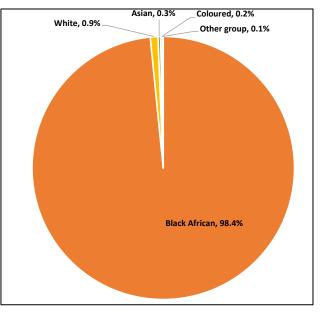

Based on the 2022 census data, 52.1 per cent of the population in FTLM are female, while 47.9 per cent are male. There is no great disparity in the male and female population based on age, however female population exceed male population in all the categorised age groups, except for 10-19 years (Figure 2-4). The imbalance can be attributed to large numbers of males who migrate to other provinces to look for work opportunities. As a result of the rural nature of FTLM, there are still persons who work in other provinces such as Gauteng and only come back home monthly or bi-monthly to see their families. In addition, this scenario depicts that there might high presence of female headed households in the municipality. Thus, there is a need to develop programmes that target women to create self-employment and educational opportunities where possible.

Gender profile of FTLM in 2022 (Statistics South Africa, 2022)

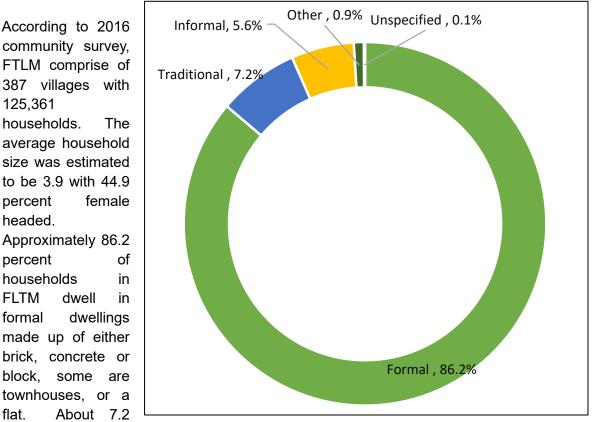

# Population Groups and Language

Majority of the population in FTLM are black Africans (98.4 per cent) and Sepedi speaking (92 percent). The remainder 1.6 percent comprises Whites (0.9 percent), Asian (0.3 percent), Coloureds (0.2 percent) and other groups (0.1 percent). This could be attributed FTLM villages being under tribal authorities (Figure 2-5). The 1% of the Whites, Indians and Coloureds are confined to the main towns in the municipality and mining areas.

Population group of the FLTM population (South Africa Census, 2022)

# 2.6.3. Households

Main dwelling of households (Statistics South Africa Community Survey, 2016)

percent who live in informal dwellings such as shacks, while 0.9 percent lived in other kinds of housings and 0.1% never specified<sup>2</sup>. Further, 82.4% of the inhabitants of FLTM live in their own dwellings<sup>3</sup>.

# 2.6.4. Education

live

traditional dwelling compared to 5.6

in

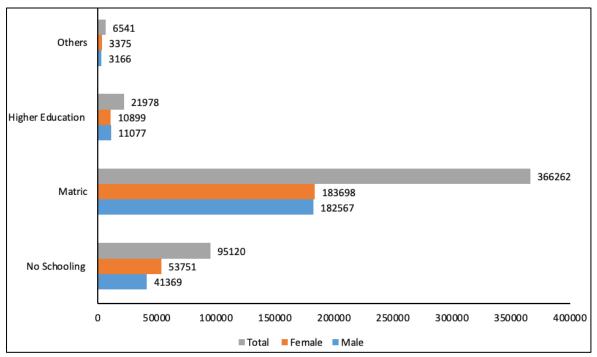

percent

Based on the 2016 census data, 19.4% of the population in FTLM have no schooling, while 74.8% are in school pursuing matric education while 4.5% were in higher education.

<sup>&</sup>lt;sup>2</sup> Community Survey 2016

<sup>&</sup>lt;sup>3</sup> <u>https://municipalities.co.za/demographic/1243/fetakgomo-tubatse-local-municipality</u>

Education status of FLTM population

Further, the education status of the FTLM population adults aged above 20 years was determined in 2016, and 16.2 Percent had no schooling, 24.4 percent had attained the Matric while 6.2 percent had a higher education qualification<sup>4</sup>.

According to the Fetakgomo Tubatse LM IDP (2019/20), there are 247 schools (primary and secondary) situated in the LM. Steelpoort, Ohrigstad and Burgersfort each have one government primary school. The IDP indicates that it is the norm for rural or semi-rural areas to have a high prevalence of primary schools since many pupils leave school at an early age to find employment to assist and support the family. The privileged scholars, who can afford to further their education, either attend the secondary schools in the area or secondary schools located in larger towns outside the region.

Although there appear to be a significant amount of school infrastructure, supported by reasonable scholar transport, sizeable learners do not complete secondary education. The mean years of schooling in FTLM was only 7.91 years in 2019. Although this has improved in recent years, and though it is better than its competitors, the reality is that it shows that a significant amount of people drops out before completing schools, in most cases in Grade 7 or 8 contributing to the low literacy rate of 72.5% in 2019. According to SDM, one of the factors that contribute to low quality of education in the district is the learner/teacher ratio and class size, where smaller classes are considered beneficial as they allow teachers to pay attention and meet the needs of individual learners. There are 4575 teachers within the 375 schools with

 $<sup>{}^4\</sup> https://municipalities.co.za/demographic/1243/fetakgomo-tubatse-local-municipality$ 

a total of 14,521 learners at a student-teacher ratio of 32:1, which is considered high and had been increasing between 2016 and 2018. It had further been reported that public schools, particularly the ones in rural areas, lack educators. The table below gives a picture of the findings for 2016 community survey.

# 2.6.5. <u>Poverty and Income</u>

### Average household income

The annual household income in FLTM is R14 600, which is similar to the Limpopo provincial average. This average household income is half the national average of R29 400. Annual individual income is, however, higher, averaging R57 500. This is double the district, provincial and national average of R30 000<sup>5</sup>.

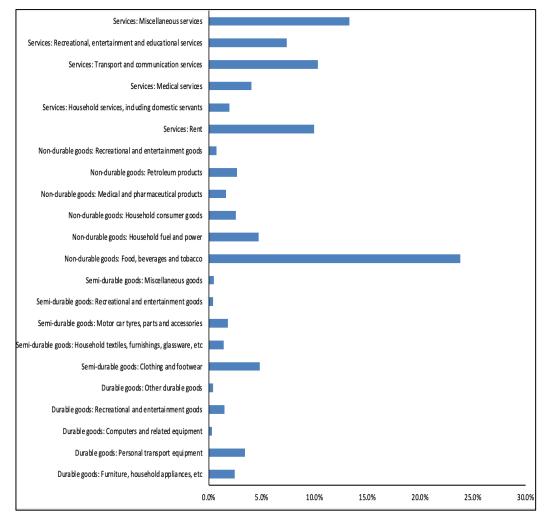

National poverty headcount ratio is the percentage of the population living below the national poverty line(s). The table below indicates comparison of poverty in the Sekhukhune District and Fetakgomo Tubatse is the highest.

| MUNICIPALITIE<br>S  | 2011 CENSUS          |                      |                      | MMUNITY<br>RVEY      |
|---------------------|----------------------|----------------------|----------------------|----------------------|
|                     | Poverty<br>headcount | Poverty<br>intensity | Poverty<br>headcount | Poverty<br>intensity |
| Sekhukhune          | 11.3                 | 41.6                 | 13.6                 | 42.4                 |

#### Poverty Headcounts:

<sup>&</sup>lt;sup>5</sup> Chrichton 2021 (An Interactive Community Profile Fetakgomo Tubatse Local Municipality Limpopo Province. Part A: General Profile)

# Household Expenditure

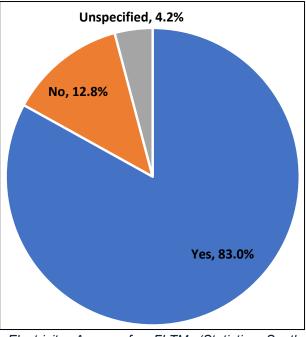

FTLM Household Expenditure Categories

# 2.6.6. <u>Access to Basic Services</u>

# **Energy Access**

Fetakgomo Tubatse Local Municipality FTLM is not the electricity Authority nor Provider; this is the sole competency of ESKOM. The municipality is only responsible for the coordination of the service by making sure that communities are consulted and by compiling a priority list. The only provider of electricity in the region is ESKOM, which has installed basic infrastructure to provide electricity to the communities.

For most part, the rural population has no electricity. Lack of access to electricity to some villages poses a problem to the municipality as it impacts negatively on local economic development and community projects. Plans are underway for the municipality to start positioning itself and applying for electricity authority during the financial year under review. DMRE has developed a District Wide Energy Master Plan which will also assist in fast tracking electrification of villages within the Municipality. The Municipality partially meet the millennium development goals on 90 villages and new settlement. The municipality is having a major challenge of old villages without electrification of 28117 need to be electrified, 13811 are households needing post connections.

*Electricity Access for FLTM (Statistics South Africa Community survey, 2016)* 

Approximately 83% of the residents (107,770 Households) of FTLM have access to electricity while 12.8 percent have no access.

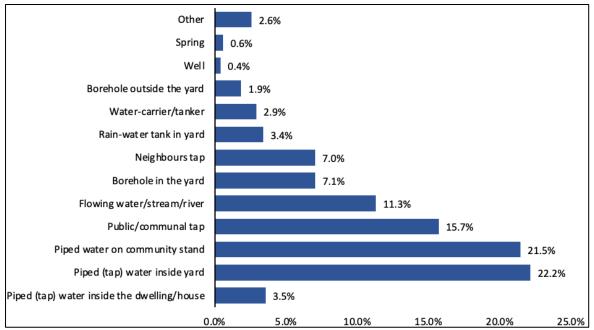

The main sources of fuel used for cooking by the Households in FTLM are electricity from the mains (66.4%), wood (23.3%) and paraffin (8.4%). The remaining population utilise gas, solar and other sources of electricity.

The Municipality introduced operation mabone program with an aim to accelerate household connections and to eradicate the backlog. The Following villages are benefiting from the Operation Mabone program as phase one: Sekopung; Makofane; Pidima; Makgalane; Banareng; Makopung; Taung; Matokomane; Marketizing; Dithamaga; Leboeng; Buffelshoek; Koppie; Mokutung; France; Mandela Park; Kampeng; Maputle; Dibakwane; Barcelona. Phase two of the program includes the following villages: Mashamuthane south; Mashamuthane south; Mashamuthane west; Vodaville; Mountain view; Praktiseer extension 3; Praktiseer ext 11; Khalanyoni; Dithabaneng; Phelindaba; Riverside; Tswelopele park and Pakaneng.

#### Access to Water

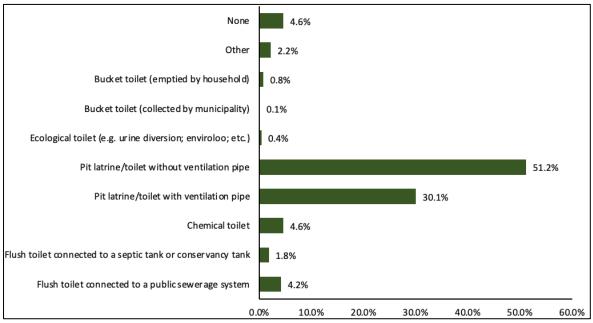

About 63% have access to water provided by a regional or local service provider. Given this situation, 39% of households obtain their water from rivers and other sources. Seen in totality, these figures are alarming due to the findings of a recent study of water supply in rural South Africa.

The study highlighted a pressing need for proper water treatment based on active monitoring of water sources, given the level of contaminants in the water used by rural communities.

About 22.2% and 21.5% of the households depend on piped water inside yard and piped water on community stand respectively.

Main source of drinking water in FTLM: (Statistics South Africa Source Community Survey, 2016)

# Access to Sanitation

Sanitation Facilities in FLTM (Statistics South Africa Community Survey 2016)

In addition to water supply concerns, only 10.6 percent of households have access to flush or chemical toilets, leaving most households to rely on pit toilets (81.3%). The latter is above

both the provincial (73%) and national (30%) figures. Similarly, most households (90.4%) have to dispose of their own refuse. This underscores the likelihood of poor environmental health outcomes and the potential for water contamination in the community.

### Access to Refuse Removal

Fetakgomo Tubatse Local Municipality is rendering waste collection services through a contracted service provider in Burgersfort, Praktiseer, Steelpoort, Ohrigstad and Ga Mapodile. Waste collection at Apel, Strdkraal A and B is done in house through Municipal resources (trucks and operators). The Municipality has also placed skip bins at strategic points along the R37 road which are being collected weekly by the Service provider as per the drafted and communicated waste collection schedule.

In line with the Back to Basic approach, the Municipality is in the process of extending the waste collection scope to other rural villages and has already started in Strydkraal with other villages having been identified as well. There are also initiatives that the Municipality has planned and are at an advance stage that relates to implementation of cleaning and clearing of town project to promote healthy and habitable environments.

Approximately 76.17 percent damp their own refuse while 10.5 percent dump or leave rubbish everywhere (Table 2-3). Only 9.65 percent are removed by local authority/ private company/ community members weekly.

| REFUSE REMOVAL  | HOUSEH<br>OLDS | PERCEN<br>TAGES |
|---|----------------|-----------------|
| Removed by local authority/private company/community<br>members at least once a week        | 12095          | 9.65            |
| Removed by local authority/private company/community<br>members less often than once a week | 882            | 0.70            |
| Communal refuse dump  | 2835           | 2.26            |
| Communal container/central collection point   | 228            | 0.18            |
| Own refuse dump   | 95483          | 76.17           |
| Dump or leave rubbish anywhere (no rubbish disposal)  | 13133          | 10.48           |
| Other   | 705            | .0.56           |
| Grand Total   | 125361         | 100.0           |

#### Refuse Removal for Household's weight:

Statistics South Africa Community survey (2016)

It is estimated that 40,053 (95%) households in the Apel region have no formal refuse removal services. They tend to use dongas, forests, open spaces and own created refuse dump. The widespread inadequacy of formal refuse removal services in the municipal area poses a health hazard to the rural communities-it is particularly

a problem for businesses. Also worth noting is that there was formal waste collection in four piloted wards, but it has since been abandoned due to reluctance of households to pay the service fee. The collection of the 4 wards started in 2009 as a pilot project which started as food for waste and the programme was phased out in 2010.

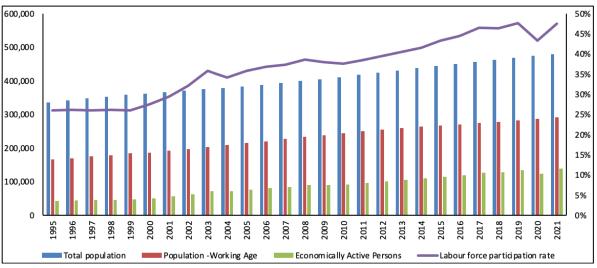

The current recycling programmes are in a very small scale as a result of lack of understanding of the long-term benefits of recycling by waste generators and the education of the public. A portion of the landfill next to the gate at Burgersfort is used for recycling. The recycling activity is an initiative of a private contractor. Employees of the private contractor reclaim from the workface and transfer the material to the recycling shed. This is a small-scale recycling due to the contaminated material that is collected from the household/businesses and transported in a compactor or truck mixed. <sup>6</sup>

# 2.6.7 Employment Opportunities

The employment status of the population has a variety of important implications. Economically active and employed persons (EAP) can contribute to the overall welfare of a specific community by paying their taxes, looking after the youth and aged and stimulating the economy. However, should a community have a large number of economically inactive and/or unemployed persons, the burden on the EAP of that community is amplified.

### Labour Force Participation rate

The graph below presents the labour force participation rate in Fetakgomo and Greater Tubatse from 1995 to 2016 and the Fetakgomo Greater Tubatse Municipality from 2016 to 2021 after amalgamation. The annual percentage increase in the Working age population is 2.59% while economically active persons has increased by 8.51% annually. As a 2012, approximately 61% (292,145 people) of the FTLM population were of working age, however only 138,855 individuals were

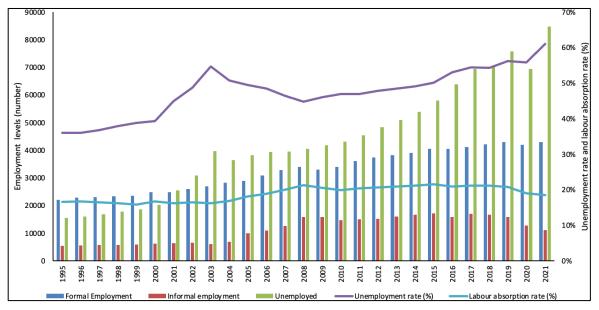

Labour force Participation rate

economically active. The labour force participation has experienced an annual average increment of 3.51%, resulting in 48% in 2021 (Figure 2-12). However, in 2020, the labour force participation declined due to the impact of COVID-19 on employment opportunities particularly in the service industries.

### Unemployment rate and labour absorption rate

The national unemployment rate continues to be higher than 25 percent despite the various efforts to reduce it. Unemployment has been highlighted as a key policy issue in various government economic policy documents like the National Development Plan (NDP), the New Growth Path and the Limpopo Development Plan (LDP) The LDP is aligned to the NDP and accepted the NDP target of reducing unemployment in 2019 to 14 percent and to 6 percent in 2030. In FTLM, the employment in formal sector has steadily increased over the years increasing from 22, 138 in 1995 to 42997 in 2021. Employment in the informal sector has continuously increased in FTLM however there was a decline in 2020 and 2021 and this could be attributed to the impact of COVID-19 on the informal sector that resulted in decreased employment in the sector. The unemployment rate has increased over the years from 36% in 1995 to 61% in 2021 while the labour absorption rate had increased from 17 percent in 1995 to 22 percent in 2019, however it declined to 19% in 2021.

Unemployment rate and labour absorption rate in FTLM

To address these unemployment and growth challenges, proposals are under consideration to establish a special economic zone (SEZ) within the municipality, which is mainly aimed at mineral beneficiation. It is estimated that this SEZ will result in a R25 billion investment across a number of sectors and will create approximately 8 000 jobs. Two thirds of this envisaged investment (R17 billion) is linked to a single project to build a platinum refinery.

Within the context of the SEZ, the municipality has identified five broad opportunities to support local development through its Integrated Development Plan. These include mining investments to extract the extensive mineral resources in the area, land availability, tourism, private sector funding, and infrastructure investment linked to job creation.

# 2.6.7. Land Use and Management

The FTLM is situated on fertile soils alongside the Lepelle, Leppellane and Spekboom Rivers, offering great agricultural potential. Land use within the FTLM is dominated by subsistence farming. It is also becoming apparent that land is growing increasingly scarce in the municipality, within the urban, rural and semi-rural areas equally. FLTM has recognized this as a challenge and has prioritized the issue. This is particularly significant given the growing importance of agriculture, mining, and tourism – all potentially conflicting land uses – to the FLTM economy.

The land issue in FLTM is governed by a dual system. Under the traditional system, land allocation (and, therefore, land use) is the prerogative of tribal council – and this system dominates in much of the municipality's formal towns and, to some extent, the adjacent townships. The traditional system is rendered more complex by the fact that each of the traditional authorities in the area has its own unique land use management system. In general, however, each traditional authority allocates land to a subject for either residential use or subsistence farming. In addition, subjects would also have unlimited access to communal grazing system, however, is becoming increasingly difficult to maintain, given the growing demand for land (for s range of purposes). Furthermore, the traditional land use management system is unwritten and therefore often subject to interpretation.

In recent years, the boundaries between different traditional authority areas have become increasingly blurred. This has led, in part, to the lodging of competing land claims in many parts of the municipality. It has also led to the growth of informal settlement activities within some traditional authority areas. This is especially prevalent around district growth points like Burgersfort and Atok and is undoubtedly a reflection of economic migration towards potential centres of economic activity.

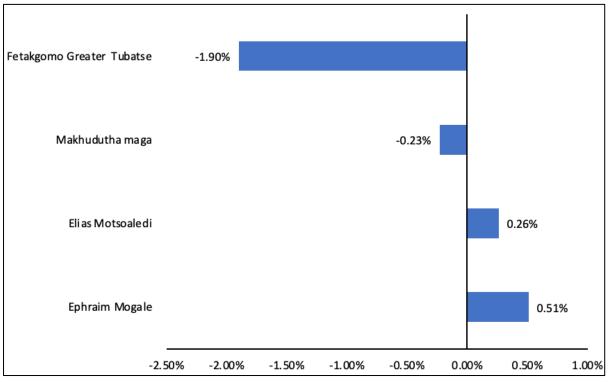

There is a latent tension between the traditional (tribal council) and modern (legalized) land use management systems. There are also several competing land claims in the area, which have not been resolved by the Department of Rural Development and Land Reform (DRDLR) in Sekhukhune District. Finally, as the FLTM economy boom, there is likely to be competing land demands by the different economic sectors. If the district population grows in response to this foreseen economic boom, domestic demand for (commercial and residential) land will become a competitor in this arena as well.

# 2.6.8. <u>Economy</u>

The Fetakgomo Tubatse Municipality is the largest municipality in the Sekhukhune District with higher poverty rates however the local economy is driven by the mining sector and agricultural

activities. The district is driven by the large domination of the mining activities which further contribute to the province at large. Within the Fetakgomo Tubatse LM, the northern section of the LM has the most marginalised economy of the region and has no economic base. However, with the development of mines in the LM, the area has started to benefit economically mines in many ways (2019/20).

According to the IHS Market regional explorer version 2142, the economic growth in the municipalities within the Sekhukhune district between 2010 to 2020 was -0.34%. While both Elias Motosaledi and Ephraim Mogale, experienced a positive economic growth, between 2010 to 2020 while FTLM had the lowest and negative economic growth of -1.90%

*Economic growth of Sekhukhune district municipalities between 2010 to 2020, Source 2023-2024 IDP plan for EMLM.* 

The IHS Market regional explorer version 2142 further predicts that FTLM will achieve the highest economic growth of 8.14% between 2020 and 2025. Makhuduthamaga Local Municipality is expected to achieve the second highest average annual growth rate of 4.03% while Elias Motsoaledi is expected to have an average annual growth of 3.34%. On the other hand, the region least economic growth within this period is expected in Ephraim Mogale Local Municipality with an average annual growth rate of 3.08%.

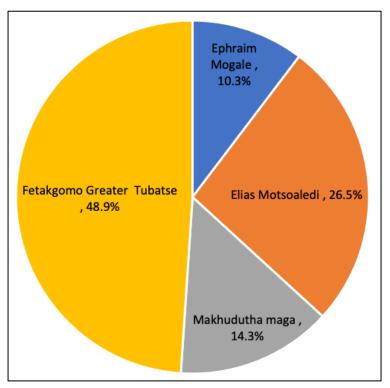

# Gross Domestic Product (GDP)

The Gross Domestic Product (GDP), an important indicator of economic performance, is used to compare economies and economic states. Gross Domestic Product by Region (GDP-R) represents the value of all goods and services produced within a region, over a period of one year, plus taxes and minus subsidies. The Limpopo province (LP) contributed 7% to the National GDP of R4.65 trillion in 2018, ranking number eight in terms of GDP contribution with a GDP per person R59,283. In 2017, Sekhukhune district contributed to 0.88 percent of the national GDP and 12.2 percent of the Limpopo's GDP. The contribution of the local municipalities to Sekhukhune district's GDP is presented in Figure 3-2. FTLM contributes the highest GDP to the district's economy at 48.9 percent.

Atok and Apel represent the most prominent settlement areas in the western extents of the

municipality and Driekop, Burgersfort, Steelpoort and Orichstad in the eastern parts. Due to the concentration of mining activities along the R37 and R555 (Dilokong Corridor), the Municipality functions as a strong economic centre within the SDM. As such, mining is not only the major source of employment and economic growth within the municipality, but also the district.

Minerals found within the Municipality include platinum, chrome, vanadium, andalusite, silica and magnetite. The current and planned expansion of mining activities within the LM is placing extreme pressure on the environment and is resulting in land use conflicts with other

Gross Domestic product of Sekhukhune district Municipality (IHS Market regional explorer version 2142)

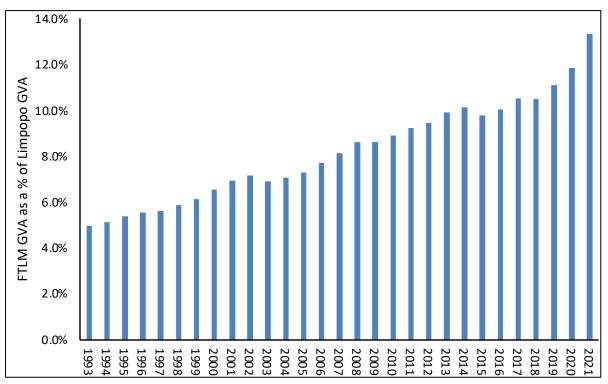

uses such as agriculture. Retail, trade, services, and agriculture also contribute to the municipal economy. Agricultural products cultivated in this area include citrus, vegetables, corn, and maize. Livestock farming includes cattle, goats, and game.

With over 20 active mining operations in the area, the main economic activity in Fetakgomo Tubatse is linked to extracting platinum and chrome, which in turn contributes to nearly half of the district's total gross domestic product (GDP). Notwithstanding this activity, as is the case in most rural communities, unemployment is a major concern, with pre-COVID-19 pandemic employment standing at just 23% – compared to 27% provincially and 39% nationally. This may be indicative of a weak economic base combined with a large portion of the population (38%) (ages below 15 and above 60) who are generally not considered economically active due to their age.

### Gross value added (GVA)

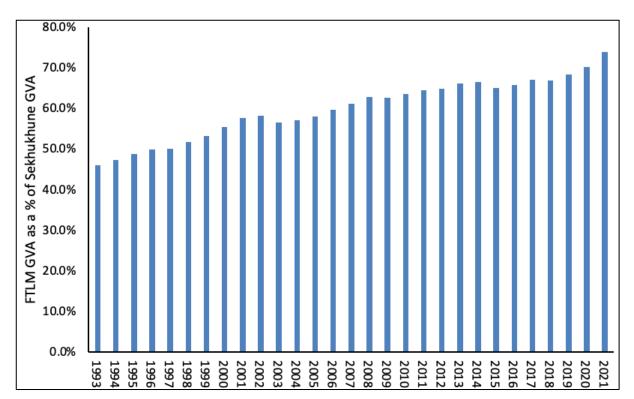

GVA is the output of the country less the intermediate consumption, which is the difference between gross output and net output. GVA is important because it is used in the calculation of GDP, a key indicator of the state of a nation's total economy. It can also be used to see how much value is added or lost from a particular region, state, or province. At the national level, GVA is sometimes favoured as a measure of total economic output and growth over GDP or gross national product (GNP). GVA is related to GDP through taxes on products and subsidies on products. It adds back subsidies that governments grant to certain sectors of the economy and subtracts taxes imposed on others.

FTLM has been contributing to the GVA of Limpopo province over the past years at an increasing rate. As observed in Figure 3-3 since the formation of FTLM, the contribution to Limpopo GVA has increased from 10.04 percent to 13.3 percent in 2021.

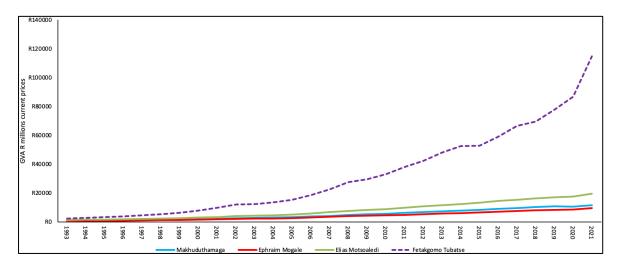

FTLM GVA as a percentage of Limpopo province GVA

FTLM contributed 65.7 percent to Sekhukhune GVA in 2016, and her contribution to Sekhukhune district has increased over the last years with 73.9 percent of the district's GVA being from FTLM in 2021.

FTLM GVA as a percentage of Sekhukhune district GVA

The GVA of FLM has been increasing over the past years in comparison to other municipalities in Sekhukhune district. And as observed in the figure below, in 2021 FTLM GVA in million Rands was R114 656 compared to R19,498 million of Elias Motsoaledi, R11,506 million of Makhuduthamaga and R9489 million of Ephraim Mogale municipality.

Further we assess the specific contribution of each sector to FTLM in terms of income and production from 1996 to 2021 (Table 3-1). Overall, the primary sector contributes the largest share (R84,728 millions), followed by the tertiary sector (R16,514 millions) while the secondary sector contributes the least (R13,415 millions) to FTLM GVA. At specific industry level, the mining and quarrying sector is the largest contributor with the least being electricity, gas and water industries. This implies that the mining sector is the cornerstone of the FTLM economy.

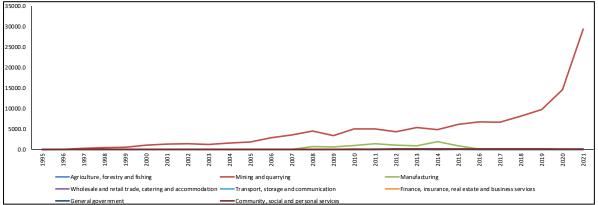

| <b>SECTORS</b><br>GVA in million Rands of the ( | Sreater Sel | chukhune N | <b>Y</b><br>Aunicipalities | EARS  |       |       |

#### **FTLM Exports and Imports**

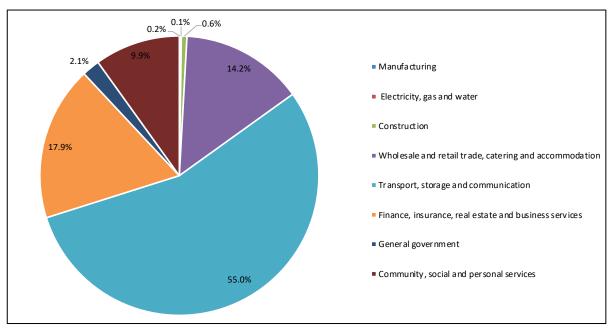

As observed in Table 3-1, where mining plays a significant role in the economy of FTLM, figure 3-6 further indicates the main export from the municipality has been from the mining and quarrying industry contributing accounting for 98.9 percent of

FTLM Exports in million Rands per industry

all exports in 2021 valued at R29, 387 million.

In 2021, FTLM imported goods and services amounting to 478 million Rands. There were no imports of agricultural and mining products, However, greater imports were in the transport, communication and storage sectors (55%). FTLM is a rural economy and thus 17.9% of the imports were in the Finance, Insurance, real estate and business services. Similarly, 14.2% imports were from the Wholesale and retail trade, catering and accommodation.

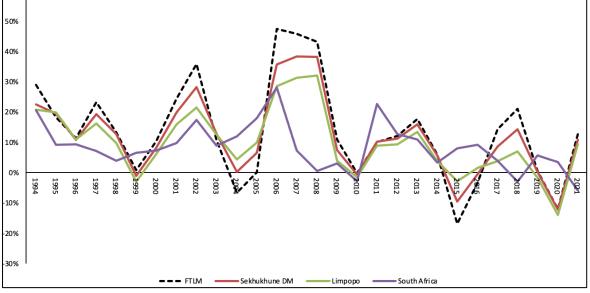

FTLM imports in 2021 based on percentage by Sector

### Fixed Capital formation

The World Bank tracks gross capital formation, which it defines as outlays on additions to fixed assets, plus the net change in inventories. Fixed assets include plants, machinery, equipment, and buildings, all used to create goods and services. Inventory includes raw materials and goods available for sale.

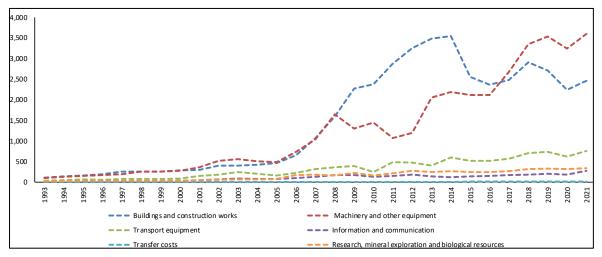

Gross fixed capital formation (GFCF), also called "investment", is defined as the acquisition of produced assets (including purchases of second-hand assets), including the production of such assets by producers for their own use, minus disposals. The relevant assets relate to assets that are intended for use in the production of other goods and services for a period of more than a year. The term "produced assets" means that only those assets that come into existence as a result of a production process are included. It therefore does not include, for example, the purchase of land and natural resources.

Countries need capital goods to replace the older ones that are used to produce goods and services. If a country cannot replace capital goods as they reach the end of their <u>useful lives</u>, production declines. Generally, the higher the capital formation of an <u>economy</u>, the faster an economy can grow its aggregate income. Capital formation essentially leads to more money swirling around the economy. The accumulation of capital goods translates to investment and the production of more goods and services, which should boost the income of the population and stimulate demand. Figure 3-8 indicates the annual rate change in fixed capital formation nationally. Provincially, district level and at municipal level. As observed, FTLM'S fixed capital formation in 2015, affected the municipality, district and provincial level, though nationally, the change increased (Fig. 3-8).

Annual rate of change in fixed capital formation

The graph above indicates the fixed capital formation (FCF) and capital stock by industry, asset type in FTLM in million Rands. Since 2007, machinery and other equipment and research, mineral exploration and biological resources have been the main sectors contributing to FCFF of FTLM.

Fixed capital formation and capital stock by industry, asset type in

#### Mining

FTLM is characterized by large presence of mining activities along the R555 and R37 provincial roads. This sector includes the extracting and beneficiating of minerals such as platinum, lead, chrome, black chrome and other precious minerals. This sector includes the extracting and beneficiating of minerals occurring naturally, including solids, liquids and crude petroleum and gases. It also includes underground and surface mines, quarries and the operation of oil and gas wells as well as all supplemental activities for dressing and beneficiating of ores and other crude materials.

In SDM the mining sector is dominant in the Burgersfort area were Fetakgomo Tubatse Municipality seats. Mining is the economic lifeblood of the area as the sector accounts for 34.5% of the municipality's total GVA and 55% of the municipality's total labour force are traced to the mining sector. The mining value chain consists primarily of exploration, extraction, mining, processing, refining, fabrication, and production stages. The mining in FTLM is often in the extraction stage and very limited processing operations. Minerals and potential jobs are exported for beneficiation to overseas companies and very little beneficiation in the municipality and in South Africa as a whole. In order to benefit sustainably on its mineral resources, the municipality will need to develop its industrial capabilities in the value-creation stages of its core mineral endowments. In the Burgersfort area site, asbestos, chromite, and platinum deposits from the Merensky Reef are mined in the town. Table ... presents the list of mining operation in the municipality.

All the mines in FTLM are in Burgersfort and approximately 60% are operational. Majority of the mining companies mine platinum (37.5%) and chrome (45%).

Opportunities exist for the small businesses within the municipality. Therefore, they need to be supported by being linked to the mining value chain for business development. Mining houses and the local hotel industry require catering services (which again links with agricultural development because local farms could supply fresh vegetables and meat), cleaning services, and repairing of machinery. Manufactured inputs could also be supplied to the mines and the industry at large, thereby growing the municipality's manufacturing capability. Strengthening initiatives like Enterprise and Supplier Development will build economic and business capacity of the SMMEs within the municipality. Although mining is such a large economic contributor within the district, its future needs to be considered as this has significant implications on

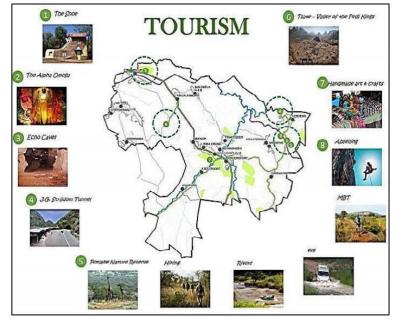

future settlement planning and investments. Building strong manufacturing base within the district is critical for future economic sustainability.

# Tourism

The National Development Plan (NDP) recognises tourism as one of the main drivers of employment and economic growth in South Africa. This is further embedded in the constitution where tourism is listed as a functional area of concurrent national and provincial legislative competence. The tourism sector is one of the low hanging fruits that draws a lot of foreign currency to South Africa. Tourism in Limpopo has been identified as a sector with a very strong competitive advantage in ecotourism linked to wildlife, culture and vast landscapes.

FTLM can be described as a tourism destination with unique attributes that allows for a competitive marketable brand targeting the municipal markets, with Projects and activities aimed at creating and improving visitor experiences and encouraging higher visitor expenditure, which will ultimately trickle down to the community level. Tourism Attraction FTLM is surrounded by beautiful mountains and boasts a rich cultural history. Tourism activities forming part of both economic activity areas are primarily related to nature tourism, game farming and hunting.

The following primary tourism areas and facilities located in FTLM 102: Caves (ward1,3 and 12), Magnetic stones (ward 3 and 6), Mountain (ward 5), Footprint, cave and Mohlapo (Ward 6), River, sand and rocks (ward 9), Potlake game reserve, Sehlakwe water falla, Phahlanoge wind stones. There is a cluster of activity in the east of FTLM, while the other attractions are scattered throughout the municipality.

Heritage has also a key role in uplifting and positioning tourism development in an economy. FTLM hosts rich cultural heritage sites as outlined in Table 3-2:

Tourism sites in FTLM

# 2.6.9. Fetakgomo Tubatse Special Economic Zone (SEZ)

Special Economic Zones are increasing becoming important tools used to drive an industrialisation globally; Cities are being repositioned to drive economic growth and development using SEZ as the preferred tool; Packages to attract investments are shifting away from tax incentives to state of the art infrastructure, good governance and ease of doing business; SEZs are increasing in importance in facilitating international cooperation and regional integration of value chains through cross border SEZ; Africa is on the rise: SEZ development, investments, and job creation; Fundamental challenge for Africa and South Africa: Infrastructure Deficit and deindustrialisation.

The proposed Fetakgomo-Tubatse SEZ (FTSEZ) is located in the south-east of the Limpopo Province of South Africa. It is hosted by the Fetakgomo-Tubatse Municipality in Sekhukhune District and is located within the Bushveld Igneous Complex (Eastern Limb), which hosts the wellknown Merensky Reef in the Limpopo Province. The FTSEZ in an industrial cluster initiative that falls within the planned Limpopo Platinum and Chrome cluster which has two components of industrial formations. At the upstream it involves the formation of the mining input supplies manufacturing industries and the downstream components involves the formation of mineral beneficiation industries. The latter has high potential for contribution in the production of clean energy and thus contribution to sustainable development and good health. The area boasts one of the highest concentrations of rich mineral resources in the world and is a global leader of platinum group metals and chrome resources, hosting over 40 mining operations which also is projected to be a catalyst for economic growth, industrialisation and mineral beneficiation by localising the various links of the value chain, both upstream and downstream. The demand for the mining inputs supplies from the region's mines has created an opportunity for large-scale industrialisation for both the manufacturing of mining inputs and the beneficiation of mining outputs. The aim is to support a broader-based industrialisation growth path, balanced regional industrial growth and development of more competitive and productive regional economies with strong upstream and downstream links in strategic value chains especially in PGMs.

The proposed FTSEZ forms part of the South African Government's SEZ Programme which is aiming to enhance the country's manufacturing and export capabilities and to attract foreign direct investment. Anchored in the Limpopo Development Plan (LDP), the FTSEZ is positioned and designed to be a top investment destination for companies seeking to be at the forefront of pushing the green energy "Just Transition" frontier outward, towards communities, towards local and international firms and markets seeking to build low-carbon economies.

The priority industries in the FTSEZ will enhance local manufacturing capacity and contribute to a low-carbon green economy which will offer socio-economic opportunities (for jobs and small businesses), not only to fight climate change, but to enhance energy security and develop local industries over the next five to 10 years. The FTSEZ is being developed in a quadripartite partnership between the Department of Trade, Industry and Competition (dtic), the Limpopo Provincial Government, Sekhukhune District Municipality and Fetakgomo-Tubatse Municipality.

The following cluster opportunities have been identified.

- a. Agro-processing
- b. Development of ICT infrastructure
- c. Mineral Beneficiation: Chrome, platinum group metals, iron ore and magnetite Development of platinum refinery
- d. Green Energy: Production of solar and biomass energy; Hydrogen energy from fuel cells as part of the South African Hydrogen Valley led by the Department of Science and Innovation
- e. Manufacturing: Production and refurbishment of batteries; Auto-catalysts, green energy automotive components and electric vehicles (manufacture and assembly); Trucking components; Mining machinery, equipment and components

# Progress on FTSEZ

The Fetakgomo-Tubatse Special Economic Zone received from the Limpopo Department of Economic Development, Environment and Tourism an allocation of R35-million (FY 2021/22) which was earmarked for the following activities and projects: District Skills Audit, environmental impact assessments (EIAs), township establishment (land rezoning), engineering designs and costing for the perimeter fence, site clearance, Eskom cost estimation and acceptance of quote, engineering designs for an Eskom switching station, water allocations (assessment of demand per industry), an Implementation Readiness Study and engineering designs. The whole R35-million is committed to the following projects, some which have been completed, some are being upgraded, some constructed newly, while others have been initiated.

- Steelpoort Wastewater Treatment Works (underway)
- Steelpoort Water Treatment Works (complete)
- Ga-Malekana Water Treatment Works (upgrade)
- R37 and R555 main roads (Underway).
- Steelpoort railway (Initiation phase.)
- Regional External Master Plan (Initiation phase).
- Steel Bridge upgrade (Initiation phase).
- SEZ human settlement scoping report

#### GAP Analysis of the FTLM Economy

- a. The unique selling benefits (USBs) of local heritage sites and other tourism facilities in the municipality are not effectively profiled and marketed.
- b. Tourism sector is being overshadowed by mining to the extent that more strategic focus is unevenly invested in the latter at its expense.
- c. Lack of a coordinated multi-sectoral vision and strategy to deliver the local economy from its traditional mining base into other equally critical sub-sectors.
- d. Absence of graded establishment hotels and modern airports to make the municipality ease-to- access by global tourists.
- e. Establishments are still registered under Mpumalanga Province which causes confusion to visitors searching places of stay in FTLM
- f. The Tourism Forum is at its infancy stage
- g. The Routes are not named nor marked for easy navigation by the tourists
- h. Poor emphasis in village Tourism expressed and strong bias towards traditional tourism products.
- i. Lack of tailor-made communication material and tourism marketing infrastructure
- j. Mining houses and mining operators source their input supplies and skills from far flung areas in Gauteng Province and also imports materials that would otherwise be manufactured in the area.
- k. Community riots/ protests
- I. High Unemployment Rate
- m. Recognition of Community Engagement Forums.
- n. Interference / dispute by royal houses during the implementation of projects by the mines
- o. Low Skills Base
- p. Environmental Degradation
- q. Poor beneficiation of the mineral resources
- r. The scourge of illegal mining that poses a major environmental and safety hazard.
- s. Mining is frequently used to express other developmental concerns
- t. Excessive dependence on mining sector for economic participation and employment

- u. The definition of 'local' by communities is frequently taken to the extreme
- v. Water use license
- w. Lack of skills and readiness in view of future mining (mechanization and Industry 4.0).

# 2.7. FINANCIAL VIABILITY

The Fetakgomo Tubatse Local Municipality (FTLM) has established a fully functional and effective Budget and Treasury Office (BTO) in line with chapter 9, section 80 of the MFMA. The Budget and Treasury Office (BTO) is the anchor office of the Municipality as it provides support to all departments of the Municipality. The primary role is:

- Dealing with the management of a municipal's funds and ensures financial sustainability for the institution.
- Providing strategic direction on financial planning, management and accounting as well as guidance and support to the senior managers within the Municipality regarding the implementation of and compliance with the Municipal. Finance Management Act and related Treasury Regulations. The Department is also responsible for the following:
- Establish/maintain an efficient and transparent system of financial management and internal controls to ensure sound financial control by developing, implementing and monitoring financial control systems;
- Establish/maintain appropriate policies, systems and procedures to ensure effective and efficient management of resources by maintaining updated financial guidelines and ensuring adherence to these policies & procedures;
- Prepare financial statements for each financial year in accordance with the generally recognized accounting practices by ensuring the production of financial reports of the Municipality as well as providing oversight and management of reconciliations of sundry and suspense accounts;
- Ensure that revenue and expenditure of the Municipality are in accordance with internal controls (budgets) and legislative prescripts governing finance within the Municipality by maximising revenue collections, optimising expenditure, monitoring cash flow as well as ensuring that expenditure is within allocation limits;
- Follow up on the implementation of actions resulting from Audit Committee and AuditorGeneral's reports by developing effective implementation strategy for implementation of corrective measures;
- Effective management of Supply chain management.

The Fetakgomo Tubatse Local Municipality (FTLM) has the following revenue sources: Property Rates, Refuse Removal, Licenses and permits, other sundry income and receive income from National Government for the Municipality to be able to perform its powers and functions in terms of section 152 of the Constitution of the Republic of South Africa. It is in this context that the National Government has to allocate some resources in a form of Grants for Municipalities to be able to render services.

All the expenditures incurred are generally in line with the approved budget in terms of section 15 of the MFMA and policies and procedures that governs expenditures management. The municipality complies with sections 65 and 66 of MFMA. Furthermore, the system of internal controls were established and maintained to ensure that there is no breakdown in business process and activities. Budget management was decentralised to the senior managers responsible for budget vote which means section 77 of the MFMA were complied with. All the

section 71 and 52 reports were submitted to Provincial Treasury and National Treasury as well as to Council and this are an indication of oversight mechanism hence the principle of transparency and accountability. Municipality has implemented supply chain management system which seeks to address all the underlying challenges within the sphere of supply chain or procurement level and the SCM policy has been successfully align with various circular on SCM issued by National Treasury. The Municipality has also established a new financial reporting Unit which will be responsible for Annual Financial Statement preparation and also adhere to reporting standards as mandated by National Treasury.

The municipality has also successfully implemented an asset register and is also complying fully with Generally Recognised Accounting Practice standards and the requirement of Municipal Budget Regulation and Reporting. Municipality have achieved 95% of MFMA compliance in terms of monitoring tool issued by National Treasury which means Municipality is MFMA compliant in terms of implementation. Municipality is working on 30 days turnaround time for processing procurement or tenders since procurement of goods and service equal service delivery, Municipality is working hard to make procurement to be efficient and effective in order to meet the objective of section 217 of the constitution. Municipality is focusing on contract management as part of key driver to success on monitoring of performance of service providers with an intention of ameliorating high level of inefficiencies such as unspent grants and poor performance by service providers. Liquidity committee has been established to ensure that the municipality approves a funded budget and all conditional grants are cash backed. The retention account is opened to side aside retention money held for completed projects. All the statutory reports were submitted to relevant authorities on time and key MFMA reports are required to be published in the municipal website in order to enhance transparency in line with section 75 of the MFMA.

The municipality use the following pillars as the measures of financial health:

- Operating expenditure as the percentage of cash;
- Creditors as percentage of cash and investments;
- Revenue as a percentage of debtors;
- Year in year increase in debtors;
- Overspending on operational budget and;
- Under spending on capital budget
- Cash Coverage

The robust internal control measures were put in place to ensure that sections 32 of MFMA expenditures are prevented or detected timeously and all the fruitless and wasteful expenditure as well as irregular. A checklist is developed to check compliance of all payments being made. Payment of creditors is does on a weekly basis to ensure that all creditors are paid timeously. Strict budget monitoring mechanics are in place to ensure that the municipality utilise appropriate line items in the budget. Due diligence on all tenders is done to ensure compliance. Proper documents management and record keeping is also in place.

Section 21 of the constitution of the Republic of South Africa, 1996 provides that national legislation must prescribe measures to ensure transparency and expenditure control in each

sphere of government by introducing generally recognised accounting practice, uniform expenditure classifications and uniform treasury norms and standards.

Municipal Regulations on Standard Chart of Accounts (mSCOA) to non-pilot municipalities in preparation for full mSCOA compliance. The municipality is in a process of implementing mSCOA which will provide a uniform and standardised financial transaction classification framework. Essentially this means that mSCOA prescribes the method and format that municipalities and their entities should use to record and clarify all expenditure (capital and operating), revenue, assets, liabilities, equity, policy outcomes and legislative reporting. Although the municipality is not fully compliant with mSCOA, a road map is developed with key milestones to ensure compliance in future. The mSCOA committee has re-established and will be fully functional.

The mSCOA Benefits for the Municipality are:

- Accurate recording of transactions therefore reducing material misstatements
- Reduce the month/year end reconciliation processes and journals processed
- Improve quality of information for budgeting and management decision making
- Improve oversight functions by council as the required information will be tabled for policy decisions, tariff modelling and monitoring.
- Ensure alignment and implementation of the IDP as all expenditure, both capital and operating will be driven from a project.
- Improve measurement of the impact on service delivery and the community.

### 2.7.1. Grants received by Fetakgomo Tubatse Local Municipality (FTLM)

Section 214(1) of the Constitution of the Republic of South Africa, 1996 requires an Act of Parliament to provide for the equitable division of revenue raised nationally among the National, Provincial and Local Spheres of Government and any other allocation to Provinces, Local Government or Municipalities from the National Government's share of revenue, and conditions on which those allocations may be made. The Fetakgomo Tubatse Local Municipality (FTLM) has established a fully functional and effective Budget and Treasury Office (BTO) in line with chapter 9, section 80 of the MFMA. The key role of BTO is to carry out Revenue, Expenditure, Assets and Liability (REAL) as well as the strategic financial advice to both the senior management and the Council.

## 2.7.2. Liquidity ratio

| 2021/2022 | 2022/2023 |
|-----------|-----------|
| 1.97      | 1.82      |

### 2.7.3. Cost Coverage

| 2021/2022 | 2022/2023 |
|-----------|-----------|
| 0.54      | 0.50      |

## 2.7.4. Current Financial Position and Sustainability

- Cash coverage ratio at 1 to 3 months
- Collection rate 75%
- Municipal assets as valued at R 3 387 022 539.35.

FTLM is currently undergoing verification of and accounting for the municipal assets arising from the Social and Labour Plans (SLPs) between the mines and the municipality that were not previously handed over to the municipality. This will ensure:

- Completeness of all SLP capital expenditure to be transferred to the municipality's asset register for audit purposes,
- that the municipality's financial statements are a true reflection of the financial position at the reporting date,
- SLP assets are included in the municipality's maintenance plan,
- Overall enhancement of the wellbeing of the communities which are host to the mining operations, the mine's major labour-sending areas, and mine employees as envisaged in the MPRDA Act Section 23(1)e).
- Indirect funds which are in the loop to assist the development of Fetakgomo Tubatse in the future are as follows:
- Neighbourhood Development Partnership Grant (NDPG)
- Municipal Systems Improvement Grant (MSIG)
- Rural Roads Asset Management System Grant (RRAMSG)
- Integrated Skills Development Grant (ISDG)
- Informal Settlement Upgrading Partnership Grant (ISUPG)

## 2.7.5. Audit Action Plan and Audit Outcome Verification

| 2020/2021   | 2021/22   | 2022/23     | 2023/24     |
|-------------|-----------|-------------|-------------|
| Unqualified | Qualified | Unqualified | Unqualified |

Status on the Verification of the Audit Outcomes

FTLM obtained an unqualified audit opinion for the 2023/24 financial year.

#### Summary of the progress on the implementation of Audit action plan

## 2.8. Basic Service Delivery and Infrastructure

### 2.8.1. Infrastructure And Services

To effectively build a developed platinum city for sustainable human settlement, FTLM commits to work tirelessly to improve the condition of Basic Service Delivery and infrastructure development in the following Key development areas:

- Water and sanitation.
- Road's infrastructure and Storm Water Management Systems. Energy supply and management.
- Engineering services for Housing.
- Waste Management.
- Public transport.
- Telecommunication.
- Sports Facilities and
- Community enhancement projects (Civic center and libraries).

Service delivery is a stimulus for economic growth and inclusion. The growth and realization of the pursued Developed platinum City begins with sufficient delivery of services under the afore mentioned key development areas. FTLM has conducted a situational analysis to help council and management understand the extent of service delivery backlog within the municipal boundaries and for the municipality to sufficiently develop an infrastructure projects pipeline and to seek to expand our revenue base to meet the increasing demands which currently constraints our limited resources.

### 2.8.2. Power and Electricity

Eskom is the license holder for electricity distribution in Fetakgomo Tubatse Local Municipality. The Municipality aims to obtain a distribution license to ease electricity distribution to local households and ultimately resolve the Electricity Capacity Constraints issues in FTLM.

The Municipality has signed a MOU with The Housing Development Agency for development of Townships and RDP housing. HDA is a housing development authority in FTLM. It is worth noting that the Municipality is faced with the highest amounts of backlogs in almost all areas of development and strategic measures are being put in place to fight this pandemic.

Eskom has initiated some Bulk Energy projects which will make available capacity to connect most of the households which are in need of electricity connection. The following table summarizes the status of capacity availability across the municipality.

| Network Capable households | Under Construction | Pre-CRA (Design<br>stage) | No Response (Not<br>covered) |  |
|----------------------------|--------------------|---------------------------|------------------------------|--|
| 10 461                     | 18 657             | 1 667                     | 3 345                        |  |
| 34 130                     |                    |                           |                              |  |

The Current Eskom Capacity can connect a total of 10 461 households and other bulk infrastructure projects are underway to unlock capacity to for 18 657 in the wards mentioned below:

| VILLAGES                            | WARD(S)    | NO OF<br>CONNECTIONS | FEEDER<br>NAME     | PROJECT NAME             | STATUS       |

|-------------------|--------|--|--|--|
|-------------------|--------|--|--|--|

The municipality has taken significant steps towards obtaining an electricity distribution license from NERSA (National Energy Regulator of South Africa) for specific areas (Extension 54, 58, 71, 72, and Mashifane Park, among others). Here's a breakdown of the situation and next steps:

#### Current Status:

- 1. Application Submitted to NERSA The municipality has applied for a Brownfields distribution license.
- 2. **Public Participation Process** NERSA requires public consultation as part of the licensing process. This allows stakeholders and residents to raise concerns or objections.
- 3. Anticipated License Approval The municipality expects NERSA to grant the license in the third quarter of the 2025/26 financial year.

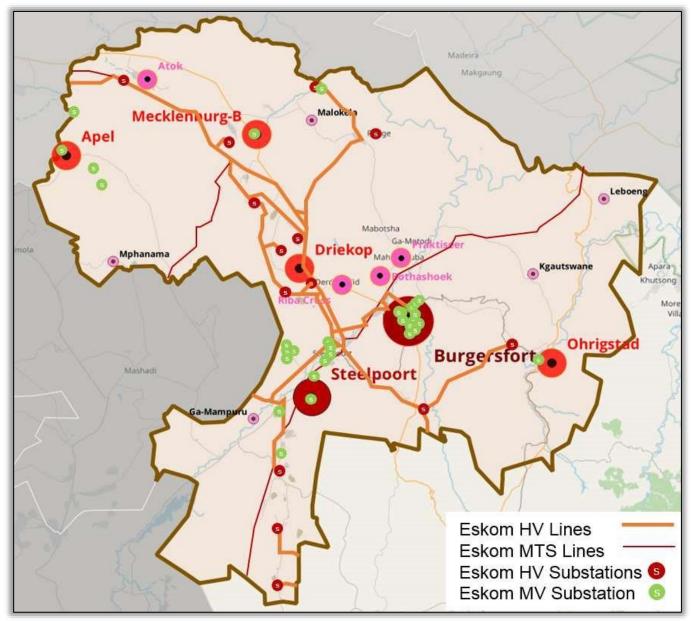

#### Infrastructure & Budget:

- Extensions 54, 58, 71, 72 Infrastructure is already complete.
- Bulk Connection Budgeted (2025/26 FY) Funds have been allocated for the bulk electricity connection, but work will only start after NERSA grants the license.

#### Next Steps:

- 1. Monitor Public Participation Feedback Any objections or delays in this phase could affect the timeline.
- 2. **NERSA's Decision** If approved, the municipality can proceed with bulk connections.
- 3. **Project Implementation** Once licensed, the municipality will energize the completed infrastructure and begin supplying electricity.
- **1** Potential Challenges:
- **Delays in NERSA Approval** Regulatory processes can sometimes take longer than expected.
- **Community Objections** If residents or businesses raise significant concerns, NERSA may require further consultations.
- Eskom or Current Supplier Transition If Eskom or another entity currently supplies these areas, a smooth handover must be negotiated

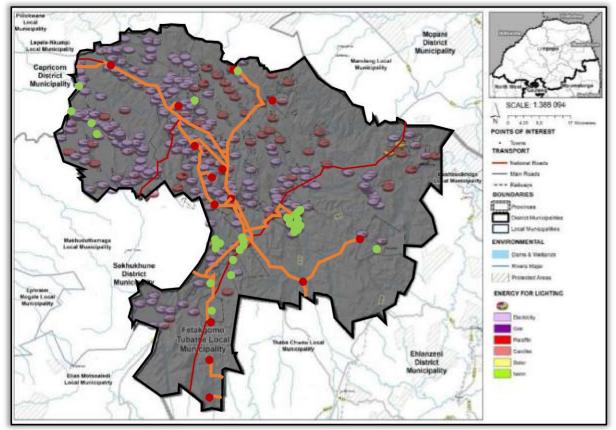

The main electricity network is concentrated along the primary road network (R37 and R555) and is mostly intensely concentrated within and around the Burgersfort and Steelpoort regions.

Source: LED Strategy Status Quo 2021

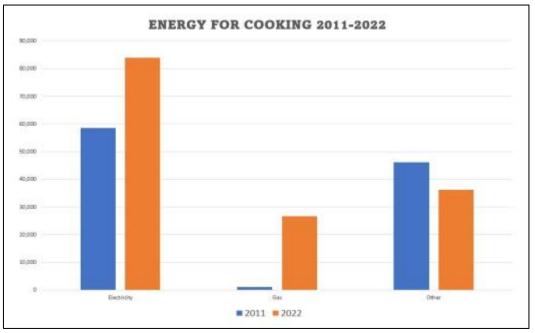

This does (again) raise concerns from the settlements that have been spatially separated due to sprawl being further limited in terms of investment opportunities but also low-income individuals who could be increasingly driven to set up illegal connection in order to gain access and straining the infrastructure as it receives less maintenance due to a lack of fiscal capacity.

## The map below indicates the electricity lines that exist within the municipality and the energy used for lighting:

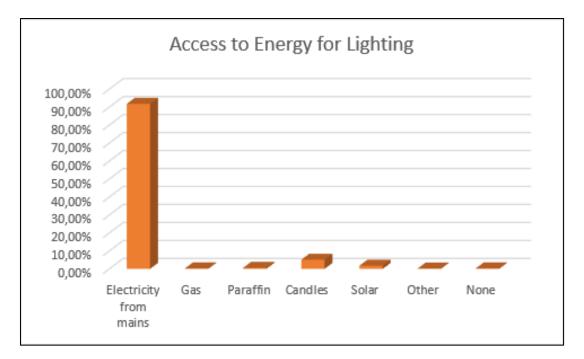

Source: FTLM Spatial Development Framework 2020

The figure below shows that the majority of households have access to electricity for cooking. This shows a steady increase from 2011-2022

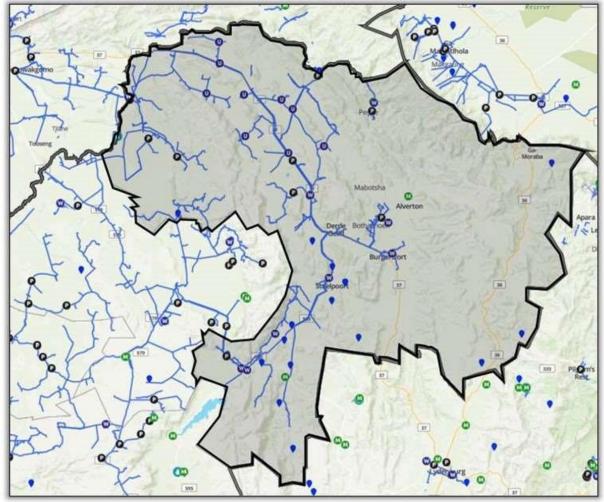

Source: Statistics South Africa Census, 2022

The figure below shows that the majority of households uses electricity for lighting and very few uses candles.

### 2.8.3. Water and Sanitation

The Sekhukhune District Municipality is the water authority responsible for bulk water supply and reticulation and Sanitation management. FTLM has a role of identifying water backlogs and sanitation challenges in its area of jurisdiction, liaising with the district municipality, and facilitating the service delivery.

The map below indicate the major water infrastructure within FTLM:

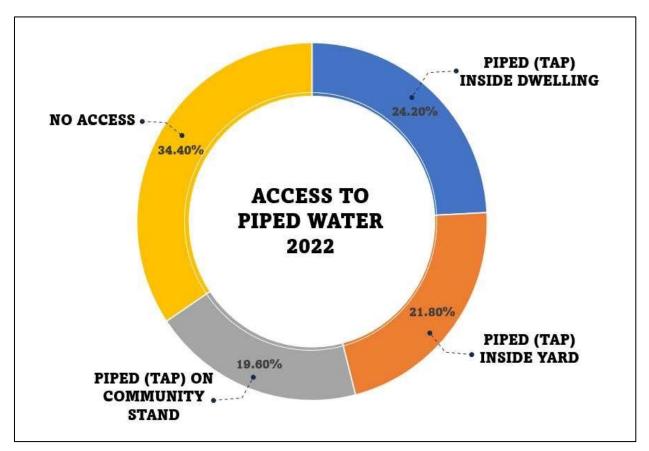

Source: LED Strategy Status Quo 2021

The water infrastructure in the municipality (as expected) is concentrated around the R37 and R555 roads.

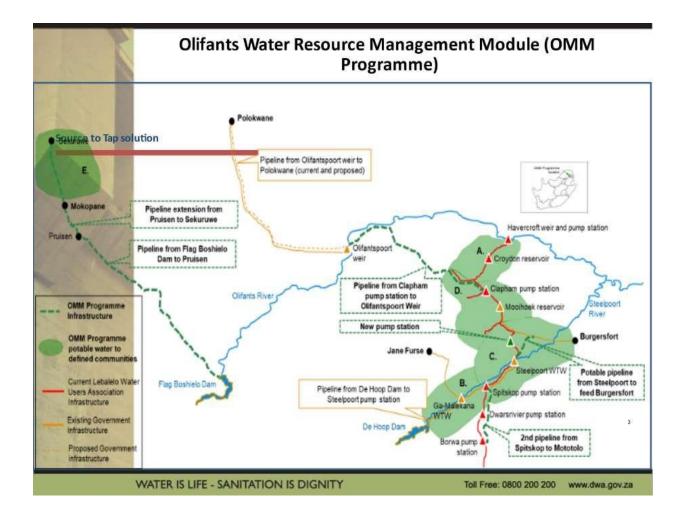

Roughly 1/3<sup>rd</sup> of the population (36%) does not have access to water, and this is likely from the large swaths of the municipality where the water infrastructure does not extend and, on a larger scale, South Africa being a generally water scarce country. There has also been a lack of operation and maintenance of water infrastructure due to a decrease in fiscal and labour capacity which leaves the infrastructure in the, relatively, well serviced

areas unable to handle the large influx of people looking for work opportunities and services.

The figure below shows that 34.40% have no access to piped water, 24.20% have access to piped water inside dwelling, 21.80% have access to piped water inside yard and 19.60% have access to water on communal stand.

Source: StatsSA Census 2022

FTLM must engage Lebalelo Water Association and SDM in consultation with the OMM to avoid failures associated with attempts to export raw water through dry villages.

## 2.8.4. Water Challenges or Backlog

The table below gives a picture of challenges from ward 1 to 39 in terms of accessibility of water in the municipality.

| WARD NO | CHALLENGES OR BACKLOG   |
|---------|---|
| 01      | <ul> <li>Maepa Need reservoir and water pipes extensions to Ramakgae section</li> <li>Maintenance of Ohrigstad Resvevoir and old infrastructure</li> <li>Need boreholes and pipes at Pureplaas</li> <li>Mokutung no underground water community can benefit from the neighboring farms</li> <li>Mapareng need addition boreholes with pipes extension and connect to Moshate</li> <li>Malaeneng need electrification of the borehole with pipes extensions</li> </ul> |

The table below indicates the list of the current status of Wastewater Treatment Works:

| LOCATION    | TYPE         | PRESENT CAPACITY | REQUIREMENT                         |
|-------------|--------------|------------------|-------------------------------------|
| Burgersfort | Conventional | 1.5Ml/day        | Increase capacity                   |
| Praktiseer  | Ponds        | 0.4Ml/day        | Increase capacity                   |
| Penge       | Conventional | Dysfunctional    | Must be revitalised                 |
| Ga-Mapodile | Ponds        |                  | Increase capacity                   |
| Ohrigstad   | Septic tanks |                  | Construction of new sewerage system |
| Steelpoort  | Conventional | 0.5ml/day        | Increase capacity                   |

The figure below shows that the majority of households uses pit toilets for sanitation. 23,70% uses flush toilets.

Source: StatsSA Census 2022

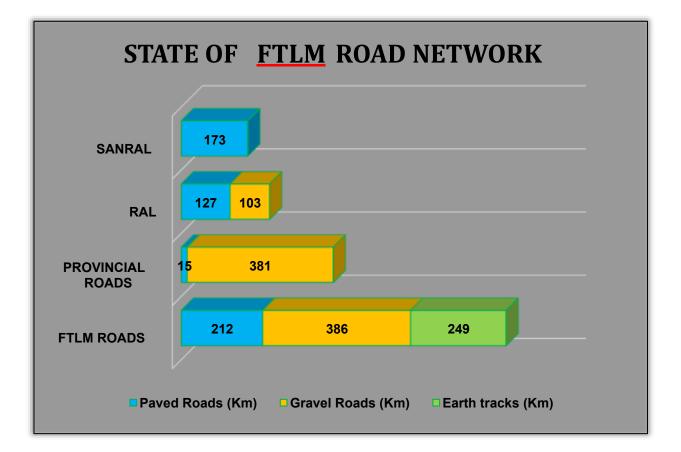

The figure below shows that most households use other means of sanitation. These could be pit latrines with or without ventilation. There is a steady increase in households that have access to flush toilets and a decrease in households that have no access to sanitation.

### 2.8.5. Roads and Storm Water

Two-thirds (68%) of the municipal roads remain unpaved, with 53% being gravel roads and 15% only being earth tracks.

The Special Economic Zone and the Presidential Special Package initiatives necessitate a need for the Municipality, Road agency Limpopo, and South African Road Agency to start prioritising the **widening and upgrading of the D4190 Pelangwe to R37**, **R37 road** (Polokwane to Burgersfort), and the **R555 road** (Middleburg to Burgersfort).

A master plan for all above bridges is underway. The Municipality intends to raise funds through BFI to reduce the mentioned backlog. An MOU between FTLM, RAL, and Department of Public Works will need to be signed for a joint approval of the Access bridges project. Urban Road Network.

The Municipality has started with a master plan for Integrated Urban roads Master Plan. The Master plan seeks to find a solution for the traffic jam in Burgersfort, Steelpoort, and Apel Cross. The following new road network will be built in Burgersfort Town.

Some of the main roads within FTLM in bad condition:

# THE INTERGRATED URBAN MASTER PLAN BURGERSFORT

# **OHRIGTAD PLANNED ROADS**

#### 2.8.6 Expanded Public Works Programme (EPWP)

FTLM have established a new Unit namely, EPWP to address the issue of unemployment which escalates poverty level in the area. The Programme (EPWP) is a National Programme which commenced in 2004 aiming at reducing poverty by creating temporary work opportunities. The initiative was launched by the National Government of South Africa to address prevailing poverty, inequality and unemployment. The said programme is linked to government expenditure in selected sectors and has currently entered its 5th year phase in April 2024 operating in four Sectors namely, Infrastructure; Environment & Culture; Social and the Non-State. Nationally the overall coordinator of the Programme is the Department of Public Works and Infrastructure (NDPWI). Provincially, the Limpopo Department of Public Works, Roads and Infrastructure (LDPWRI) is responsible for coordination and monitoring of the EPWP Programme whilst the public bodies ie departments and municipalities are implementors of the programme guided by the EPWP Ministerial determination.

The municipality signed the Integrated Grant (IG) Agreement with National Department of Public Works, Roads and Infrastructure for 2024/2025 financial year. All projects within the grant agreement fall under Social and Environment & Culture Sectors. Projects that have been identified for implementation through the grant include Waste Management, Parks and Beautification, Cleaning of municipal and community facilities, EPWP Traffic Wardens, and EPWP Data Capturer. A total of ninety-two (92) work opportunities (WO's) were created through the allocation that was made available for the current year. Over and above, the municipality managed to create thirty-three (33) work opportunities under the two sectors through own funding. Projects created under this include waste collection, operation and management of the landfill site, and cleaning service and maintenance of open spaces.

Under Infrastructure Sector, the municipality has created work opportunities (WO`s) through Municipal infrastructure Grant (MIG), Integrated National Energy Programme (INEP), and Neighborhood Development Partnership Grant (NDPG).

| Infrastruc<br>Sector | ture     | Environmer<br>Sector | nt & Culture | Social Sector   |    | Annual<br>Target | Progress | %   |

# 2.9. COMMUNITY DEVELOPMENT

# 2.9.1. Waste and Environmental Management Services

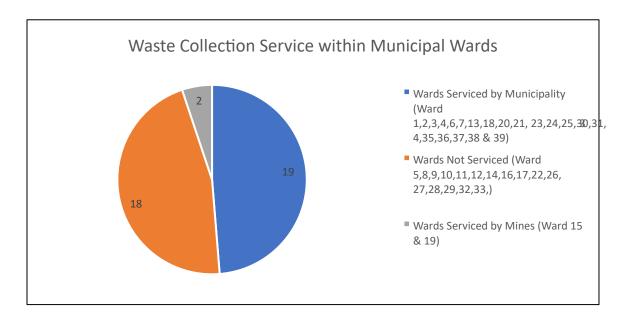

#### Waste Management

Fetakgomo Tubatse Local Municipality is responsible for provision of refuse removal and disposal services as conferred by Schedule 5 Part B of the Constitution of Republic of South Africa. Section 24 of the Constitution obligates the municipalities to take reasonable legislatives and other measures to prevent pollution and ecological degradation, promote conservation and secure sustainable development and use of natural resources while promoting justifiable economic and socialdevelopment.

Waste management services in FTLM involve environmental awareness and education, recycling initiatives, waste collection, clearing of illegal dumps, storage, transportation, disposal of general waste as well as monitoring, enforcement of by-laws and relevant legislations. The services are intended to eradicate illegal disposal of waste, the deleterious effects of waste on human health and the natural environment. However, the municipality still experiences unauthorized disposal of waste, especially in areas that are not receiving waste collection, along main roads, open spaces, and informal business outlets.

The municipality has an Integrated Waste Management Plan (IWMP) which was endorsed by the MEC of Limpopo Department of Economic Development, Environment and Tourism on the 02 February 2024 and is aligned to municipal planning documents including the Integrated Development Plan (IDP). FTLM is conducting waste management awareness and cleanup campaigns within its jurisdiction, and construction of New Burgersfort landfill Site in the Burgersfort Area is underway. In adherence to Section 22, 24 & 26 of National Environmental Management Waste Act No. 59 of 2008 (Waste Act), Fetakgomo Tubatse Local Municipality is rendering waste collection services, waste awareness and education, street cleaning, clearing of illegal dumping and waste disposal activities. Waste collection service is provided to businesses, governmental institutions and households within its jurisdiction and in accordance with waste collection standards. The waste management collection is rendered in both rural and urban areas through contracted and in-house services provision methods.

Skip bins are mostly utilized in rural areas/ villages whilst household collection method is employed in mostly urban areas as reflected in the chart below.

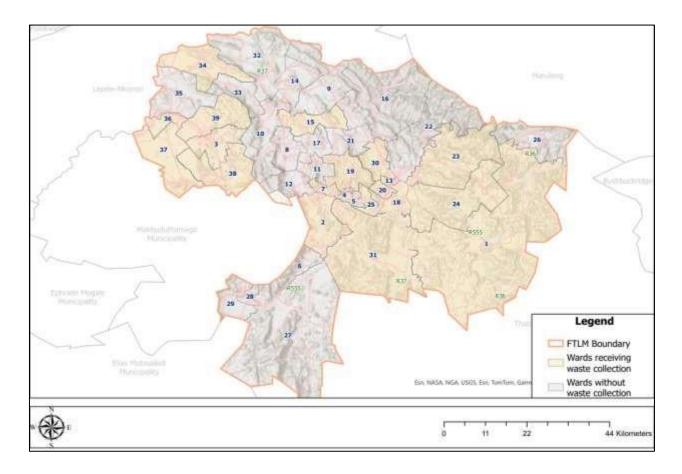

The municipal wards receiving waste collection by the municipality is at 49% whilst 5% is for the areas that are being serviced by the mines. Almost 46% of wards are not receiving waste collection.

Kerbsite/Skip bins are placed at strategic points in the following areas:

| NO | AREA                      | WARD NO      | Rural/Urban |
|----|---------------------------|--------------|-------------|
| 1  | Burgersfort               | Ward 18 & 31 | Both        |
| 2  | Bothashoek                | Ward 20      | Rural       |
| 3  | Gowe and Mooihoek         | Ward 7       | Rural       |

| 24 | Ohrigstad                      | Ward 01    | Urban |
| 25 | Mpahanama                      | Ward 37    | Rural |
| 26 | Atok                           | Ward 34    | Rural |
| 27 | GaMakofane                     | Ward 21    | Rural |
| 28 | GaMampuru                      | Ward 06    | Rural |

# The figure below indicates waste removal within FTLM:

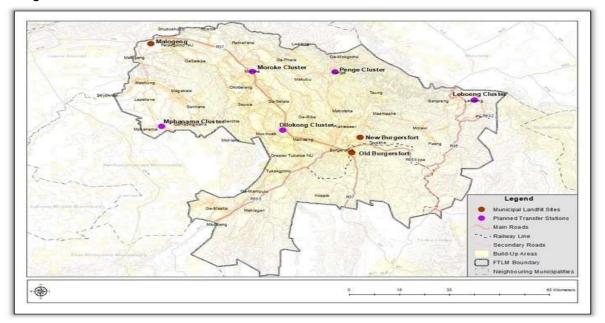

46% of the municipal wards do not have access to waste removal as compared to 54% of the wards which are mostly located along the main movement network. This is likely due to dispersed settlement patterns amongst other reasons.

The charts below from Stats SA community survey 2022 projects the municipal waste collection in 2022 as follows:

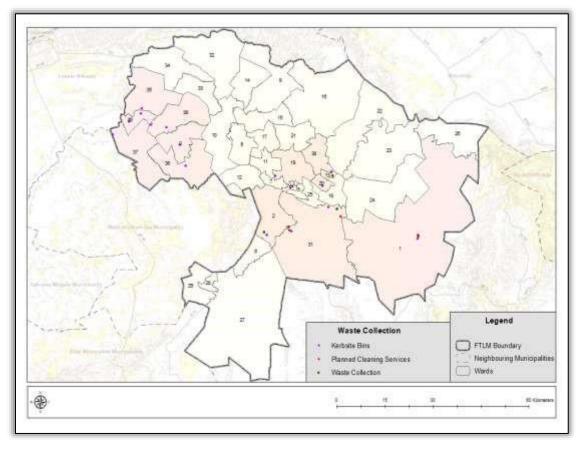

There's however been an improvement of 8% in the previous 2 years.

The figure below shows municipal landfill sites (old and new) in Burgersfort and the other one in Malogeng. All these landfill sites are glass B landfill sites for general waste and licensed; Malogeng landfill site license number :12/9/11/P67, Old Burgersfort landfill site licence number: 12/4/10/8-A/14/S10 and New Burgersfort landfill site license number is 12/4/10/8-B/8/S1. The planned transfer stations are located in Penge and Mphanama and designs for development are being finalized.

The figure below shows the areas where households & kerbside/skip bins waste collection is undertaken.

The backlog in waste collection is experienced in informal settlements next to mining activities and in villages. The municipality has given much focus on the cleaning of towns to improve environmental management and promote local economic development. The cleaning of town projects are being implemented in Burgersfort, Steelpoort, Ohrigstad and Apel.

Fetakgomo Tubatse Local Municipality is dominated by mining industries which generate voluminous amount of waste. Mines have sub-contracted private companies to collect and dispose waste on their behalf. General waste is disposed of at municipal landfill site whilst hazardous waste is being transported outside the municipality. Volumes of general waste disposed at municipal landfill site is at average of 1500 tons per month. Illegally disposed waste is a predicament to the institution and the municipalitu has since came up with a long term solution to establish landfill site in Burgersfort and Transfer Stations at areas which have high generation of waste.

# 2.9.2. Environmental Management

#### Climate Change and Adaptation

The Municipality has developed climate change and adaptation strategy in 2023/24 fincial year. The strategy identified causes and effects of climate change and ways to adapt to the changes of climate. The municipality is characterized by high mountainous terrain, so development occurs in valleys and dispersed settlements, especially in the northern regions. Climatic conditions in FTLM may be sub-tropical, making it favourable for agricultural activities. Summers are mainly humid with hot temperatures, often reaching over 35°C between October and March. On the other hand, during the winter months, warm temperatures are experienced during the day and tend to be cool to cold at night and in the early morning. Rainfall patterns in FTLM are already highly variable in seasonality and location.

Generally, rainfall occurs in late summer (around February) but tends to be unpredictable. As a result, annual rainfall varies across the municipal area. The north-eastern regions receive more than 1000 mm on average, while the eastern and southern areas receive between 601-1000 mm per year. The more significant central and western regions receive approximately 401-600 mm of annual rainfall. The highly variable rainfall in FTLM may threaten various socio-economic activities and livelihoods, such as rain-fed crop production. Approximately 80% of land cover within the FTLM is natural, comprising bushveld, woodlands and grasslands.

The low-lying areas, such as Burgersfort and Steelpoort, support the most fertile soils in the municipal region; these are deep, well-drained and good-quality sandy/loamy soils which are mostly suitable for agricultural production (EbA concept note, 2022). The heatwaves are experienced in summer and drought in winter. As part of adaptation process to the effects of climatic conditions, the municipality continues to conduct mass planting of trees and in the previous year planted over 2000 indigenous trees. Solar car ports have been installed at its head office in Burgersfort where as in all corporate facilities of the institution, solar panels are installed in the rooftop of the buildings. The solar panel are a source of renewable energy to minimize the use of direct energy from Eskom and safe to the environment whilst minimizing the cost to buy electricity.

#### Air Quality Management

There are two air quality monitoring stations within Fetakgomo Tubatse Local Municipality which are managed by Sekhukhune District Municipality (SDM) and Limpopo Economic Development Environment and Tourism (LEDET). The stations are located at Mapodile and Moroke areas. SDM is currently the regulatory authority responsible for issuing atmospheric emission license and monitoring the sites. The municipality has noise measuring devices to measure disturbing noise and noise nuisance to ensure enforcement in line with the gazette noise control by-law. The air quality management plan and by-law are still at a draft stage. Air pollution is also an issue in the municipality, largely due to mining activities which are concentrated in Burgersfort which has been identified as a Special Economic Zone (SEZ), and has several platinum and chrome mines, and other associated industries (LEDA, 2017). As such, Burgersfort and surrounds has been listed under the Department of Environmental Affairs and Tourism (DEAT)'s list of air quality hotspot sites due to the presence of these mines (LEDA, 2017). Mined minerals are transported along provincial roads, which creates a high volume of traffic along these routes, hence exacerbating the air quality issue in the region.

#### Biodiversity

The municipal area is home to abundant wildlife, bird species, flora, and important aquatic and terrestrial habitats, including rivers as well as wetland systems. According to the Greater Sekhukhune District's Spatial Development Framework (SDF, 2018), the northern and northeastern regions of FTLM have a high occurrence of Red Data species and Key Vegetation Communities. However, this presents a problem as these areas, particularly around Steelpoort, are characterised by large human settlements and mining activities. FTLM as part of SDM is characterised by severe erosion and degradation for several reasons, including the dispersed nature of the region. To maintain the natural environment, there are 15 national nature reserves within the municipal borders. The nature reserves are predominantly concentrated around the northern and eastern regions. In addition, the Kruger to Canyons Biosphere, a prominent biodiversity conservation area in South Africa, crosses the northern border.

#### Disaster and Risk management

Disaster Management business unit gets their existence from Chapter 04 of National Disaster Management Act No: 57 of 2002. The Act provides for an integrated and coordinated approach to disaster management in municipal area with special emphasis on prevention and mitigation by departments and other internal units within the administration of the municipality as well as other role-players involved in disaster risk management in the municipal area. It requires capabilities to

manage risk on an ongoing basis and to effectively anticipate, prepare for, respond to, and monitor a range of natural and other hazards.

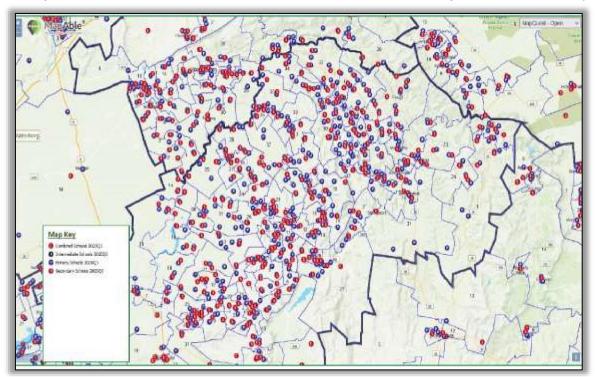

The municipality is prone to drought, floods, heat waves and fires which has seen the municipality having an approved Disaster Management Plan to can guide interventions and adaptations. The municipality's riverine systems suffer from degradation due to pollution, which is largely caused by upstream agriculture, mining activities and industrial discharges (Limpopo Economic Development Agency [LEDA], 2017). The Steelpoort river, which flows through the northern area of the municipality has been especially degraded due to current and historic agricultural activities as well as infrastructure (LEDA, 2017).

In addition to mining, agriculture is a significant economic activity and land use in the FTLM (LEDA, 2017). This land use is largely concentrated in the region's flatbottomed valleys, which consists of extensive community crop farming, with majority of the FTLM community relying heavily on subsistence farming, which is threatened by erratic rainfall due to climatic change conditions. In addition to this, landscapes have been extensively degraded and cleared of vegetation due to extensive agriculture, the construction of bulk water pipelines, industrial infrastructure and brick manufacturing activities (LEDA, 2017). This is especially an issue along riverine systems, with riparian vegetation being cleared for wood or degraded due to overgrazing from free-roaming livestock which serve as a livelihood for the FTLM's rural communities (LEDA, 2017). The LEDA Strategic Environmental Assessment (SEA) Report (2017) recommend implementing aquatic impact buffers along the main stem of the Steelpoort river in order to prevent the impact of these various land uses on river quality. Buffer areas are provided for residential, commercial, transport, infrastructure, industry and sewage treatment works. It is proposed that these activities and developments are set back from the river.

# 2.9.3. Social Facilities

#### Education

There are combined, intermediate, primary and secondary schools within FTLM jurisdiction in as far as schools are concerned.

The figure below shows the distribution of educational facilities throughout the municipality.

The table below shows the total number of educational facilities in the municipality:

| Descriptions               | Totals |
|----------------------------|--------|
| Combined School- Private   | 8      |
| Combined schools- Public   | 1      |
| Primary Schools - Public   | 232    |
| Secondary Schools- Public  | 122    |
| Secondary Schools- Private | 02     |
| Higher Institutions        | 2      |
| Special school             | 1      |
| ECD Centres                | 250    |

The municipality has conducted a need assessment on educational facilities in various wards as provided below.

| WARD NO | SCHOOL INFRASTRUCTURE NEEDS BY TYPE  |
|---------|--|
| 01      | Need a secondary school at Maepa<br>Mareologe primary at Ga-Mabelane need renovations. Mokutung<br>Primary also need renovations |

| 38 | Secondary at Mashilabele and Primary at Manoge/Matlou  |  |  |  |  |

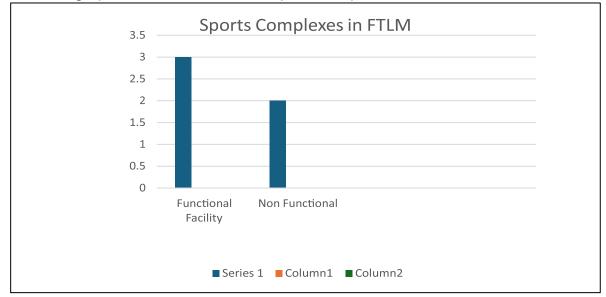

## Library Services

There are five(05) public libraries of which four (04) are municipal-owned whilst one (01) is owned by the Limpopo Department of Sports, Arts and Culture. The library facilities are situated in Apel, Atok, Mapodile, Ohrigstad and Burgersfort and are at varying levels of functionality. These facilities are predominantly in towns and townships except for Atok and Apel Public Library which makes accessibility difficult in terms of travelling distances. Besides the five functional libraries, there are two municipal- owned which are still under construction, namely, Praktiseer and Makua libraries. Twickenham Platinum Mine is also constructing a library at ga-Kgoete which will be donated to the municipality upon completion.

| N0. | FACILITY<br>NAME       | ADDRESS          | WARD | STATUS                   |
|-----|------------------------|------------------|------|--------------------------|
| 1.  | Burgersfort<br>Library | Burgersfort town | 31   | Operational              |
| 2.  | Mapodile<br>Library    | Mapodile         | 02   | Operational              |
| 3.  | Ohrigstad<br>Library   | Ohrigstad town   | 01   | Operational              |
| 4.  | Atok Library           | Atok             | 34   | Not functional           |
| 5.  | Makua Library          | Makua            | 29   | Still under construction |
| 6.  | Praktiseer<br>Library  | Praktiseer       | 13   | Still under construction |

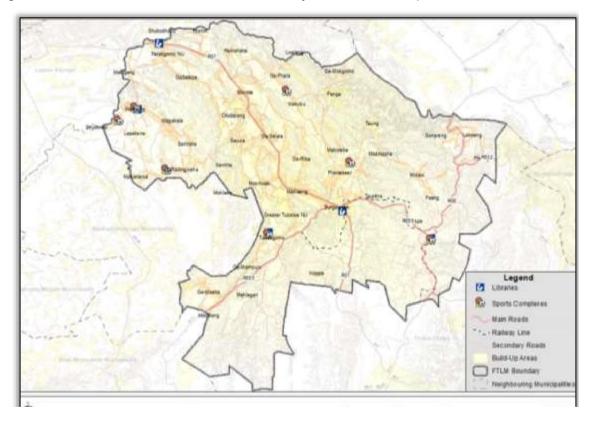

The table below indicates the municipal-owned libraries:

There are sporting amenities in the Municipality at varying levels of functionality. Mapodile, Radingoana and Motodi sports complexes are functional whilst Mashung and Ohrigstad are yet to be completed.

Below is the graphic illustration of FTLM sports complexes:

The figure below shows the distribution of library services and sports facilities.

#### Health

HIV and AIDS is increasingly becoming a major public health problem and accounting for the highest number of deaths in the country. Statistics already indicates that one out of five people is HIV positive. Apart from addressing preventative and curative approaches it is important to address social conditions aggravating the vulnerability of communities to HIV and AIDS, such as poverty especially among rural women. Linkages between community care and support services and health facilities should be developed to ensure holistic approach to the handling of the epidemic.

Dependency ratio will increase dramatically in the short term and decline in the medium to long term (10 to 15 years) source: The Impact of HIV and AIDS on Planning Issues is enormous as the change of demographics is rapid and unpredictable. The Town and Regional Planning Commission Report indicates that the number of orphans will increase resulting in children headed households. This is already a problem especially in housing with an increase in children headed households.

The economy will be affected negatively as the household income will increasingly be spent on medical costs initially, and finally resulting in loss of income. In order to fight against this pandemic HIV and AIDS, FTLM has developed local HIV and AIDS response strategy to appropriately address the pandemic.

There are collaborative efforts from the Non-Governmental Organisation (NGO) community that assists the municipality in curbing further spread of the pandemic in this local sphere. Their scope includes heightening awareness through campaigns, HIV counselling and testing (HCT), ARV provisions and referrals.

The Municipality has a functional Local AIDS Council that drives the implementation of Local HIV/AIDS and TB response strategy in the local sphere. It has also moved into the establishment of Ward Based AIDS councils in all municipal wards.

| 38   | None  | None                                     | Jane Furse                                  | No clinic the entire ward  |

Almost 50 000 beneficiaries are benefiting from various kinds of social grants as projected by the table below:

#### Social Grants beneficiaries 2023

| Local Type | Number of Beneficiaries | Number of Children |
|------------|-------------------------|--------------------|
| Apel       | 16 729                  | 44 079             |
| Leboeng    | 4 199                   | 12 917             |
| Moroke     | 10 554                  | 38 773             |
| Praktiseer | 19 136                  | 75 051             |
| Total      | 50 136                  | 170 820            |

There is a comparatively slight improvement margin on various categories of crime, however, illegal mining is a thorny issue in the municipality which is typical of all mining towns in the country. The situation is compounded by issues of sand mining, illegal gambling and gangsterism in schools. The Municipality in collaboration with relevant authorities are manning various structures

like Community Safety and Community Policing Fora (CSF and CPF) to promote general safety within the municipal jurisdiction. The picture below depicts a comparative crime stats.

# Safety and security

| STATUS OF LOCAL CRIME  |      |      |      |  |  |  |
|--|------|------|------|--|--|--|
| Apel, Burgersfort, Driekop, Mecklenburg, Leboeng,<br>Tubatse and Ohrigstad | 2021 | 2022 | 2023 |  |  |  |
| Total Contact Crimes   | 596  | 550  | 503  |  |  |  |
| Total Sexual Offences  | 49   | 52   | 43   |  |  |  |
| Total Contact-Related Crimes   | 132  | 170  | 132  |  |  |  |
| Total Property-Related Crimes  | 336  | 311  | 250  |  |  |  |
| Total Other Serious Crimes   | 330  | 379  | 343  |  |  |  |

| Total Crimes Detected as a Result of Police Action                         | 99   | 251  | 223  |  |  |  |

SAPS, 2023

The municipality has a security management business unit which is responsible for total security function being personnel security, security technologies, physical security etc. There are forty three (43) security sites. The main purpose for the existence of security business unit is to safeguard municipal assets and employees. There is a planned move towards creation of investor and tourist-friendly town through installation of CCTV cameras in Burgersfort, Steelpoort and Ohrigstad. The municipality is yet to amplify security technologies such as alarm systems, CCTV cameras and biometric systems in all its regions.

#### List of security sites

| NAME OF SITE                           | WARD |
|--|------|

#### **Public Transport**

The Department of Transport and Community Safety (LDoT) is the public transport authority. The Sekhukhune District Municipality helps in respect of transport planning. As a challenge/backlog there is inadequacy of public transport in some areas within Fetakgomo Tubatse Local Municipality (FTLM). According to the norms and standards, public transport access should not be more than 10 minutes' walk. The dominant modes of public transport within Fetakgomo Tubatse Local Municipality (FTLM) are buses and taxi.

The envisaged plan will the modes of transport found in the area, via, railway and road transport. The road transport is the common public transport to provide service to the community in remote areas, i.e. buses (Greater North Transport) and mini-taxis. It also serves as the mode to transport raw materials to and from the mines including agricultural products. The route utilization survey recorded 405 taxi vehicles and 18 Great North Transport buses

Unregulated and influx of mini-taxis operating as metered taxis within the Burgersfort and Steelpoort areas are posing a threat to road users as majority of them are not road-worthy. The survey also showed a high volume of weekend operations to transport shoppers from rural hinterlands to Burgersfort. The taxi route survey showed that there were 71 taxi and bus routes in FTLM but in this survey the outward bound and inward bound route were individually identified.

These routes virtually penetrate all the villages around the urban centres of Burgersfort, Steelpoort and Ohrigstad. The spatial structure particularly the radial nature of public transport into and from Burgersfort town sees this town function as a focal point but there is no real inter-modal system to speak of. The buses and the taxis do not feed each other but generally compete along the same routes.

In terms of destination, Burgersfort functions as fulcrum of the local taxi movement with the rest going to Praktiseer, Polokwane, Gauteng and Ohrigstad or Steelpoort. There are long distance taxis operating from three urban nodes going to areas beyond municipal boundaries such as Polokwane, Witbank, Jane Furse, Middleburg, Marblehall, Tembisa and Johannesburg.

Railway transport of general freight is only rendered in Ohrigstad, Burgersfort and Steelpoort. There is no passenger train service, particular referring to daily commuter service, operating in the area. The department of Transport has since promised with the construction of multimodal transport facility in Burgersfort town but to date nothing is coming forth. The table below indicate the state of our taxi ranks and conditions of the facilities.

The availability of stable public transport and different modes of transport (taxis and buses) is a strength that is acknowledged by the Municipality. However lack of infrastructure has become a challenge. There is lack of public transport facilities and as such the overwhelming majority of the taxi facilities are informal. The National department of transport, Provincial department of transport together with the municipality is busy with the development of plans for the integrated modal transport facility in the Burgersfort town which will also add value to the transport service after its completion.

The Municipality together with the SANRAL is currently busy with plans of developing a transport facility in the Burgersfort town. Public transport is needed especially from Phageng to Jane Furse, from Jane Furse to Phageng and from Moralele section Garadingwana, to Jane Furse, Ga-Mampa, Ga – Selepe, Health Centre and Mphanama to Bopedi Shoping Complex. Taxis operating within the Municipality mainly use the tarred R37 (BurgersfortPolokwane), D4250 (Apel Cross-Lebowakgomo) and D4190 (Apel-Sekhukhune-Steelpoort) roads.

There are challenges facing transport insufficient taxi rank infrastructure, most of the mini or metered taxis are not road worthy and do not have operating permits, traffic congestion in Burgersfort town, no transport facilities in some parts of the municipality especially in rural areas, mushrooming of pick up points within town by mini taxis, mini taxi operating beyond their boundaries and delays by the department of road and transport to issue permits for taxis.

Transport Challenges:

- Dispersed & unbalanced settlements causing poor accessibility connectivity
- Lack of effective transport planning unit
- High concentration of traffic around town
- Lack of transport facilities

#### Community Halls

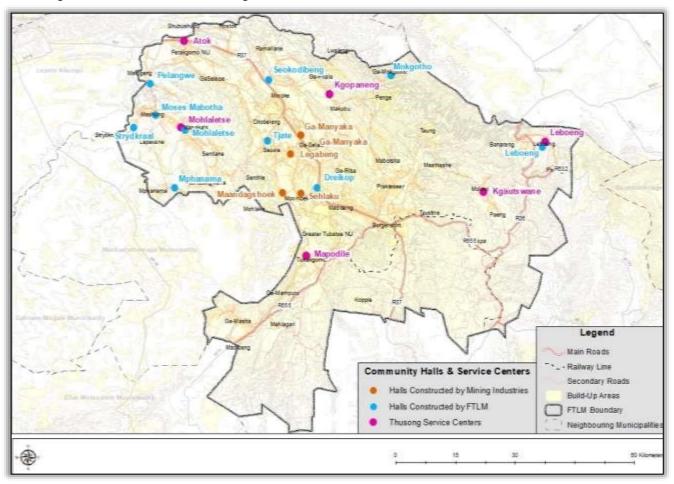

Community Halls are important facilities that seeks to give people opportunities to socialize, learn and access key services and in some areas, they could be used as community centres where members of community tend to gather for groups' activities, social support, public information, and many other unspecified purposes.

The municipality has progressively constructed twelve (12) community halls which are all functional. Out of the twelve, Kgopaneng Community Hall is within the Kgopaneng Thusong Service Centre. Besides the municipal owned community Halls, there are others which were constructed by mining houses as part of their social labour plans.

#### The table below indicates the municipal owned community halls:

| NO. | FACILITY NAME              | ADDRESS  | WARD | STATUS      | DIRECTION                |
|-----|----------------------------|----------|------|-------------|--------------------------|
| 1.  | Mphanama<br>Community Hall | Mphanama | 38   | Operational | -24.577199,<br>29.823721 |

| 2.  | Moses Mabotha<br>Civic Hall   | Mashung     | 36 | Operational | -24.42390,<br>29.78943                    |
|-----|-------------------------------|-------------|----|-------------|---|
| 3.  | Strydkraal<br>Community Hall  | Strydkraal  | 36 | Operational | -24.451431,<br>29.739527                  |

| 11. | Gowe Community<br>Hall        | Gowe        | 07 | Operational | -24.6143021,<br>30.1701064                |
| 12. | Leboeng Community<br>Hall     | Rutseng     | 26 | Operational | 24°20'34.2"S<br>30°19'21.6"E              |

The figure below shows the distribution of community halls and Thusong centres built by Fetakgomo Tubatse and the mining houses.

# Sport, Art and Culture

The Sports Facilities seek to conduct and organize sports practice of all kinds and in all fields, whether competitive, recreational, etc. They encourage and promote leisure pursuits through sports, recreation, entertainment, and cultural interest. The municipality has constructed seven sports facilities which includes three Sports Hubs and four Sports Complexes.

The table below shows the Sports facilities in the Municipality:

| N0. | FACILITY NAME             | ADDRESS  | WARD | DIRECTION            |
|-----|---------------------------|----------|------|----------------------|
|     |                           |          |      | -24.428455, 29.78540 |
| 1.  | Fetakgomo Sports Facility | Mashung  | 36   |                      |
|     |                           |          |      | -24.7325460,         |
| 2.  | Mapodile Sports Complex   | Mapodile | 02   | 30.1329280           |

|    |                          |                |    | -24.564033, 30.343468 |
|----|--------------------------|----------------|----|-----------------------|

|    |                          |                |    |                       |

#### Traffic Law Enforcement and Licensing Services

Traffic Law Enforcement within Fetakgomo Tubatse Local Municipality makes the road safe to all users within the municipal jurisdiction. This is done through visible law enforcement and road safety campaigns. The municipality has experienced an increase in the number of motorists over the years, which is attributed to mining activities happening in the area. This then put pressure on the insufficient resources of the Municipality i.e., Road infrastructure, law enforcement personnel, and inadequate ranking facilities.

The geographical area which covers the whole municipal jurisdiction stretches the current resources and the operations cannot be rendered sufficiently at some parts of the municipal areas. However, road accidents are no longer a major challenge since there is a change for better in terms of the driving behaviour from the motorists. The municipality increased the traffic fleet which makes it possible for visibility of the traffic officials on roads leading into three towns within the municipal jurisdiction. The upgraded R37 and continuous maintenance of R555 roads shows a positive impact in terms of minimisation of road carnages.

Municipal Licensing services are rendered in towns and townships and are augmented by service stations belonging to the Department of Transport and Community Safety. The municipality is currently in the process of opening new Licensing offices at Moopetsi which were donated by Bohwa bja Rena Trust Fund and Twickenham mine. Official hand over shall be done after the installation of water and electricity is complete.

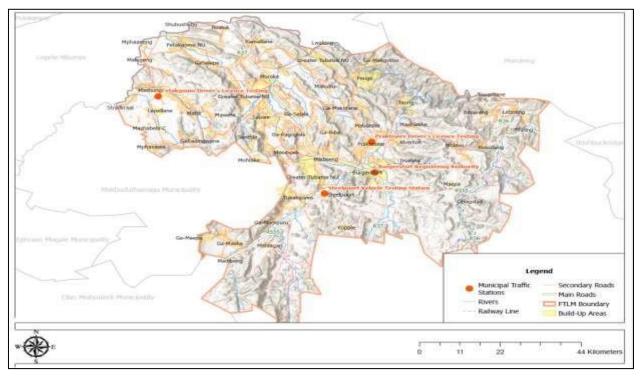

The municipality in collaboration with the Department of Transport and Community Safety is moving towards one stop approach such that comprehensive services could be rendered in all

those facilities. There is however a mushrooming phenomenon of private vehicle testing stations in the municipal jurisdiction. The private VTS are as follows: Burgersfort PVTS, Sebs PVTS, Gateway PVTS, KWS PVTS, Strydkraal PVTS, Elephant PVTS, Noko PVTS, Steelpoort PVTS as well as Tessa PVTS which is in the final stages of registration.

## The table below highlights FTLM licensing facilities:

| NO | FACILITIES                                   | ADDRESS     | WARD |
|----|--|-------------|------|
| 1  | Praktiseer Driver's License Testing Centre   | Praktiseer  | 13   |
| 2  | Fetakgomo Driver's License Testing<br>Centre | Mabopo      | 36   |
| 3  | Burgersfort Registering Authority            | Burgersfort | 31   |
| 4  | Steelpoort Vehicle Testing Station           | Steelpoort  | 31   |

#### Local setting for Licensing centres

#### Recreational Parks, Cemeteries and Crematoria

The municipality has the legislative duty to develop, manage and control cemeteries as stipulated in Part B of schedule 4 and 5 (Cemeteries, Funeral Parlours and Crematoria) of the Constitution

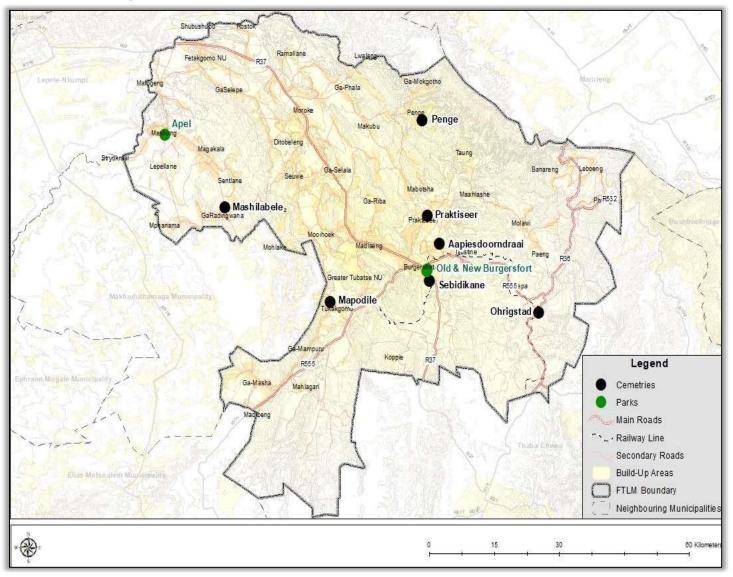

of the Republic of South Africa read together with Section 83 of the Municipal Structures Act No 117 of 1998 on amenable powers and functions. Main objectives are to coordinate and manage parks, cemeteries, and crematoria services, engage in promotional activities to market and popularize the services rendered in the parks and cemeteries, maintain updated burial records, de-bushing of open spaces and landscaping.

#### List of cemeteries

| NO | FACILITIES                             | ADDRESS     | WARD |

# 2.10. Municipal Transformation and Organisation Development

The key performance area on Municipal Transformation and Organisational Development: purports to ensure provision of effective and efficient workforce by aligning institutional arrangements to the overall municipal strategy to enable delivery of quality services to communities in a sustainable manner. The key performance areas are aligned with the national, provincial and district policies and plans, as well as the strategic outcomes of the municipality. The Municipal Transformation and Organizational Development key performance area purports inter alia for continuous institutional compliance and alignment to provincial, national and international instruments, in building stable, effective and compliant institutions in support of service delivery mandate.

The diagnostic report on the performance of Municipalities conducted in 2014 has revealed that some municipalities are still experiencing governance and institutional challenges in meeting their obligations. The root causes were numerous and included amongst others disparate Human Resources systems resulting in excessive disparities that impede mobility of staff in the Sector, bloating of municipal administration in non-core functions of municipalities, Incoherent Human Resources practices resulting in the concentration of critical skills in affluent municipalities as well as high incidence of irregular and inappropriate appointments.

The challenge of poor skills development programmes that negatively impact the capacity of municipalities to fulfil their constitutional mandates as well as ineffective performance management and lack of accountability were also identified amongst the root causes for under performance in municipalities and so is incoherence in disciplinary and grievance procedures that negatively affects employee productivity and morale. Fetakgomo Tubatse Local Municipality like all Institutions in the local space ensured for the implementation of the Local Government: Municipal Staff Regulations – GNR 890 as promulgated by the Minister and published in Government Gazette No. 45181 on the 20<sup>th</sup> of September 2020. The Regulation and Guidelines took effect from 1 July 2022 which required Municipalities to develop HR policies consistent with the regulations (s67).

## 2.10.1. Organizational Structure, Job descriptions and Job Evaluation

The 2024/25 organizational structure was crafted as attempt to align to the provisions of chapter 02 of the Municipal Staff Regulations (GRN 890) to address issues of bloated organization structure and focus on the core service delivery departments .The Municipality also ensured that there are job descriptions for all the positions in the structure and that those positions that warrants to be subjected to job evaluation processes are duly subjected to the process through the support of the District and Provincial Job Evaluation Committees.

## The 2024/25 organizational structure is hereby summarized as follows:

| DESCRIPTION                   | STATUS | PERCENTAGE |
|-------------------------------|--------|------------|
| Total positions on organogram | 1143   | 100%       |
| Filled                        | 323    | 28%        |
| Female                        | 143    | 44%        |

## 2.10.2. Institutional Analysis

This section provides a synopsis of institutional analysis. It tells an important story of the municipality based on nine (9) critical components of the institutional plan, viz: powers and functions; Organisational Structure; Policies, Procedures and systems; Council and Committees' functioning; Performance Management System; Workplace Skills Plan; Employment Equity; human resource plan (OHS, EAP, Staff Retention and succession plans); and resources. The detailed analysis and/or status quo report on each of the component stated below.

# Fetakgomo Tubatse Local Municipality (FTLM) Powers and Functions:

The powers and functions of the Fetakgomo Tubatse Local Municipality (FTLM) are based on the provisions of the Constitution of the Republic of South Africa (RSA, 1996: Section 156 and 229 read with Part B of both Schedules 4 and 5) as well as the Local Government: Municipal Strictures Act (RSA, 1998: s83). The amenable functions are listed below:

# Illustration of Powers and Functions amenable to Fetakgomo Tubatse Local Municipality:

| FUNCTION   | AUTHORISED | AUTHORITY /          |
|--|------------|----------------------|
|  |            | PROVIDED BY          |
| Water and sanitation                               | No         | SDM                  |

# 2.10.3 Skills Profile and Needs for Both Councillors and Officials

Fetakgomo Tubatse Local Municipality has seen a need to contribute to elimination of unemployment and perpetual poverty that is currently being experienced amongst communities. This sad situation which hampers both human development and the progression of local economies is attributed to low skills base as articulated by the Fetakgomo Tubatse Local Municipality (FTLM) Integrated Development Plan (2021-2026). This then calls for advances in building inclusive communities and thereby rolling back the shadow of history and broadening opportunities for all.

For the municipality to realize these aspirations, focused and collaborative efforts are needed to build internal and external capabilities whilst working with partners to mobilize external resources. A need to address the socio- economic challenges brought by low skills base is premised on the International, National and Provincial Instruments which have informed the local development plans to address the triple challenges of unemployment, poverty and inequality.

To cite just a few, Goals 1,9 and 11 of the Sustainable Development Goals (No poverty, Sustainable Cities and Communities as well as infrastructure and Industry, Innovation and Infrastructure, Outcome 5 of Limpopo Development Plan (Skilled and capable workforce to support an inclusive growth path), the provisions of the Skills Development Act of 1998, Section (C) and (G) on the Purpose of the Act, The Limpopo Development plan (2015-2019) and the Fetakgomo Tubatse City Development Strategy (Vision 2043) on the issue of skills development interventions.

Municipalities are required in terms of the Skills Development Act No. 97 of 1998 to facilitate capacitation of the workforce so as to address skills gaps attributable to the past to enhance productivity at the workplace and expedite service delivery. It is for this reason that Fetakgomo Tubatse Local Municipality (FTLM) pays the skills development levy on a monthly basis as required by the Skills Development Levies Act no 9 of 1999.

According to skills development report 2022, The dominant economic activities in FTLM are mining and farming, followed by retail and transport. mining is the dominant economic sector of employment, followed by sales and retail. Transport and construction also feature prominently as being the other active economic sectors of employment in FTLM. This information is evidenced by the availability of mines in the FTLM, which also attracts other economic activities such as retail, construction and transportation. However, it becomes apparent that the mines do not seem to have enough capacity to absorb most people due to lack of skills and qualifications. In terms of the economic contributors Mining, Industries, Agriculture, Tourism and Services are listed The (LPGDS) Limpopo Provincial Growth and Development Strategy, also pin-point Sekhukhune District as having the least highly skilled persons in the province.

Youth constitutes 35% of the population in Fetakgomo Tubatse Local Municipality. And only 10% of the population in Fetakgomo Tubatse have obtained tertiary qualifications. The percentage is made up of Engineering studies which happen to be in the majority, followed by management and law, with the lowest being health sciences. It is evident that fewer people have post matric qualifications.

A skills audit is conducted on an annual basis to inform the Workplace Skills Plan which guides all the training to be conducted throughout the year, the Workplace Skills Plan and Annual Training Reports are then submitted annually to the LGSETA.

## 2.11. Good Governance and Public Participation

The municipality has established the Ward Committee structures across the 39 wards who are working collaboratively with Community Development Workers (CDWs) and other community foot soldiers to identify, refer and report on ward issues to enable planning, budgeting and implementation processes. This assist in deepening democracy and serve a linkage role between the Municipality and its communities. To date, the Municipality has a functional ward committee structure which reports quarterly to Council. The functionality of the structure has contributed immensely in the reduction of service delivery protests by Communities.

The following stakeholders are applicable in the Ward Committee network

| STAKEHOLDER              | FUNCTION  |
|--------------------------|---|
| Fetakgomo Tubatse Local  | Prepare process plan for IDP Revision.                      |
| Municipal Council (FTLM) | Undertake the overall management, coordination, and         |
|                          | monitoring of the integrated Development Plan (IDP) process |
|                          | as well as the drafting of the local IDP.                   |
|                          | Approve IDP within the agreed framework.                    |
|                          | Submit necessary documentation on each phase of the IDP to  |
|                          | the District.   |
|                          | Ensure strategic and participatory planning                 |
| Sekhukhune District      | Compile IDP framework for whole district.                   |
| Municipality (SDM)       | Ensure alignment of IDPs in the District.                   |
|                          | Prepare joint strategy workshops with local municipalities, |
|                          | provincial & national role players & other subject matter   |
|                          | specialists.  |

| Office of the Premier (OTP) | Ensure Medium Term Frameworks and Strategic Plans of        |
|-----------------------------|---|
|                             | Provincial Sector Departments and alignment with local      |
|                             | plans.  |
|                             | Supports and monitors COGHSTA on the IDP alignment          |
|                             | responsibilities.   |
|                             | Intervenes where there is a performance problem on the side |

## 2.11.2. Customer Care

Fetakgomo Tubatse Local Municipality has a developed customer care system as assisted by Development Bank of South Africa together with Anglo through programme funding A wellequipped call centre has been established and is yet to be replicated in other areas of Fetakgomo municipality. Residents and customers alike are given opportunities to raise their complaints and compliments in the suggestion boxes Presidential and Premier Hotlines queries that are attended within a month.

Those that visit the municipality are given the opportunity to raise their concerns and their compliments. Complaints are registered and attended-to within 5 working days. However, it has been realised that some of the cases reported are repeated while others are referred to Sekhukhune District Municipality in line with amenable powers and functions.

#### 2.11.3. Public Participation

The Municipality has a functional Public Management Unit that regularly reaches out to different stakeholders, communities, and wards to promote democratic, consultative and participatory governance. The municipality consults different stakeholders and interest groups on Municipal activities such as the IDP, Budget and Annual report and other processes. Community development workers and ward committees are linked to this unit

for reporting purposes and alignment. Public participation strategy is in place to guide activities that have to be undertaken by the unit. The Unit has also established clusters for the purpose of public participation processes for the IDP and the Budget. Public gatherings are the sole responsibilities of the public participation unit including handling applications for protests marches. The ward committees request to be capacitated by the municipality in various skills.

## 2.11.4. Risk Management, Anti-Fraud and Corruption

Section 62(1) (c) (i) of the Municipal Finance Management Act compels the accounting officer to

establish and maintain, among others, a system of managing risks faced by the municipality. The

FTLM has in place a system of risk management for the municipality to provide some assurance

that risks across all functions and levels that may have an impact on the achievement of objectives

are adequately and proactively anticipated and mitigated.

Risk Management processes are coordinated, supported, and championed by the Risk Management Unit, led by the Chief Risk Officer. The governance model of operation of the FTLM's systems of managing risk is a decentralized one, wherein departments are responsible for performing risk identification, evaluation, mitigation, and reporting processes. FTLM has in place service of the Risk Management Committee and the Audit and Performance Committee.

The Risk Management Committee comprises all Directors and is chaired by an independent external member. The Committee is responsible for overseeing enterprise-wide risk management of the municipality. The Audit and Performance Committee also supports the Risk Management Committee in its risk oversight role.

The effective management of risk is prioritised to ensure that business risks across the organisation are identified and managed on an ongoing basis for the achievement of the municipality's objectives. The risk categories have been aligned to the strategic objectives in order to identify those risks that directly affect and/or impede the municipality's ability to achieve those strategic and business objectives.

During the risk assessment process, management considered the following five (5) key performance areas (KPAs):

KPA 1:

KPA 2:

KPA 3:

KPA 4:

## KPA 5:

The Municipality has approved Risk Management Policy, Strategy, Implementation Plan, Fraud Prevention and response plan, Whistleblowing policy, Business continuity management framework, and policy, as well as Risk registers (strategic and operational) that enable management to proactively identify and respond appropriately to all significant risks that could impact municipal objectives. In line with the approved Risk Management Policy and Strategy, a top-down and bottom-up approach has been adopted in developing the risk profiles of the municipality. The results of the strategic and operational assessments were used to compile a risk register.

The top ten risks identified in the Municipality are as follows:

- Land Invasion
- \rm Cyberattack
- 4 Aged and Ageing infrastructure
- Critical Infrastructure blackouts
- Non-compliance with relevant legislation and regulations.
- **4** Uncontrolled and unconducive environment for development.
- 4 Unsustainable financial viability within the Municipality
- 4 Illegal dumping

## 2.11.4.1. Anti–Fraud and Anti–Corruption Policy and Plan

FTLM subscribes to the principles of good municipal governance, which requires the provisioning of services in an honest and transparent manner. Consequently, the Municipality is committed to fighting fraudulent behaviour at all levels within the organisation. In addition to promoting ethical conduct, the Anti–Fraud and Anti–Corruption Policy and Plan is intended to assist in preventing, detecting, investigating and sanctioning fraud and corruption.

## 2.11.5. Internal Audit

Internal auditing is an independent, objective assurance and advisory service designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of governance, risk management, and control processes.

## 2.11.5.1. The role of Internal Auditing and the public interest

Internal auditing plays a critical role in enhancing an organization's ability to serve the public interest. While the primary function of internal auditing is to strengthen governance, risk management, and control processes, its effects extend beyond the organization. Internal auditing contributes to an organization's overall stability and sustainability by

providing assurance on its operational efficiency, reliability of reporting, compliance with laws and/or regulations, safeguarding of assets, and ethical culture. This, in turn, fosters public trust and confidence in the organization and the broader systems of which it is a part.

The Internal Audit function has been established in terms of section 165(1) of the Local Government: Municipal Finance Management Act (MFMA). MFMA Circular 65 then provides information to assist municipalities and municipal entities to improve the effectiveness of internal audit and audit committees. Internal Audit Mandate also comes from Global Internal Audit Standards

## 2.11.5.2. The internal audit function as mandated by MFMA section 165 to:

2.11.5.2.1. prepare a risk-based audit plan and an internal audit program for each financial year,

2.11.5.2.2. advise the accounting officer and report to the audit committee on the implementation of the internal audit plan and matters relating to: -

- 2.11.5.2.2.1. internal audit,
- 2.11.5.2.2.2. internal controls,
- 2.11.5.2.2.3. accounting procedures and practices,
- 2.11.5.2.2.4. risk and risk management,
- 2.11.5.2.2.5. performance management,
- 2.11.5.2.2.6. loss control; and
- 2.11.5.2.2.7. compliance with this Act, the annual Division of Revenue Act and any
- 2.11.5.2.2.8. other applicable legislation; and
- 2.11.5.2.2.9. perform such other duties as may be assigned to it by the accounting officer.

## 2.11.5.3. Commitment to Adhering to the Global Internal Audit Standards

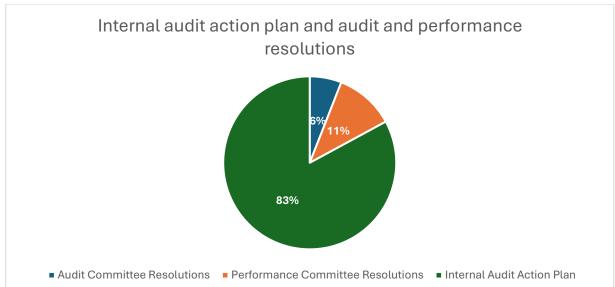

The Fetakgomo Tubatse Local Municipality's internal audit function will adhere to the mandatory elements of The Institute of Internal Auditors' International Professional Practices Framework, which are the Global Internal Audit Standards, Topical Requirements and Global guidance. The chief audit executive will report quarterly to the Audit and Performance Committee; and senior management regarding the internal audit function's conformance with the Standards, which will be assessed through a quality assurance and improvement program.

## 2.11.5.4. Types of audits

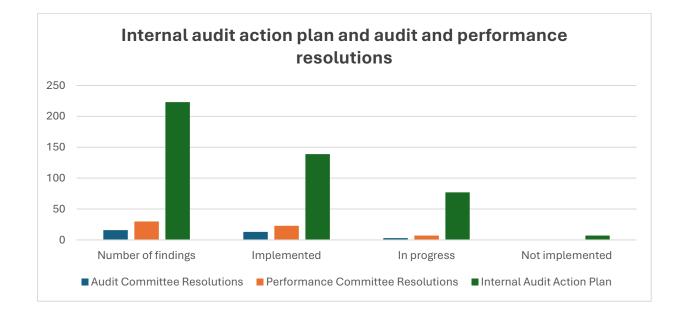

2.11.5.4.1. **Assurance services** – Services through which internal auditors perform objective assessments to provide assurance. Examples of assurance services include risk based, compliance, financial, operational/performance, and technology engagements. Internal auditors may provide limited or reasonable assurance, depending on the nature, timing, and extent of procedures performed.

2.11.5.4.2. *Advisory services* – Services through which internal auditors provide advice to an organization's stakeholders without providing assurance or taking on management

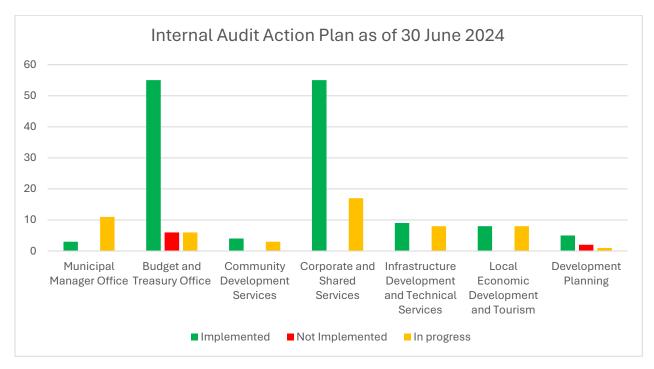

responsibilities. The nature and scope of advisory services are subject to agreement with relevant stakeholders. Examples include advising on the design and implementation of new policies, processes, systems, and products; providing forensic services; providing training; and facilitating discussions about risks and controls. "Advisory services" are also known as "consulting services."

## Internal Audit Monitoring tools

## Internal Audit Action plan implementation

## 2.11.6. Audit and Performance Committee

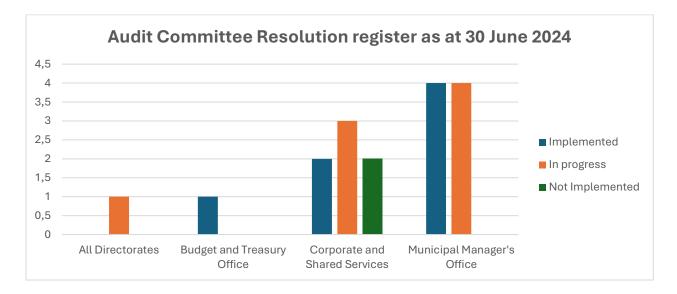

The Audit and Performance Committee (APC) of Fetakgomo Tubatse Local Municipality is an independent committee established by the Municipal Council in terms of Section 166 (2) of the Municipal Finance Management Act no.56 of 2003, as amended and Section 14(2)(3) and (4) of Municipal Systems Regulation of 2001. This charter is referred to as written terms of reference which guide the Audit and Performance Committee with regard to its membership, authority, duties and responsibilities and details the manner in which the Committee shall operate.

## The audit and performance committee is comprised of 5 members with vast experiences in various disciplines:

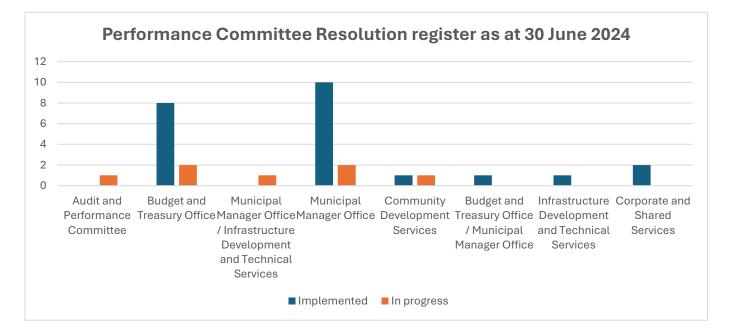

- Information and Communication Technology
- Performance management
- External and internal audit
- **D** Financial Management
- Legal services

## Audit Committee Resolution implementation.

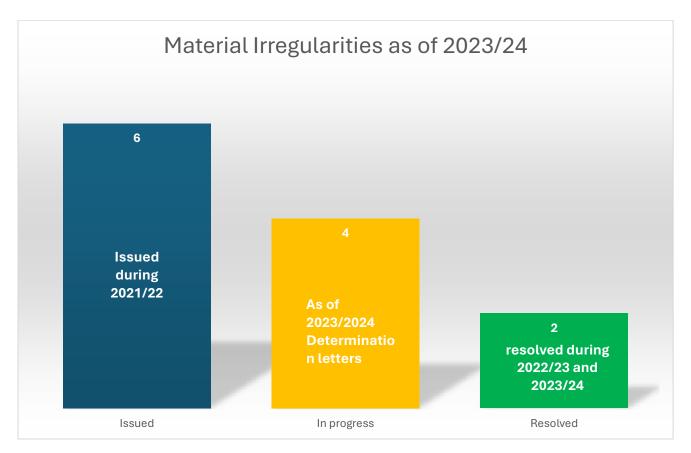

## Performance Committee Resolution implementation,

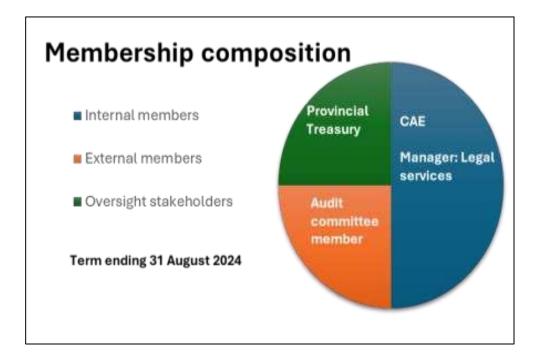

## 2.11.8. Material irregularities Committee

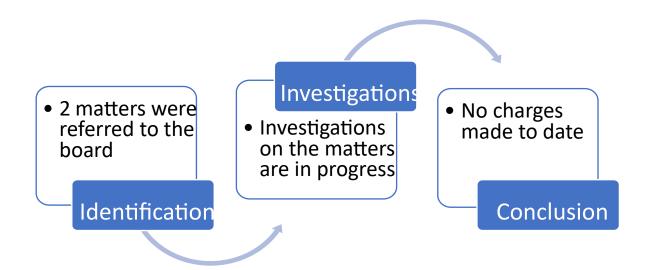

Material Irregularity Committee established to deal with all irregularities identified and reported by Auditor General South Africa. The committee comprises of the MM, Internal audit, Legal services unit and external stakeholders.

#### Financial Misconduct board

Financial Misconduct Board established in terms of municipal regulation on financial misconduct procedures and criminal proceedings as per sec 168 and 171 of MFMA.

#### 2.11.9 Labour Relations

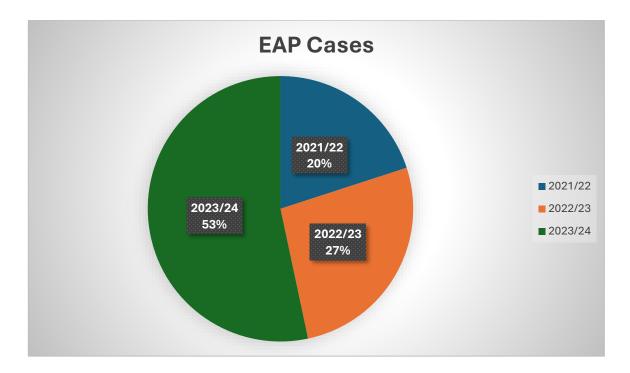

The Labour Relations Management & Compliance of Fetakgomo Tubatse Local Municipality was established in line with the Main Collective Agreement SALGBC, subscribes to all legislations regulating employment relations within the workplace. The unit is consisting of five positions and only three positions are felt now: Senior Labour Relations Management & Compliance Officer, two Labour Relations Management & Compliance Officers and one intern. The unit has been established with the sole mandate of ensuring a balance regarding employment practices within the workplace and enhancing sound working relations between the employer and employees. Reports on Grievances, Disciplinary hearings and Disputes are forwarded to the Municipal Council for consideration on quarterly basis. Fetakgomo Tubatse Local Municipality has a functional Local Labour Forum constituted. The forum works in line with the South African Local Government Bargaining Council's (SALGBC) main collective agreement. The committee sits on monthly basis to discuss issues relating to employment relations.

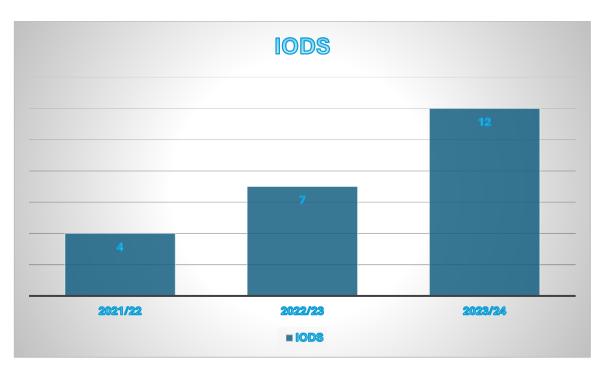

#### 2.11.10 THE SHEQ AND EAP

The Municipality takes a proactive approach to employee health, safety, and well-being through its SHEQ (Safety, Health, Environment, and Quality) and Employee Assistance Programmes (EAP). In compliance with the Occupational Health and Safety Act (No. 85 of 1993), the Municipality has developed a detailed written policy for protecting employee health and safety in terms of section 7 of the Act. This policy outlines how the Municipality ensures safe working conditions and the responsibilities of various stakeholders within the organization. It is reviewed regularly to adapt to any new risks or hazards in the workplace environment.

The municipality has a legal responsibility to manage and prevent injury on duty in terms of compensation for Occupational Injuries and Diseases Act, 130 of 1993.

The municipality is currently in compliance with the statutory requirements of the act. That the municipality has letter of good standing with the compensation commissioner.

## Function of the Unit

- OHS Audit
- Municipal Capital Projects Monitoring / Inspection
- PPE supplied
- First Aid supplied or refill
- OHS committee
- COIDA management
- Injuries on Duty (IODs)
- Employee Wellness Programme
- Medical Surveillance
- Fumigation /Pest Control / Decontamination
- OHS Campaign / Workshops
- Bereavement
- Fire safety equipment
- Monitoring of industrial compliance with regards to Safety, Health, Environmental and Quality services or assurance

The Municipality, as required by Section 17(1) of the Act, designates Health and Safety Representatives for every workplace that employs more than 20 people. These representatives are appointed in writing by the municipal manager for a specific term, and their responsibilities include regular inspections of the workplace to identify hazards, reporting these hazards, and working with management to address them. These representatives also form the Health and Safety Committee, which meets regularly to review workplace incidents, assess risks, and ensure compliance with safety standards as stipulated under Section 18(a)-(f) of the Occupational Health and Safety Act.

The SHEQ Committee manages and oversees all safety, health, environment, and quality control initiatives. This includes ensuring that all employees are trained on safety procedures, conducting regular risk assessments, and maintaining up-to-date safety documentation. The Municipality also runs awareness programs, ensuring that employees understand their roles in maintaining a safe working environment. Emergency drills are conducted per quarter, and safety equipment is regularly inspected to make sure it is operational. The SHEQ Committee

is responsible for continuous monitoring and improvement of these processes to ensure compliance with all legal requirements and safety regulations.

For employee wellness, the Municipality has implemented a robust Employee Assistance Programme (EAP) as quidded by EAPSA 2015 as amended. This program provides support to employees dealing with both work-related and personal issues, such as stress, mental health challenges, or financial difficulties. The EAP offers confidential counselling services and wellness workshops to help employees cope with pressures that might affect their productivity or health.

The Municipality has integrated SHEQ and EAP Programs into its daily operations, focusing on preventive measures to reduce workplace accidents and illnesses. Regular health screenings are provided, and employees are encouraged to participate in wellness programs that promote physical and mental well-being. First aid and basic firefighting training will be offered to staff, ensuring that immediate assistance is available in case of emergencies (Emergency Preparedness Plan).

The Municipality not only meets the legal requirements of the Occupational Health and Safety Act but also actively fosters a safe and healthy working environment through practical, handson measures such as safety training, hazard identification, and employee wellness initiatives (and the world health organisation guidelines and national health and wellness calendar). The combined efforts of the SHEQ Committee and EAP ensure that employees are supported both physically and mentally, promoting a more engaged and productive workforce.

#### Challenges

The unit is currently understaffed and there is a need to add more specialised personnel or vacancies in the office. One of the key challenges facing the municipality is the ability to conduct food inspection and ensure general wellness of our communities. There is a need for district municipality to collaborate with the local municipality on terms of National Health

Act 2003 under municipal health services in the following areas, Water Quality Monitoring, Food control, Solid Waste Management, Health Surveillance of Premises, Supervision and Prevention of Contagious Diseases, Vector Control and Environmental Pollution control, Disposal of Human Remains and safe handling of chemical substances. Financial constraints and lack of strategic resources impairs the unit to execute its mandate optimally to ensure boarder compliance in all key aspects of safety and health.

| Strength                           | Weakness                               |  |  |  |  |  |
|------------------------------------|--|--|--|--|--|--|
| Collaboration on Municipal Health  | Sister Department working in Silos     |  |  |  |  |  |
| Services                           | Duplication of duties                  |  |  |  |  |  |
|                                    | Wastage of state resources             |  |  |  |  |  |
|                                    |  |  |  |  |  |  |

|                                    | diseases.                              |  |  |  |  |  |

## 2.11.13. Performance Management System

As the integration phase highlights, the municipality has approved and implementing the PMS framework which is using the logic approach to assess both institutional and individual performance. The cascading of the PMS is tied to the introduction of performance commitments. The PMS was implemented until section 56/57 managers in 2021/2022. It was cascaded further to first level managers during 2022/2023 financial year with plans to cascade to all municipal employees in future. In addition, regional office managers will also be included in the performance management system going forward. The FTLM's PMS Consummates with its financial resources.

budgeting for the performance bonuses to cater for the reward of those deserving informed by the performance reports.

## 2.11.14. Employment Equity

The human resource plans including the Employment Equity Plan (EEP) which were recently reviewed to address the above shortcomings are listed in the IDP integration phase. The main challenge at present revolves around implementation of the Plan. The Municipality is 52:25 grappling with the employment equity challenge of ensuring that its structures reflect equitable representation of all groups, particularly the people with disability. The male-female ratio stands at 49:22 excluding interns. This translates into the municipality having 43% of its workforce being women while men contribute 57% of the workforce. Thus, the municipality has a variance of 7% to achieve the gender balance amongst its workforces.

## 2.11.15. Corporate Administration

Section 3(c) of the National Archives and Records Services Act, 43 of 1996 indicates that the objects and functions of the national archives is to ensure proper management and care of municipal records. The Fetakgomo Tubatse local municipality has in line with this act, established the facilities and records management unit to preserve the municipal records and to make them available whenever they are needed.

The facilities and records management unit are also guided by the approved internal control measures, namely, records management policy, municipal file plan and registry procedure manual. The municipality has again, in terms of Section 14 of the Promotion of Access to Information Act, 2 of 2000, developed the Promotion of Access to Information manual to regulate access of information to all stakeholders. Page 645 of Staff Regulation, Government Gazette 45181 (2021) indicates that records management is associated with the knowledge of record management practices and registry activities.

The Draft file plan developed by FTLM is found to be not compliant and therefore the Municipality assisted by COGHSTA are in a process of developing a new file plan and the project is at an advanced stage. The newly developed draft file plan has been submitted to the Limpopo department of Arts and Culture for approval. The approved plan will then be subjected to FTLM Council for noting.

Records for the municipality are currently kept in an off side storage located in Gauteng province of which the said arrangement is in contradiction with the records management policy of the municipality.

In terms of the applicable legislative framework, the municipal redundant records are disposed annually in terms of the Council Resolution and the Disposal Authority Certificate issued by the Limpopo provincial archives.

## 2.11.16. Facilities Management

Section 5(1) (f) of the Municipal Systems Act No. 32 of 2000 indicates that members of the local community have the rights to demand that the proceeding of the municipal council and those of its committees must be to the use and enjoyment of public facilities. In line with this act, Fetakgomo Tubatse local municipality established facilities and records management unit to repair and maintain municipal facilities.

In terms of page 252 of Municipal Staff Regulation 45181 (2021), facilities management performs routine and basic functions relating to maintenance of community buildings. There are internal control measures such as facility management policy and facilities maintenance policy developed to regulate the provision, maintenance, and repairs of municipal facilities.

| FACILITY NAME                     | STATUS                            |  |  |  |  |  |
|-----------------------------------|-----------------------------------|--|--|--|--|--|
| Head office (Burgersfort)         | Better (not properly maintained)  |  |  |  |  |  |
| Old offices (Burgersfort)         | Dilatated due to poor maintenance |  |  |  |  |  |
| Regional office (Apel)            | Better (not properly maintained)  |  |  |  |  |  |
| Ohrigstad satellite office        | Only one office available         |  |  |  |  |  |
| Ga-Mapodile Satellite office      | Better (not properly maintained)  |  |  |  |  |  |
| Ga-Mapodile Thusong centre        | Better (not properly maintained)  |  |  |  |  |  |
| Atok Thusong centre               | Better (Not properly maintained)  |  |  |  |  |  |
| Mabopo traffic testing station    | Bad (poor maintenance)            |  |  |  |  |  |
| Mohlaletsi Thusong centre         | Bad (poor maintenance)            |  |  |  |  |  |
| Praktisee traffic testing station | Better (not properly maintained)  |  |  |  |  |  |
| Praktiseer satellite office       | Old (not properly maintained      |  |  |  |  |  |
|                                   |                                   |  |  |  |  |  |

The following are Corporate facilities of the municipality:

The Head office in Burgersfort town is full to capacity and therefore that might cause structural collapse and or health hazards to both the employees, councillors and municipal clients. A

draft plan has been developed to address the above stated risk and it needs approval by Council.

## 2.11.17. Fleet Management

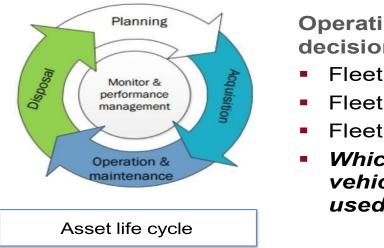

Fetakgomo Tubatse Local Municipality is currently owning hundred and six (106) Vehicles and eight (8) equipments which are being utilizes to render service delivery and the core business of the municipality in line with the provision of fleet management services. The table below indicates the total number of Yellow Vehicles currently owned by the Municipality.

| Yellow<br>Machineries | Trucks | Light<br>Duty<br>Vehicles | Motor<br>bike | SUV | Sedans | Equipments | Trailers | Bus |
|-----------------------|--------|---------------------------|---------------|-----|--------|------------|----------|-----|
| 14                    | 21     | 21                        | 01            | 05  | 30     | 08         | 04       | 02  |

- The municipality is having the total number of 15 brash cutters which are utilised by Community Services-EPWPS. The following fleets is centralised to various departments
- 1. Assessment of Vehicles, Yellow Fleet, trucks and other related fleets and equipments

Investment decisions

- Fleet size
- Fleet mix
- Fleet age
- Engine capacity

Operating decisions

- Fleet size
- Fleet mix
- Fleet age
  - Which vehicle used (Km)

## Fleet Management Planning;

The Fleet Management Services in the Fetakgomo Tubatse Municipality involved operating for service delivery purpose and decisions is required with the information in order to be operated efficiently and effectively. The pie-charts above outlines the asset life cycle, which is applied to the analysis performed, two clear interdependent decision-making areas emerge, namely, investment and operational. Direct expenditure on vehicles occurs in relation to the vehicles available in the fleet and their ability to meet the required service delivery needs.

Investment decisions impact the size, mix (type of vehicle), age and capacity of a fleet. The availability of the fleet from the investment decisions is not the sole determinant of expenditure. Spending is also influenced by operating decisions on how vehicles are used. The operational decisions on the number of kilometres driven in each vehicle will also impact direct cost as each vehicle has a different cost per kilometre.

The analysis is underpinned by the cost per kilometre which normalises the number of vehicles, vehicle type and age. The analysis identifies the following:

- Investing decisions:
- Vehicle type sedans have the lowest operating cost followed by LDVs, Yellow machineries and trucks have the highest operating cost.
- Vehicle age The older the vehicle, the higher the cost per kilometer.
- Vehicle engine size The larger the engine capacity the higher the fuel cost per kilometer.
- Operating decision:
- Vehicle mileage the mileage per vehicle type and age.

#### Challenges and concerns:

#### Acquisition of new fleets

 The Municipality has failed to acquire bulk of Yellow Machineries during the 2023/24 Financial Year and opted to acquire only two (2) new motor graders and one (1) backhoe tractor. The service standards have not improved, and the municipality is experiencing the challenges of poor service delivery.

## Supply, installation and replacement of worn-out tires

 The replacement of worn-out tires and installation of new tires on the municipal vehicle is not effective and such events result in poor service delivery. The delays in the provision of tyre replacement limit the number of vehicles that need to be used for service delivery.

#### Maintenance and repair issues:

One of the primary challenges faced by the Fetakgomo Tubatse Local Municipality (FTLM) with the municipal fleets is maintenance and repairs, tires and accidents. The municipality is currently spending high costs on maintenance of the existing vehicles as a result of frequent breakdowns and increased repair costs. This can lead to poor service delivery and operational disruptions.

## • Yellow Fleets and Trucks availability:

With only eight (8) motor graders, three (3) 10-ton tipper trucks, four (4) backhoe tractors, one (1) Hino-Low-bed truck and two (2) Rollers, rendering services to the Rural Villages of 39 wards within the jurisdiction of Fetakgomo Tubatse Municipality can be quite difficult. The existing Yellow Fleets and truck are working over hours which result in high cost of repairs and maintenance.

## Towing Services:

 With only one (1) truck used for towing, it is difficult for the Municipality to tow the motor graders during the major breakdowns. The existing towing truck does not have a winch therefor the municipality hire the towing truck with winch trailer from the external service provider.

## Fuel Cost:

The fuel cost per kilometer does increase with age. But the main reason for the increase in cost per kilometer is due to the increase in cost per kilometer to the increase in maintenance costs. Yellow machineries and trucks are consuming more fuel as result of long distances travelling to the rural villages to render service delivery. There is need for the municipality to cluster the machineries and trucks and to use the diesel bowser for the transportation of fuel.

#### Panel beating services:

 Service Panel Beaters is all geared up to meet the challenges and demands of today's most discerning motorists. Service Panel Beaters handle major structural repairs with factory approvals. The Municipality requires the service of Panel Beaters to address the challenges and demands of the vehicles which require such services.

## Hiring of additional machineries and trucks

 The workloads at the rural villages have been a significant challenge and the Municipality is forced to hire an additional Yellow Fleets and trucks to increase the capacity given the challenges of insufficient Yellow Fleets and trucks which are expected to be used for service delivery. Below is the list of the additional Yellow Fleets and trucks which were hired for service delivery at Rural Villages.

## 2.11.18. Legal Services

The objective of the legal service unit is to provide of pro-active legal and administrative solution driven services to both the Council and the Administrative arm of the municipality and to entrench a culture of accountability, ethics, and transparency. The legal services objectives and requirements need to be aligned with the IDP to address challenges of legal nature within the organization, effective budget management in line with operational budget provision and improvement on the quality of delivery targets and interaction with all relevant stakeholders. The unit is to conduct legal audit on all legislation having an impact on the municipality in the next financial year to be able to strictly monitor compliance of each relevant department and further ensure effective, accountable, and clean local government that works together with the alignment of regulations adopted both by national, provincial government and local.

## 2.11.19. Information and Communication Technology

Information and Communication Technology (ICT) plays a critical and strategic role in enabling the vision and objectives of Fetakgomo Tubatse Local Municipality, allowing secured electronic transactions and effective communication.

At the core of this role lies the continuous support service that is always available, accessible, trustworthy, and reliable thereby providing the foundation for all other activities to advance the ICT core function as an enabler. While providing continuous support, the ICT Unit must also provide a strategic insight and support the business by deploying systems which enable Municipal functions to work more efficiently and effectively, enabling new products and services for the customers and provides the necessary intelligence for the business to identify products and services that will attract clients and be a support service of choice.

The DPSA in collaboration with the Government Information Technology Officer Council (GITOC) developed the Corporate Governance of ICT Policy Framework and the implementation guideline. The following ICT policies were developed and adopted by the Municipal Council on the 30<sup>th</sup> of June 2023 in terms of Council Resolution OC148/2023 to give effect to the ICT policy framework:

- ICT Governance Framework- enable organisations to manage their IT risks effectively and ensure that the activities associated with information and technology are aligned with their overall business objectives.
- ICT Incident and Problem management Policy ensures that unexpected disruptive events are managed and responded to with the objectives of controlling the impact to FTLM business within acceptable levels.
- ICT Change Control Management Policy this policy and its associated procedures apply to scheduled changes as well as changes resulting from unplanned and emergency situations to all municipal information and communication technology.

- ICT Cyber Security Procedure focuses on recovery and business continuance from a serious disruption in activities due to non-availability of the municipal's facilities as a result of cyber-attacks and related events.
- ICT User Accounts Management Policy addresses management and creation of passwords to ensure protection on electronic data, information and system access.
- ICT Backup Policy defines control that will enforce regular backups and support activities so that any risk associated to the management of data backups and recovery are mitigated.
- Disaster Recovery Plan ensures that the municipality has backup systems in place in the event of a disaster of any kind (e.g., firebreak, power surge or building damage, floods, etc.) to restore services. It is required to restore a system, service or data to its prior to a disaster or the closest achievable stat of depending on the success of the disaster recovery operations.
- ICT Data Centre Physical Access and Environment Control Policy provides guidelines and procedures relating to access control, environmental control, and operations of the municipal ICT Data Centre.
- ICT Security Policy provides the municipality with minimum rules, guideline and standard in order to apply an effective and consistent level of security to all information and communication systems that process municipal's information.
- ICT Equipment Usage Policy provides the municipality with an ICT equipment Usage Policy in order to apply an effective and consistent standard for the ICT equipment and software in use by the Municipality.
- ICT Network Management Policy establishes standards and directives for the allocation, administration and usage of IP Addresses throughout the municipality's network infrastructure.
- ICT Service Catalogue for Information Management it clearly defines what services are available from the IT organization and aligns those services with the business goals and needs.
- ICT Service Continuity plan the plan is designed to enable the execution of a recovery plan during a business or IT service disruption.

- ICT Firewall Policy - this policy defines the essential rules regarding the management and maintenance of firewalls at municipality and it applies to all firewalls owned, rented, leased, or otherwise controlled by the municipal's employees.

All the abovementioned policies are due for review at the end of May 2026.

- The division has a functional ICT steering committee which sits quarterly to ensure governance and accountability for the municipality's ICT environment and that ICT conforms to legislation.
- The ICT unit is in the process of developing the ICT Strategy, implementation and operational plans to plan for future ICT investment as well to improve the current ICT environment, in order to assist the Municipality in carrying out its service delivery mandate. One of the primary benefits of having an ICT strategy is that it helps align ICT with the Municipal's business goals. Without a strategy, IT initiatives may be pursued in isolation, without regarding to how they fit into the broader Municipal's goals.

## 2.11.20. Communication

The Fetakgomo Tubatse Local Municipality (FTLM) has developed its communication strategy and is reviewed on annual basis. There are several means of communications used e.g. print media, electronic media and social media. The municipality also uses its website for communication purposes. Several structures such as Ward Councillors, Ward committees, Community Development workers and Traditional are also used as vehicles for communication and dissemination of information. The Municipality communicates its planning processes and the implementation of both the IDP and Budget using the media for both internal and external stakeholders.

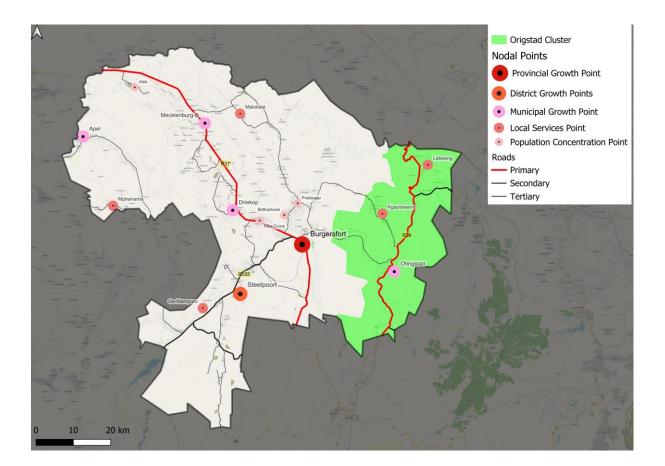

The following channels are also used for internal communication and dissemination of information, namely:

- Notices
- WhatsApp group pages
- Facebook pages
- Email

## 2.12 Regional Context

## 2.12.1 OHRIGSTAD REGION

The figure below shows that the Ohrigstad region is located on the western side of the Fetakgomo Tubatse Local municipality. The region is mainly accessible through the R36 which traverses the region, running from north towards Tzaneen and to the south toward Lydenburg.

The figure below shows that the settlement structure of Ohrigstad is scattered, and mainly the residential areas are located to the north of the region with in the Leboeng and Kgautswane concertation points. Ohrigstad is the main nodal area that is classified as Municipal growth point. The region has a few industrial nodes along the R36. There are two transport modal points located in Ohrigstad town and in Leboeng. The Ohrigstad modal point

is more formal whilst the Leboeng modal point is informal. The region has been identified as an Agriculture and logistics hub.

## The following are the catalytic projects for the region:

- New Maponya Hotel
- Fresh produce market
- Fertilizer Plant
- Ohrigstard Integrated roads and stormwater Master Plan

## The following are some of the top layer projects in the region:

- Establishment of municipal training centre
- Expansion of administration offices
- Development of Ohrigstad precinct plan

## FACILITIES AND THEIR CHALLENGES WITHIN OHRIGSTAD REGIONAL CLUSTER

- Ohrigstad Sports Stadium: Incomplete and non-functional
- Thusong Service Centres (Leboeng and Kgautswane: Facilities not yet transferred to municipality)
- Community Hall: Not yet equipped with chairs

# CHALLENGES CONFRONTING OPERATION OF OHRISTAD REGIONAL CLUSTER OFFICE

- No Admin Offices
- No Parking
- No Sewerage System for regional office and Ohrigstad town
- Lack of water in other villages of the region
- Electricity
- Lack of access roads in cluster areas of the region
- Tarring of D road from R36 road via Kgautswane to Alverton

## 2.12.2 APEL REGION

The figure below shows that the Apel Region is locate on the western part of the Fetakgomo Tubatse Local municipality. The main nodal points in the Apel region are Apel which is classified as the municipal growth point and Mphanama node which is classified as a local service centre.

The figure below shows that the Apel region is mainly under tribal authority. Only few portion on the north western side of the region and areas on the south western side are not under tribal authority.

The figure below shows that the Apel region is mainly characterised sparsely developed residential areas. These residential areas are clustered along the main road that connects the nodal areas of Apel and Mphanama. The Apel node also presents with a formal intermodal facility. Along this main road, there is a informal modal transport hubs. The region does not have significant commercial nodes, safe for Apel nodal area. There are scattered informal settlements throughout the region. The region has been identified as an Innovation Hub. The catalytic project in the region are:

- Apel Integrated roads and stormwater master plan
- University and ICT centre

## CHALLENGES

#### Access to water

**Apel Regional Offices** has a serious water challenge. The source of water is Sekhukhune District Municipality. The flow of water is not consistent. The facility is sometimes running without water for a maximum of two (2) days.

There is a water borehole which needs to be resuscitated. The infrastructure and technical department wasrequested to assist in resuscitating the water borehole and connect the water to the offices as an alternative water supply.

**The Mabopo DLTC** is having no source of water. The borehole was drilled, and it was discovered that there is no water from the bottom of the land. Currently, the facility is depending on the daily supply of water from the Sekhukhune District Municipality into the tanks.

**Mohlaletsi Thusong Services Centre** is without source of water. The facility is utilising pit toilets. The borehole was drilled only to discover that there is no water from the bottom of the soil. The Sekhukhune district municipality is delivering water into the tanks for cleaning and drinking purposes.

## Sanitation

Sanitation is a very serious and big challenge as the facilities are utilising the septic tanks. The septic tanks do have uncomfortable odour. The septic tanks are also uneconomical as they are getting full within a very short space of time.

#### Community halls

The Apel cluster is having four (04) community halls, namely,Mohlaletse, Strydkraal, Mphanama and Moses Mabotha halls. The challenges are that the facilities are without running water. There are not boreholes and jojo tanks tanks to service the facilities.

Moses Mabotha Civic hall needs major repairs and maintenance, e.g wall paining, ceiling repairs, parking space with shades. This is a state-of-the-art facility which host major provincial, district and local events. More funds are needed to make facility conducive for events hosting.

## VEHICLE PARKING SPACE

All facilities have no proper sheltered parking spaces. Funds are needed to construct proper and secured parking spaces/areas.

#### ELECTRICITY

Apel regional offices and Mabopo DLTC have solar panels as alternative power supply.

The community halls need to be supplied with solar panels.

## STATE OF THE FACILITIES

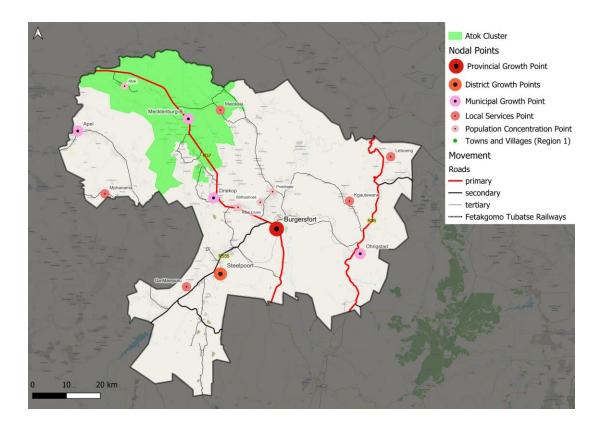

The current state of all the facilities is dilapidated. Proper maintenance and repairs is needed to improve their status and to increase their life span.

## SECURITY FENCE

All facilities have concrete palisade fence around the yard. The palisade fence needs to be replaced with the modern clear view fence

#### 1.12.3 Atok Region (R37 PLATINUM CORRIDOR)

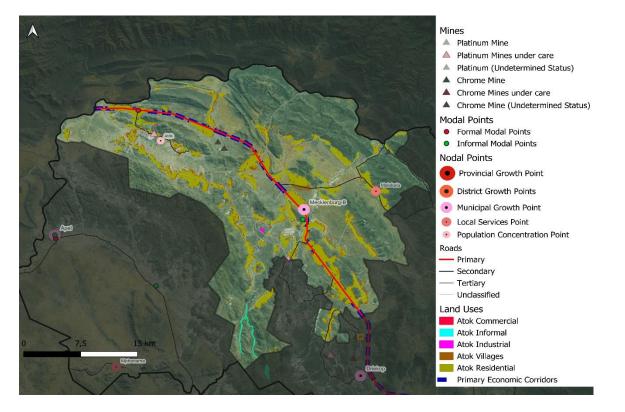

The figure below shows that the Atok region is located on the northwestern side of Fetakgomo Tubatse Local Municipality. The region is traversed by the R37 from Burgersfort to Polokwane the (Dilokong Corridor). The region's main nodal areas are Mecklenburg nodal area, which is a municipal growth point, the Atok nodal area, which is the municipal growth point and the Malokela nodal area, which is the local service point.

The figure below shows that the region is characterised by scattered development. The Atok region has Platinum and Chrome mines along the R37 (Dilokong corridor). The presence of the mines in the region presents both opportunities and threads. The opportunities are that the communities can benefit from the Social and Labour Plans (SLPs) and social-corporate investments (CSI) opportunities that these mines that the mines would implement in the region. The threads are the environmental degradation that these mines might bring to the region. As such, care should, and concrete rehabilitation plans put in place should the mines'

life span come to an end. The region has been identified as the Platinum hub. The following are the catalytic project in the region:

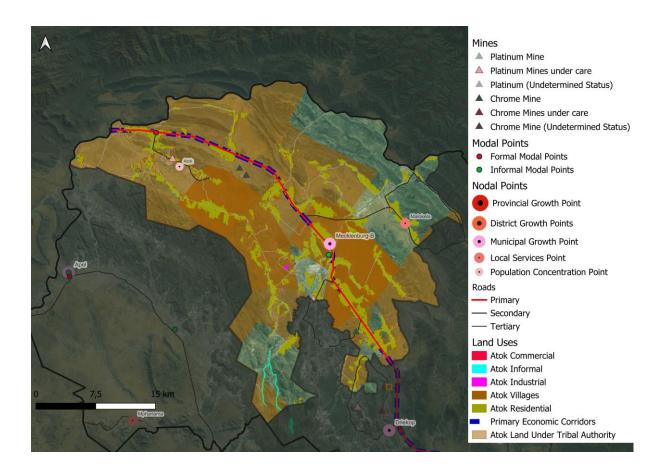

- Mafolo Park
- Kopanong

The figure below shows that the central part of the Atok region is under tribal authority and some isolated areas to the south and the northern areas are not under tribal authority. It is important that the tribal authorities be part of the planning processes of the region.

The planning processes should include the RIDP, IDP and any other sector planning instruments. The mining houses are critical economic drivers in the region, as such, they also need to form part of the strategic planning of the region.

The Social and Labour Plans (SLPs) should align to the RIDP and the IDP of the Fetakgomo Tubatse Local municipality.

The figure below shows the strategic water sources in the region are located on the northern side. It is important to preserve the strategic water sources. Everything must be done do protect the coontemination of these water sources.

## CHALLENGES

#### Access to water

**R37 Platinum Corridor Regional Offices** has a serious water challenge. The source of water is Sekhukhune District Municipality. The flow of water is not consistent. The facility is sometimes running without water for a maximum of two (2) days.

There is a water borehole which needs to be resuscitated. The infrastructure and technical department was requested to assist in resuscitating the water borehole and connect the water to the offices as an alternative water supply.

**The Mabopo DLTC** is having no source of water. The borehole was drilled, and it was discovered that there is no water from the bottom of the land. Currently, the facility is depending on the daily supply of water from the Sekhukhune District Municipality into the tanks.

**Mohlaletsi Thusong Services Centre** is without source of water. The facility is utilising pit toilets. The borehole was drilled only to discover that there is no water from the bottom of the soil. The Sekhukhune district municipality is delivering water into the tanks for cleaning and drinking purposes.

#### Sanitation

Sanitation is a very serious and big challenge as the facilities are utilising the septic tanks. The septic tanks do have uncomfortable odour. The septic tanks are also uneconomical as they are getting full within a very short space of time.

## **Community halls**

The R37 Platinum Corridor cluster is having two (02) community halls, namely, Pelangwe, Seokodibeng halls. The challenges are that the facilities are without running water. There are not boreholes and jojo tanks tanks to service the facilities.

## VEHICLE PARKING SPACE

All facilities have no proper sheltered parking spaces. Funds are needed to construct proper and secured parking spaces/areas.

## ELECTRICITY

The Atok Thusong Service Centre have no solar panels to serve as alternative power supply. The community halls need to be supplied with solar panels.

## STATE OF THE FACILITIES

The current state of all the facilities is dilapidated. Proper maintenance and repairs is needed to improve their status and to increase their life span.

## SECURITY FENCE

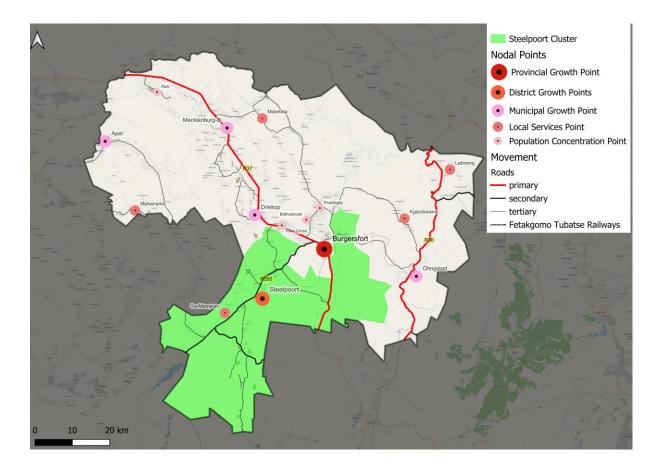

All facilities have concrete palisade fence around the yard. The palisade fence needs to be replaced with the modern clear view fence to be in line with the City Development Strategy.

## WI-FI CONNECTIVITY

R37 Platinum Corridor facilities have no wi-fi connectivity. The network connection is very poor.

## 2.12.4 STEELPOORT REGION

The figure below show the Steelpoort region is located on the southern part of the Fetakgomo Tubatse Local Municipality. The region us traversed by the R555 corridor, dividing the region into two parts.

The figure below shows that the Steelpoort region is characterised by settlements to the west of the R555 and on the western side of the R555 there are chrome and platinum mines. The mining activities are the main economic drivers in the region with the mines along the R555 and to the western side of the region. The main town in the region is Steelpoort which is categorised as the district growth point and the GaMampuru which is the local services point. There are a number of industrial areas to the northwestern side of the region and a number of commercial developments throughout the region. Steelpoort region is earmarked as the industrial hub. The region has the following catalytic projects:

- Special Economic Zone (SEZ)
- Airport
- Steelpoort Integrated roads and stormwater Master Plan

# FACILITIES AND THEIR CHALLENGES WITHIN REGIONAL OFFICE

## DRIVING LICENCE TESTING CENTRE

- Building needed to be extended to provider different services to the client
- -Camera and surveillance system need to be installed

## • Mapodile Stadium

-Water Shortage inside the stadium -Hydration and health concern -Sanitation and hygiene issues

• Thusong Service Centre

-Network Infrastructure and connectivity

- -Fences need to be electrified
- Mapodile Offices and Library

-No Parking space around offices

- Network Infrastructure and connectivity
- -Fence around the building

# 2.12. KPA SYNTHESIS:

| KEY<br>PERFOMANCE<br>AREAS | PROGRAMME<br>AREAS | KEY CHALLENGES  | CAUSE   | SOLUTION  |

### 2.13. COMMUNITY NEED ANALYSIS

The Municipal Systems Act No.32 of 2000 stipulates that the local community following from public participatory engagements of Fetakgomo Tubatse Local Municipality (FTLM) with communities and stakeholders' issues repeatedly surfaced as overarching needs of the community and thus are recognized as ward priority in this IDP/Budget.

The municipality applied the ward-based planning approach to allow ward committees, community development workers and ward councillors to deliberate on issues affecting their respective wards. Furthermore, this approach was implemented to include the local community in decision making, planning and generally allowing them to play an active part in their own development. This process culminated into the Regional Integrated Development Plans where the municipality was divided into regions that are made of homogeneous wards. This process culminated into six (6) regions, namely:

- Ohrigstad Region: The Agriculture and Tourism hub
- Burgersfort Region: Economic hub
- Steelpoort Region: Industrial hub
- Apel region: Innovation hub
- Atok Region: Platinum hub
- Praktiseer Region: Light industrial hub

The ward priorities list was submitted by ward councillors on the 02<sup>nd</sup> August 2024, in preparation for the development of Regional Integrated Development Plans workshops. The management held IDP-Technical committee session at the Forever resorts Blyde Canyon from 22– 25 October 2024 for the main purpose was for the alignment of the strategic plans developed by all internal departments with the development of the status quo of the 2025/26 IDP. The IDP Technical committee consists of senior management and broader management, and it is chaired by the Municipal Manager. In terms of the Standard Chart of Accountant Specific to Local government (mSCOA Version 6. 5) of the regional segments allows the local municipality to develop regional plans to fastrack service delivery therefore below is the scheduled of workshop undertaken at ward level in preparation of the RIDP:

The Regional workshops were as follows:

| CLUSTER        | WARDS                          | DATES          | VENUE                       |
|----------------|--------------------------------|----------------|-----------------------------|
| Orighstad      | 01, 24, 26                     | 6 August 2024  | Leboeng Community Hall      |
| Praktiseer     | 04, 05, 16, 22, 30, 23         | 7 August 2024  | Burgersfort Chamber         |
| Steelpoort     | 02, 06, 27, 28, 29, 31         | 8 August 2024  | Masha Disability Centre     |
| Atok           | 09, 10, 14, 15, 17, 32, 33, 34 | 3 August 2024  | Seokodibeng community hall  |
| Burgersfort    | 13,18,20,21,25                 | 14 August 2024 | Burgersfort Council Chamber |
| Apel           | 03, 35,36,37,38,39             | 15 August 2024 | Apel Council Chamber        |
| Praktiseer (2) | 07, 08, 11, 12, 19             | 16August 2024  | Sekiti Community Hall       |

On the 16<sup>th</sup> -18<sup>th</sup> of September 2024 the strategic planning unit( IDP) with the support of the Anglo-American Municipal Capability Partnership Programme (MCPP) held CDS vision 2043 and all senior managers and regional managers participated. The ward-based planning IDP desktop status quo analysis is an ongoing process whereby the municipality continuously retrieves information from various sources and integrates such information in the document. This process is conducted by the strategic planning unit (IDP) mostly assisted by stakeholders such as COGHSTA and the Sekhukhune District Municipality.

On the 05<sup>th</sup> of December 2024, IDP REP Forum session was conducted whereby EXCO members together with senior management, ward councilors; Community Development Workers, and Ward committee members attended and other stakeholders. The purpose for this session was to allow stakeholders to confirm the information contained in the 2025/2026 status quo analysis report.

Extensive public participation processes were conducted for the Draft 2025 / 2026 IDP/Budget documents. The municipality dedicated 07th – 22 May 2025 for public participation programs. The IDP/Budget public participation report is generated and comments from stakeholders is attached to IDP document for noting as annexure. The following sessions were undertaken for community consultation:

Please find the proposed Regions/ Cluster/ Dates/ Venues and Time for the 2025/2026 Draft Public Participation as follows:

| DATE       | STAKEHOLDERS                 | VENUE                           |

|    | Community Hall   | There is no community hall at all in the ward  |  |

# **CHAPTER 3: STRATEGIC INTENT**

# 3.1. Introduction

Section 35(a) and (b) of the Municipal Systems Act 32 of 2000 stipulates thus ,the principal strategic planning instrument which guides and informs all planning and development, and all decisions with regard to planning management and development, in the municipality; binds the municipality in the exercise of its executive authority, except to the extent of any inconsistency between a municipality's integrated development plan and national or provincial legislation, in which case such legislation prevails.

The IDP process is meant to drive decision making on areas such as municipal budgets, land management, promotion of local economic development and institutional transformation in a consultative, systematic, and strategic manner. The IDP, however, must guide the activities and investment decisions and service delivery of other spheres of government, government agencies, corporate service providers, Non-Government Organisations (NGOs) and the private sector within the municipal area.

# 3.2 The Strategic Approach

To develop the IDP, the Fetakgomo Tubatse Local Municipality embarked on a process that involved all departments, external stakeholders, labor movements and other spheres of government. The involvement of these stakeholders was geared towards the establishment of a common understanding of the internal and external environment in the municipality. The process began after the approval of the process plan in July 2022.

This strategic phase encompassed both the review of the performance of the municipality in the 2021 – 2022 financial years and the assessment of the municipal bio-physical, socio-economic, physical infrastructure. These were synthesised into key performance areas (KPA). Thereafter, began a process of developing the strategies and objectives for the 5-year term (2022-2027) taking into consideration of the situational analysis of the municipality.

Strategic intent for Fetakgomo Tubatse LM is expressed in terms of a hierarchy of strategies or a framework within which the municipality will operate, adopt a predetermined direction, and attempts to achieve its strategic goals. The hierarchy of strategic intent covers the vision, mission, value system, priorities, Key performance areas, strategic objectives, problem statements

emanating from the situational analysis, key interventions, outcomes, impact and key performance indicators (KPIs).

## 3.2.1. <u>The Vision</u>

A vision is a big picture and has many components that make up what you want to look like in future. It can be said that a vision statement describes what you desire to achieve in the long run, generally in a time frame of five to ten years, or sometimes even longer. In the deliberation on what is the ideal vision for Fetakgomo Tubatse LM should be, a decision was taken to retain the current vision, thus the vision for Fetakgomo Tubatse is:

#### "THE DEVELOPED PLATINUM CITY FOR SUSTAINABLE HUMAN SETTLEMENTS"

The slogan/ Motto: "Setšhaba se tla buna"

## 3.2.2. <u>The Mission</u>

Subsection 1 and 2 of section 152 of the Constitution is prescriptive in what the municipality must strive to achieve. It prescribes that the municipalities must plan and implement the objectives of local government within its financial and administrative capacity. The mission statement must ensure that the municipality adheres to the intent of the constitution for local government organisations. It was resolved that the mission for Fetakgomo Tubatse must be retained, thus the mission for Fetakgomo Tubatse LM is:

"Committed to providing efficient integrated services, radical socio-economic transformation, industrialization and enabling environment through partnerships for sustainable development".

This will be achieved through the following principles:

- Accountable through active community participation.
- Economic enhancement to fight poverty, inequality, and unemployment.
- Render accessible, sustainable, and affordable service.
- Municipal transformation and institutional development; and
- Sustainable livelihoods through environmental management.

### 3.2.3. **<u>The Values</u>**

Values are individual beliefs that motivate people to act one way or another. They serve as a guide for human behaviour. The Fetakgomo Tubatse adopted the following values:

| VALUES   | DESCRIPTIVE ANALYSIS  |  |
|--|---|--|
| High standard of professional<br>ethics  | Professionalizing local government is identified as essential<br>tenet of transformation of the sector. The Municipality<br>upholds high standard of professional ethics as enunciated in<br>the Constitution. Hard work, service to the people, humility,<br>honesty, and respect are integral components of professional<br>values. Respect not only the laws of the land but also one<br>another in a performance relationship - this emphasises<br>mutual respect and regard for dignity of a person or his/her |  |
| Community Driven   | responsibility.<br>Operating on the principles of transparency, participation,<br>developmental local empowerment, demand-<br>responsiveness, greater downward accountability, and<br>enhanced local capacity   |  |
| Integrity  | Having integrity means doing the right thing in a reliable way.<br>It's a personality trait that we admire, since it means a person<br>has a moral compass that doesn't waver<br>Behavior marked by polished manners or respect for others  |  |
| CourtesyBehavior marked by polished manners or respect for<br>Honesty or truthfulness is a facet of moral chara<br>connotes positive and virtuous attributes such as<br>truthfulness, straightforwardness,<br>straightforwardness of conduct, along with the ab<br>lying, cheating, theft, etc |   |  |
| Openness and Transparency Tell people how the Municipality runs, its depart<br>and who oversees what function and services.  |   |  |
| Accountability   | Accountability means showing up and setting out to accomplish the things you'd said you'd do. It's about taking personal responsibility for your work   |  |
| Transparency   | Transparency is the quality of being easily seen throug<br>while transparency in a business or governance conte<br>refers to being open and honest  |  |

### 3.2.4. <u>The Strategy</u>

The Fetakgomo Tubatse strategy is developed from a combination of the Logic Frame and the Theory of Change methodology. In the methodology followed, the strategic objectives and developed from the priority area and KPAs. These strategic objectives are the big picture goals for the municipality. In their nature, strategic objectives describe what the municipality will do to try to fulfil its mission. Therefore, strategic objectives are performance goal. These strategic goals include specific financial and non-financial objectives and results a municipality aims to achieve over a specific period, usually the next three to five years.

Fetakgomo Tubatse decided on the following strategic objectives. These objectives are aligned to the municipal priority areas and KPAs. The table 3.4 depicts the alignment of the priority areas, KPAs and the Strategic Objectives.

| PRIORITY AREA                 | KPA   | STRATEGIC OBJECTIVES   |
|-------------------------------|---|--|
| Access to Basic Services      | Basic Services Delivery & Infrastructural Development         | To facilitate basic services<br>delivery and infrastructural<br>development / investment                       |
| Job Creation                  | Local Economic<br>Development                                 | To create an environment<br>that promotes growth and<br>development thereby<br>facilitating job creation       |
| Spatial Rationale             | Spatial Rationale   | To promote integrated<br>human settlements and<br>agrarian reform  |
| Organisational<br>Development | Municipal Transformation<br>and Organisational<br>Development | To build municipal capacity<br>by way of raising institutional<br>efficiency, effectiveness, and<br>competency |
|                               | Community<br>Services/Development                             |  |
| Financial Viability           | Financial Viability   | To improve overall municipal<br>financial management   |
| Good Governance               | Good Governance & Public<br>Participation                     | To promote a culture of<br>participatory   |

The table below provides a broad conceptual overview of Outcome Nine (09) which has profound bearing on local government, "A responsive, accountable, effective and efficient local government system" with seven (07) outputs:

| OUTPU  | OUTPUT AND MEASURES / CONCEPTUAL OVERVIEW |  |  |
|--------|---|--|--|
| Output | Implement a differentiated                | Credible & simplified IDPs for delivery of municipal |  |
| 1      | approach to municipal                     | services. Entail revenue management &                |  |
|        | financing, planning & support             | plan/strategy. Ensure that critical posts (MM, CFO,  |  |
|        |   | Engineer/Technical Services, Town Planner) are       |  |
|        |   | audited & filled by competent & suitably qualified   |  |
|        |   | individuals.   |  |
| Output | Improving access to basic                 | In respect of this output, the following targets are |  |
| 2      | services                                  | set for 2023 and beyond: Water (100% supply),        |  |
|        |   | sanitation (100%), refuse removal (75%),             |  |

|        |                            | electricity. Establish Bulk Infrastructure Fund to   |
|--------|----------------------------|--|
|        |                            | unlock delivery of reticulation services.            |
| Output | Implementation of the      | Initiatives that provide work opportunities to       |
| 3      | Community Work             | communities at local level e.g. through functional   |
|        | Programme                  | co-operatives and EPWP.                              |
| Output | Actions supportive of the  | Procure well located land. Release of land for low   |
| 4      | human settlement outcome   | income & affordable housing to support delivery of   |
|        |                            | housing units. The objective is to create a well-    |
|        |                            | functioning, integrated & balanced rural settlements |
| Output | Deepen democracy through   | Strengthen people-centred approach to                |
| 5      | a refined Ward Committee   | governance & development (i.e. community             |
|        | model                      | participation, ward committees etc.)                 |
|        |                            |  |
| Output | Administrative & financial | Sustain clean audit. Monthly average collection rate |
| 6      | capability                 | on billing to rise to 90%. Reduce debtors (should    |
|        |                            | not be more than own revenue)                        |
| Output | Single widow of c          | Finalization of changes on powers & functions.       |
| 7      | o-ordination               | Review of legislation & policies (implementation     |
|        |                            | more by national & provincial government)            |

## 3.2.5. <u>Municipal Swot Analysis</u>

| STRENGHTS  | WEAKNESSES   |
|--|--|
| Adequate systems in place, i.e., plans, policies procedures  | Non-implementation of By-Laws, policies, and systems (plans and policies, etc.)  |
| Improving financial management and viability of municipality | No compliance to existing policies, management, and<br>High level of grievances amongst staff  |
| Good relationship with Magoshi                               | Unavailability of budget to accommodate the structure,<br>high level of vacancies, loss of institutional memory,<br>duplication municipal functions by appointing service<br>providers |
| Substantive appointments in key<br>municipal positions       | No electronic record system  |
| Financial viability  | High unemployment and especially amongst youth   |
|  | Volatile community procurement   |
|  | Departmental By-Laws not published   |
|  | Delayed appointment of consultants and limited<br>capability for expenditure   |

|   | Communities have insufficient access to social facilities,<br>and there is a lack of social facilities planning and<br>partnership<br>High levels of unemployment of the youth<br>Inadequate coordination of Skills Interventions, youth,<br>and other development policies in municipality |
|---|---|
| OPPORTUNITIES   | THREAT  |
| Community radio stations and<br>newspapers in place and functional<br>(Good for communication and outreach) | Inadequate infrastructure such as roads, bridges  |
| Job Creation opportunities  | inadequate water provision/water shortages  |
| SEZ – Special Economic Zone   | political interference in day-to-day municipal operations   |
| Water Source development  | Acting officials in key municipal functions   |
| Minerals reserves and presence of<br>mining industry in the municipality                                    | Dependence on external service providers  |

Based on the aligned priority areas, KPAs and the strategic objectives, the municipality identified and developed the following areas:

The strategic problems (Problem statements): These problem statements are the identification of the issue(s) and causes that prohibits the municipality from achieving their objectives. Sometimes these could include the effects of the problem in the running of the municipality or effect on the services delivery mandate.

The key intervention(s): Key interventions are high level programmes and projects that the municipality need to embark upon to address the strategic problems identified. This could be one intervention that addresses several problems.

Outcome statement: The outcomes are an indication of what will happen if the intervention is implemented.

Impact statement: The impact draws the municipality to their core mandate. This is usually customer/ citizen oriented and is long term effect of the implementation of the interventions.

The Key Performance Indicators: This is the measurement that will be used to assess if the objective / intervention/outcome has been met. The strategic indicators could be an index (made of several indicators).

The tables below depict the alignment the problem identified in the analysis phase and the strategies employed to address these.

|             | KPA                  | STRATEGIC<br>OBJECTIVES  | PROBLEM<br>STATEMENT  | KEY<br>INTERVENTION(S)  | OUTCOME  | IMPACT  |
|-------------|----------------------|--|---|---|--|---|
| Output<br>3 | Spatial<br>Rationale | Creating and<br>promoting<br>integrated<br>human<br>settlements. | Scattered<br>spatial<br>patterns –<br>Not<br>compacted<br>development | Densification of<br>settlements<br>Regenerate urban<br>and rural areas<br>Integrated<br>transportation<br>Urban design of<br>urban and rural<br>areas<br>Implementation<br>SPLUMA (wall to<br>wall) | Spatial<br>restructuring-<br>Clear view<br>on the needs<br>of the urban<br>and rural<br>strategy<br>development<br>process and<br>needs of the<br>Local<br>Municipality. | Improved spatial<br>structure and compact<br>and accessible<br>settlements.<br>Sustainable human<br>settlement for better<br>living |

## **CHAPTER 4: PROJECT PHASE**

This chapter depicts key projects for the coming year as aligned to the budget. A mixture of both top layer and some departmental programmes and project. The top layer and departmental programmes and projects are aligned with the status quo analysis report which was adopted by council around December 2024 and the report stated the challenges emanating from all 39 wards. The strategies were also developed trying to present solutions linked to challenges, and therefore projects and programmes that are in turn linked to budget for the coming 3-year cycle (MTREF). Great effort has been taken to align the projects with the interventions proposed in the Back-to-Back Strategy and Action Plan. All the below projects are divided according to Key Performance Areas, projects description/name, strategic objectives smart indicators and targets.

The projects/programmes identified and approved by council will then be aligned to the Service Delivery Budget Implementation Plan (SDBIP) for the council and administration to monitor quarterly implementation or progress of the projects/programmes. Furthermore, the chapter will outline projects from other stakeholders as part of alignment and integration of programmes to be undertaken within our Municipal jurisdiction.

The main purpose of this chapter is to ensure that there is service delivery programmes and projects which are aligned with indicators and targets for the next financial for smooth implementation processes. In terms of Section 25(1: a) of Local Government: Municipal Systems Act No.32 of 2000(as amended) stipulates that a municipality links, integrates and coordinates plans and takes into account proposals for development of the municipality.

KPA1. Spatial Rationale

The Objective: To promote integrated human settlements (Output 04)

# **CHAPTER 5: INTEGRATION PHASE**

#### INTRODUCTION

This chapter presents an integration phase of this IDP. It sums up the overarching frameworks, policies, strategies, and sector plans that seek to synergic ally address the challenges identified in the analysis phase and promote the principles of sustainable development. These will be discussed in accordance with the KPAs.

#### ALIGNMENT WITH SECTOR PLANS

The Municipal Systems Act states that municipalities must exercise their executive and legislative authority within the constitutional system of co-operative government. The IDP would be aligned with national and provincial governments' plans. Key development plans such as the National Development Plan and the Limpopo Development Plan to ensure alignment with national and provincial development priorities.

#### SECTOR PLAN DESCRIPTION **STATUS** FTLM Spatial The FTLM has developed its Spatial SDF was adopted by Council in 2020 under Council Resolution Development Development Framework in 2018 in terms of Framework (SDF), the provision of section 12 of Spatial Planning no: OC14/2020 and it was 2020 and Land Use Management Act, Act 16 of gazetted on the 14 February 2020. 2013. Building FTLM FTLM adopted the building regulations By-Adopted by council in 2018 regulations Law, 2018 in terms of section 12(3) of the (council resolution number -By-Law, 2018 Municipal Systems act, 2000(Act No.32 (OC06/2018) and gazetted on the 2000) and the National Building regulations 21st of September 2018. and Building standard Act, 1977. FTLM Land Use The aim of the by-law is to regulate land use By-law has been approved by the Council Management Bymanagement and spatial (Council resolution planning law, 2018. development (future planning) as mandated OCO5/2018) and gazetted on the by the SPLUMA, 2013. 05/10/2018). FTLM LUS was adopted by FTLM LUS, 2021 FTLM Land Use Scheme is being developed in terms of the provision of Section 23(1) of council in 2021. (Council and the Spatial Planning and Land Use resolution OCO5/2021) Management, Act 16 of 2013. gazetted on the 18/06/2021). FTLM The Land Disposal Policy was Land The FTLM has adopted the Land Disposal Policy in 2017 and The main objective of this adopted by council in 2017 Disposal Policy, 2017 policy is to provide for the management, lease (Council resolution number and disposal of Council's immovable property (SC39/2017) in compliance with the Supply Chain Management Policy. FTLM Housina The Housing Sector Plan was adopted by The Land Disposal Policy was Sector Plan, 2018 Council in 2018. The Housing Sector Plan adopted by council in 2018 provides guidelines for the delivery of (council resolution number adequate housing as enshrined in Sec 26(1) (SC26/2018) of the Constitution of the Republic of South Africa.

#### **KPA 1: SPATIAL RATIONALE: SECTOR PLANS**

| SECTOR PLAN  | DESCRIPTION  | STATUS  |
|--|--|---|
| FTLM Land<br>Invasion<br>Prevention<br>Strategy, 2018                    | The FTLM has developed a Land Invasion<br>Prevention Strategy in 2018. The Land<br>Invasion Prevention Strategy is to explore<br>mechanisms that can be used to prohibit<br>invasion against municipal owned land which<br>will in turn assist the Municipality to regulate<br>and maintain land development within the<br>jurisdiction of the Municipal area.   | The FTLM Land Invasion<br>Prevention Strategy was<br>adopted by council in 2018   |
| FTLM Land Audit<br>Report, 2019<br>Burgersfort<br>Precinct Plan,<br>2022 | <ul> <li>The purpose is to protect and identify municipal land and record the ownership of our citizens in FTLM jurisdiction.</li> <li>A precinct plan is a planning tool that sets out a vision for the future development of a place. The Burgersfort Precinct Plan will establishes a planning and management framework to guide development and land-use change within a delineated area with the aim of achieving sustainable environmental, social and economic objectives.</li> </ul> | The FTLM Land Audit Report ,<br>2019 was adopted by Council in<br>2019<br>Burgersfort Precinct Plan, 2022<br>was adopted by council in 2022,<br>council resolution no.<br>SC15/2022 |
| Steelpoort<br>Precinct Plan,<br>2022                                     | A precinct plan is a planning tool that sets out<br>a vision for the future development of a place.<br>The Burgersfort Precinct Plan will establishes<br>a planning and management framework to<br>guide development and land-use change<br>within a delineated area with the aim of<br>achieving sustainable environmental, social<br>and economic objectives.  | Steelpoort Precinct Plan, 2022<br>was adopted by council in 2022,<br>ouncil resolution no.<br>OC89/2022   |
| Apel Precint Plan,<br>2022   | A precinct plan is a planning tool that sets out<br>a vision for the future development of a place.<br>The Apel Precinct Plan will establishes a<br>planning and management framework to<br>guide development and land-use change<br>within a delineated area with the aim of<br>achieving sustainable environmental, social<br>and economic objectives.   | Apel Precinct Plan, 2022 was<br>adopted by council in 2022<br>council resolution no.<br>OC04/2022   |
| Burgersfort<br>Densification<br>Policy, 2022                             | The policy is the strategic framework that<br>seeks to guide the intensification of<br>development and the creation of mixed-use<br>developments that include residential<br>opportunities within the urban development<br>boundaries of Burgersfort and Steelpoort<br>towns.  | Densification policy, 2022 was<br>adopted in 2022, Council<br>resolution no. OC 08/2022   |
| Integrated<br>Transport Plan,<br>2021                                    | The Fetakgomo Tubatse ITP maps an<br>organizational process. through which the<br>planning and delivery of elements of transport<br>systems are brought together. across modes,<br>sectors, operators and institutions, with the   | Integrated Transport Plan, 2021<br>was adopted in 2021, Council<br>resolution no. SC53/2021   |

| SECTOR PLAN                             | DESCRIPTION  | STATUS   |
|---|--|--|
|   | aim of increasing the net environmental and societal benefits.   |  |
| Urban<br>Regeneration<br>Strategy, 2021 | This strategy involves the investment of public<br>money or private finance into areas in need of<br>lasting improvement. It focuses on the urban<br>regeneration of Burgersfort and Steelpoort<br>precincts.  | Urban Regeneration Strategy,<br>2021 was adopted in 2021,<br>Council resolution no.<br>OC61/2021 |
| Human Settlement<br>Master Plan         | The Human Settlement Plan initiative aims to<br>assist the municipality in fulfilling its functions<br>as set out in Section 9 of the National Housing<br>Act (Act 107 of 1997). As the demand for<br>human settlement opportunities continues to<br>increase, the supply must be negotiated in the<br>limited availability of well-located, affordable<br>land, bulk infrastructure capacity, and rapid<br>urbanisation.  | Human Settlement Master Plan   |
| Building Rubble<br>Policy               | Fetakgomo Tubatse Local Municipality<br>recognises the economic potential of rubble<br>recycling, the environmental protection, and<br>enviro-spatial sustainability. This policy is<br>enacted for the municipality to enforce building<br>rubble management and protection of the<br>environment from illegal disposal of building<br>rubble.  | Building Rubble Policy   |
| Urban& Rural<br>Strategy                | The Fetakgomo Tubatse Local Municipality is<br>positioning itself as a "platinum city" by<br>leveraging its unique strengths and potential.<br>The Municipality has commissioned an<br>Integrated Urban and Rural Development<br>Strategy, which is pivotal in balancing growth<br>and development across both urban centres<br>and rural areas. This strategy is essential for<br>creating dynamic micro-city centres in rural<br>regions, ensuring they are not left behind in the<br>broader economic development of the<br>Municipality. | Urban& Rural Strategy  |
| Land Acquisition<br>Strategy            | Provide a framework for the acquisition of<br>capital immovable assets in compliance with<br>policy and in a manner that supports strategic<br>interventions of the national and provincial<br>spheres of government and the strategic<br>objectives of Fetakgomo Tubatse Local<br>Municipality as contained in the Spatial  | Land Acquisition Strategy  |

#### KPA: 2 INSTITUTIONAL TRANSFORMATION AND ORGANISATIONAL DEVELOPMENT Human Resource Policies (The FTM has managed to develop, consolidate, and adopt its Human Resource Policies including)

| Sector Plan     | A brief description and overview  |
|-----------------|---|
| Bursary Policy  | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022          |
|                 | PURPOSE:  |
|                 | The purpose of this policy is to regulate and provide a framework through which financial |
|                 | aid and support can be provided to employees, deserving and needy students for            |
|                 | advancement of their studies.   |
| COVID-19        | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022          |
| OHS Policy      | PURPOSE:  |
|                 | The policy, as per Government Regulations and Directives intend to:                       |
|                 | Ensure measures are taken by Fetakgomo Tubatse Municipality under the OHSA to             |
|                 | minimize the spread of COVD $-19$ ; Implement special measures in order to prevent the    |
|                 | transmission of the virus; Provide and maintain as far as reasonably practicable , a safe |
|                 | working environment without risks to the health of employees and to eliminate and         |
|                 | mitigate hazards or potential hazards; To ensure as far as reasonably practicable , that  |
|                 | all persons who may be directly affected by their activities are not exposed to hazards   |
|                 | to their health and safety.   |
| Overtime        | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022          |
| Policy          | PURPOSE:  |
|                 | To provide a fair and justifiable basis compensation of overtime in the Municipality,     |
|                 | provide a framework for the regulation of overtime and adherence to Legislation relating  |
|                 | to overtime and conform to the determination of earnings thresholds as issued by the      |
|                 | Minister of Labour from time to time and also to provide control mechanisms on the        |
|                 | performance of overtime by employees.   |
|                 |   |
| Recruitment,    | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022          |
| Selection and   | PURPOSE:  |
| Appointment     | The employment policy and its implementation is fundamentally aimed at matching           |
| of Staff Policy | the human resources to the strategic and operational needs of the Municipality and        |
|                 | ensuring the full utilization and continued development of employees. All aspects of      |
|                 | the staffing, structuring, recruitment, selection, interviewing and appointment of        |
|                 | employees will be non-discriminatory and will afford applicants equal opportunity to      |
|                 | compete for vacant positions, except as provided in this policy with reference to         |
|                 | affirmative action and employment equity.   |

| Sector Plan     | A brief description and overview  |
|-----------------|---|
| Transfer,       | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Secondment      | PURPOSE:  |
| and Acting in   | To ensure that employees are seconded, transferred, and appointed to act in                 |
| Higher or       | higher positions in line with the Municipality's strategies of succession planning,         |

|                 | rules for the payment of subsistence and travelling expenses for attendance of              |
|                 | approved municipal businesses or activities.  |
| Travel Policy   | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| for Councillors | PURPOSE:  |
|                 | To provide the municipality with a comprehensive travel and out of pocket expenses          |
|                 | policy framework for councillors for implementation within the municipality and sets out    |
|                 | the basis for the payment of travel allowances and out of pocket expenses                   |
|                 | for official purposes.  |
| Records         | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Management      | PURPOSE:  |
| Policy          | To provide specific requirements under which municipal records are effectively and          |
|                 | efficiently managed throughout their lifecycle and promotion of access to information.      |
| Employee        | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Assistance      | PURPOSE:  |
| Policy          | To provide guidance and standard framework of establishing and managing an                  |
|                 | Employee Assistance Programme.  |
| Employment      | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Equity Policy   | PURPOSE:  |
|                 | To address under-representation of designated groups in all occupational categories         |
|                 | and levels in the workforce. Specifically, under-representation of black people, as         |

| Sector Plan  | A brief description and overview  |
|--------------|---|
|              | defined in the Act and people with disabilities, identify and developing strategies for the |
|              | elimination of employment barriers in the Employment Policies and Practices of the          |
|              | Municipality, develop business-orientated strategies for the achievement of numerical       |
|              | goals and timetables for the implementation of affirmative action measures, establish       |
|              | procedures for the monitoring and enforcement of the implementation process.                |
| Fleet        | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Management   | PURPOSE:  |
| Policy       | To provide specific conditions under which the Municipality must manage provision of        |
|              | reliable transport, acquisition, repair, and maintenance of fleet.                          |
| Housing      | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Allowance    | PURPOSE:  |
| Policy       | To guide the Municipality in implementation of Homeowners' Allowances.                      |
| Human        | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Resources    | PURPOSE:  |
| Planning     | To provide a standard framework for overall human resource planning, organisationa          |
| Policy       | structures, and developing annual HR Plan in line with the Municipality's business          |
|              | planning and Integrated Development Plan (IDP) process.                                     |
| Internship.  | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Experiential | PURPOSE:  |
| and          | To provide internship, learnership and experiential training to unemployed graduates        |
| Learnership  | and non - graduates within the Municipal jurisdiction. The Municipality is also committee   |
| Policy       | to create an environment that will assist the youth with relevant skills, expertise and     |
|              | experience to enter the job market.   |
| Leave        | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Management   | PURPOSE"  |
| Policy       | To guide all municipal employees on requirements for application of various types o         |
|              | leave available to them.  |
| Legal Aid    | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Policy       | PURPOSE:  |
|              | To provide a standard framework for provision of legal aid to employees and councillors     |
|              | where appropriate.  |
| Sexual       | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022            |
| Harassment   | PURPOSE:  |
| Policy       |   |
| 5            |   |

| Sector Plan   | A brief description and overview  |
|---------------|---|
|               | To ensure that employees are not subjected to any form of sexual harassment,                  |
|               | persistent, unsolicited and unwanted sexual advances or suggestions made by one               |
|               | employee to another, regardless of gender and / or sexual orientation.                        |
|               |   |
| Smoking       | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022              |
| Policy        | PURPOSE:  |
|               | To provide a healthy workplace environment, and to protect the health of all employees,       |
|               | councillors and municipal clients at the workplaces.  |
| Staff         | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022              |
| Retention     | PURPOSE:  |
| Policy        | To allow Council to effectively retain their competent staff by providing information on      |
|               | staff retention and some possible staff retention techniques, retain competent staff          |
|               | whose services are regarded as critical to achieve the mission and vision of the              |
|               | Municipality, identify individual's potential for assuming a higher degree of responsibility, |
|               | help develop a skills base for succession planning, identify posts which require              |
|               | specialized skills and to determine the level of scarcity thereof and create and sustain      |
|               | a pleasant humane working environment where employees are given the opportunity to            |
|               | thrive.   |
| Training and  | This policy was adopted by council on the 30 June 2022, Resolution No: SC41/2022              |
| Development   | PURPOSE:  |
| Policy        | To Support the achievement of the municipality's goals set out in the Integrated              |
|               | Development Plan by providing critical skills that ensure the delivery of quality services,   |
|               | promote the development and retention of competent municipal staff, including the             |
|               | development of technical, professional and specialist staff who have the required             |
|               | qualifications and skills, support the employment equity objectives, provide effective        |
|               | workplace learning and development practices, including coaching and mentoring, on-           |
|               | the-job learning and opportunities for the practical application of skills in the workplace   |
|               | and support and reinforce other capacity-building programmes in the municipality.             |
| Fetakgomo     | The objectives of institutionalising The framework is reviewed annually. The                  |
| Tubatse Local | Performance Management system, framework has also included Performance                        |
| Municipality  | beyond the fulfilling of legislative management and development (PMDS)                        |

| Sector Plan  | A brief description and overview  |
|--------------|---|
| ICT Firewall | This policy is adopted by council on the 30 June 2023, Resolution No: OC148/2023.           |
| Policy       | This policy aims at establishing a control point where access controls may be enforced      |
|              | thus controlling network connectivity and network services.                                 |
| ICT Incident | This policy is adopted by council on the 30 June 2023, Resolution No: OC148/2023.           |
| and Problem  | This policy aims at ensuring that unexpected disruptive events are managed and              |
| Management   | responded to with the objective of controlling the impact to the municipality's business    |
| Policy       | within acceptable levels.   |
| ICT Network  | This policy is adopted by council on the 30 June 2023, Resolution No: OC148/2023.           |
| Management   | This policy aims at establishing standards and directives for the allocation,               |
| Policy       | administration and usage of IP Addresses throughout the municipality's network              |
|              | infrastructure.   |
| ICT Security | This policy is adopted by council on the 30 June 2023, Resolution No: OC148/2023.           |
| Policy       | This policy aims at providing the municipality with minimum rules, guidelines and           |
|              | standards to apply an effective and consistent level of security to all information and     |
|              | communication systems that process the municipality's information.                          |
| ICT User     | This policy is adopted by council on the 30 June 2023, Resolution <b>No: OC148/2023</b> .   |
| Account      | This policy aims at establishing minimum rules, guidelines and standards for passwords      |
| Management   | creation and management used to login to the municipality's ICT.                            |
| Policy       |   |
| ICT Risk     | This policy is adopted by council on the 30 June 2023, Resolution <b>No: OC148/2023</b> .   |
| Management   | This policy aims at promoting public sector risk management framework to create a           |
| Policy       | favourable risk management culture at all levels within the municipality and to improve     |
|              | risk transparency.  |
| Legal Policy | The Legal Policy and Procedure Council Resolution No. (C42/2014). The purpose of this       |
| and          | Legal Services Policy and Procedure is to define the scope of legal services provided       |
| Procedure    | by the Municipality; define the responsibilities of officers or consultants involved in the |
|              | provision of legal services; define the responsibilities of employees within the            |
|              | Municipality in relation to accessing legal services; and establish procedures for the      |
|              | management of legal services and matters.   |
| ICT Firewall | ICT Firewall Policy Council Resolution No. (C43/2014). The purpose of this ICT Firewall     |
| Policy       | Policy is to allow or block unauthorized network or Internet devices and services sending   |
|              | traffic or receiving traffic over a network. To define standards for provisioning security  |
|              | devices owned and/or operated by FTM. The main objective is to prevent exploitation         |
|              | of insecure services, restrict inbound/outbound traffic from unregistered devices, control  |

| Sector Plan   | A brief description and overview   |
|---------------|--|
|               | inbound/outbound access to/from specific services or devices and monitor traffic volumes; to provide guidance on when firewalls are required or recommended. |
| Information   | The FTM developed Information Technology Backup Policy Review and adopted  |
| Technology    | Council Resolution No: C70/2014. The purpose of this policy) must be copied onto   |
| Backup Policy | secure storage media on a regular basis (i.e., backed up), for the purpose of disaster   |
| Review        | recovery and business resumption. This policy outlines the minimum requirements for  |
|               | the creation and retention of backups. Special backup needs which exceed these minimum requirements, should be accommodated on an individual basis.          |

#### **BY-LAWS**

The following by-laws exist within the Municipality:

| Sector Plan     | A brief description and overview   |
|-----------------|--|
| Standard Child  | The By-law provides for procedures, methods and practices to regulate child care       |
| Care Facilities | facilities.  |
| By-Law          |  |
| By-Law Relating | The By-law provides for procedures, methods and practices to regulate the utilisation  |
| To Streets      | of streets.  |
| Billboards By-  | It provides for procedures, methods and practices to regulate billboards.              |
| Law             |  |
| Building        | It protects public health and safety as it relates to construction and occupancy of    |
| Regulations By  | buildings and structures. It further promotes good practice in the design and          |
| Law             | construction of buildings for people in or around the buildings and others affected by |
|                 | the buildings.   |
| Fetakgomo Atok  | This policy seeks to promote cost effective, integrated, efficient and sustainable     |
| Thusong Service | service provision. It attempts to ensure equitable and effective access to government  |
| Centre (TSC)    | information and services to the people, thereby building partnership between           |
| Policy          | government, local communities, civil society and private sector.                       |
| (CSC03/09)      |  |

#### KPA: 3 BASIC SERVICE DELIVERY AND INFRASTRUCTURE PLANNING: SECTOR PLANS

| Sector Plan     | A brief description and overview  | Status |
|-----------------|---|--------|
| Water           | The plan seek to achieve the following key objectives: Analyze the current        |        |
| Services        | level of services to the communities, determine the desired level of              |        |
| And             | services by the community, determine future demand and forecasts,                 |        |
|                 | lifecycle of assets including background data, routine maintenance plan           |        |
| maintenance     | and information flow requirements.  |        |
| strategy        |   |        |
| Water Sector    | The FTM has and reviewed the Water Sector Plan in the 2006/2007                   |        |
| Plan            | Financial Year. The plan was adopted by the Council in the 2007/2008              |        |
|                 | financial year. The ultimate goal of the plan is to facilitate and influence      |        |
|                 | the provision of portable water within all areas of Fetakgomo. The                |        |
|                 | objectives include the integration of the water sector plan with the overall      |        |
|                 | water needs outlined in this IDP and to consider various environmental            |        |
|                 | requirements of water for economic development.                                   |        |
| Roads and       | This Roads and Stormwater Management Maintenance Plan serves as a                 | Draft  |
| stormwater      | roadmap for the responsible management and maintenance of the                     |        |
| management      | Fetakgomo Tubatse Local Municipality's (FTLM) road network and                    |        |
| maintenance     | stormwater infrastructure. It outlines the municipalities commitment to           |        |
| plan            | ensuring the safety, accessibility, and sustainability of these critical assets   |        |
|                 | for community's benefit.  |        |
|                 | The FTLMs roadways are the lifelines of the municipality, providing               |        |
|                 | essential connections for daily commutes, emergency response, and the             |        |
|                 | transportation of goods   |        |
| Integrated      | Integrated Roads and Stormwater Master Plans for 5 focus areas, namely,           | Draft  |
| Roads and       | Burgersfort, Steelpoort, Ohrigstad, Mapodile and Hoeraroep. The aim of            |        |
| stormwater      | the masterplan is based on the following:   |        |
| masterplan      |   |        |
|                 | <ul> <li>The existing extent and classification of the road network.</li> </ul>   |        |
|                 | • The existing utilisation of the road network, i.e. traffic volumes on           |        |
|                 | the road network in relation to the existing capacity of the road                 |        |
|                 | network.  |        |
|                 | The existing deficiencies in the road network (congestion and poor                |        |
|                 | condition);   |        |
|                 | <ul> <li>Mitigation measures to address the deficiencies (I.e. either</li> </ul>  |        |
|                 | capacity improvements or demand management);                                      |        |
|                 | <ul> <li>The investigation into the impact of the Spatial Development</li> </ul>  |        |
|                 | Framework (SDF) and the expected traffic generation within the                    |        |
|                 | FTLM and the impact on major road network.  |        |
|                 | <ul> <li>Determine the road classification (hierarchy) of proposed new</li> </ul> |        |
|                 | routes;   |        |
|                 | Prepare a Roads Master Plan report and layout plans showing the future            |        |
|                 | required road reserves;   |        |
| Electrification | he Master Plan is premised on achieving certain goals that have been set          | Draft  |
| masterplan      | for the electricity sector. Due to the uncertainty over the planning horizon,     |        |
|                 | some assumptions are made regarding demand projections and the                    |        |
|                 | economic outlook. Security of supply standards are set for generation and         |        |

| Sector Plan                | A brief description and overview  | Status  |
|----------------------------|---|---|
|                            | transmission (in terms of supply adequacy) and interventions are<br>proposed that are necessary to achieve the respective<br>adequacy measures, given projections about demand growth   |   |
| Electrification<br>license | Application submitted to the National Energy Regulator of South Africa<br>(NERSA) to be issued with licenses to operate an Electricity Distribution<br>network and license for electricity trading on green fields. The tariffs for<br>the customers will be based on the cost of supply studies to be conducted<br>by the municipality on approval of the license by NERSA | Submitted<br>to NERSA<br>and now of<br>public<br>participation<br>stage |

### KPA: 4 LOCAL ECONOMIC DEVELOPMENT: SECTOR PLANS

| Sector Plan           | A brief description and overview  | STATUS   |
|-----------------------|---|--|
| Local Economic        | The newly merged municipality is  | LED strategy adopted by council March 2024   |
| Development           | currently in progress to have the   | Resolution no OC 36/2024   |
| Strategy              | two LED Strategies rationalized.  |  |
|                       | The framework is need to align to   |  |
|                       | the municipal SDF, LUMS and   |  |
|                       | NDP. The framework should be  |  |
|                       | inclusive of a Marketing Strategy,  |  |
|                       | Tourism Strategy and guide the  |  |
|                       | establishment of the SEZ within   |  |

#### **KPA: 5 FINANCIAL VIABILITIES: SECTOR PLANS**

| Sector Plan   | A brief description and overview  |
|---|---|
| Property Rates Policy   | The Property Rates Policy of the Fetakgomo Tubatse Municipality ("the Policy") is created under the auspices of section 229 of the Constitution of South Africa, Act 108 of 1996 ("the Constitution") which entitles municipalities to impose rates on property, and section 3 of the Local Government: Municipal Property Rates, Act 6 of 2004 ("the Act") that mandates it to adopt a rates policy consistent with it on the levying of rates on ratable property.  |
| Tariff policy   | A tariff policy must be compiled, adopted and implemented in terms of Section 74<br>of the Local Government: Municipal Systems Act 2000, such policy to cover,<br>among other things, the levying of fees for municipal services provided by the<br>municipality itself or by way of service delivery agreements  |
| Principles and policy on<br>credit control and debt<br>collection | Section 152 (1) (b) of the Constitution of the Republic of South Africa Act 108 of 1996 ('the Constitution') provides that one of the objects of local government is to ensure that the provision of services to communities occurs in a sustainable manner.  |
| Debt Impairment Policy  | <ul> <li>The purpose of this policy is to:</li> <li>To set out a methodology for the impairment of receivables the municipality in line with the applicable accounting standards.</li> <li>To ensure that sufficient allowance is made for the impairment of receivables in the financial statements.</li> <li>Ensure that receivables disclosed in the financial statements are stated at amounts that are deemed collectable; and</li> <li>To promote transparency as required by sections 215 and 216 of the Constitution when dealing with receivables and debt.</li> </ul>   |
| Write-Off Policy  | The purpose of this policy is to ensure that the principles and procedures for writing off irrecoverable debt are formalised.   |
| Cost Containment Policy   | The objective of the policy is to ensure that resources of the municipality are used effectively, efficient and economically by implementing cost containment measures.   |
| Revenue Enhancement<br>Strategy                                   | Revenue Enhancement Plan for the Fetakgomo Tubatse Local Municipality has<br>developed a revenue enhancement plan. Its main objectives are to put in place<br>systems and programs that will assist the municipality in maximizing its revenue<br>collection. The plan is aligned with the PGDS, NSDP FTLM LED strategy and<br>other provincial and national documents that inform growth and development.<br>The FTLM has adopted the Revenue Enhancement. The strategy is intended to<br>enhance the revenue base of FTLM.  |
| Financial Management Plan   | The FTLM has at the moment the three/3 year's Financial Plan adopted 30 May 2024, which addresses the financial challenges highlighted in the Analysis Phase. The financial priority of the municipality is viability and sustainability. The Financial Plan is aligned to the Medium-Term Revenue Expenditure Framework and caters for the income, revenue and expenditure for the year under review as well as two outer years. This plan is under the stewardship of the Finance Department. The process of extending the financial plan to cover five years throughout will unfold with the development and finalization of the Municipal Infrastructure Investment Framework (MIIF). |

| Sector Plan                    | A brief description and overview   |
|--------------------------------|--|
| Finance Procedure Manual       | The main purpose of the procedure manual is to ensure that all purchases of the organisation must be done in accordance with council's Supply Chain Management Policy.   |
| Indigent Policy                | The policy seeks to ensure that the subsidy scheme for indigent households<br>forms part of the financial management system of Municipality and to ensure that<br>the same procedure is followed for each individual case.<br>This policy provides indigent support insofar as municipal services to indigent<br>households. Indigent household means: If the total monthly income of all<br>occupants is not more than an amount as determined by Council from time to<br>time. These amounts will be determined at the beginning of every financial year<br>and will be applied for the duration of that particular financial year. Currently the<br>income amount is deemed to be equal to 2 (two) times the social pension. This<br>criterion applies to both the proclaimed and non-proclaimed areas. |
| Investments Policy             | The purpose of this policy is to ensure that investment of surplus funds forms part<br>of the financial management procedures of the Fetakgomo Tubatse Local<br>Municipality and to ensure that prudent investment procedures are applied<br>consistently.   |
| Budget Policy                  | The policy aims to set budgeting principles which the municipality should follow<br>in preparing annual budget, in implementing and controlling the budget during<br>the financial year, in adjusting the budget as directed by the MFMA. The annual<br>budget is the financial planning document that involves all operating revenue and<br>expenditure decisions.  |
| Funding and Reserves Policy    | The Funding and Reserves Policy is aimed at:<br>Ensuring that the Municipality has sufficient and cost-effective cash funding.<br>Ensuring that provisions and reserves are maintained at the required level to<br>avoid future year unfunded liabilities.<br>Ensure the achievement of the Municipality objectives through the<br>implementation of its operating and capital budgets.  |
| Borrowing policy,              | The purpose of this policy is to establish a borrowing framework for the Municipality and set out the objectives, policies, statutory requirements and guidelines for the borrowing of funds.  |
| Virement Policy                | The purpose of this policy is therefore to provide a framework whereby transfers<br>between line items within votes of the operating budget may be performed with<br>the approval of specified officials   |
| Cash Management Policy         | The main objective of the policy is to describe the steps to be taken when there is a cash shortage subsequent to a cashing up procedure at any cash collection point of the municipality.   |
| Asset Management Policy        | The aim of this policy is to enhance the management of assets by encouraging<br>'whole of life' and 'whole of organisation' approaches and effective mitigation and<br>management of risks associated with ownership and use of assets. It encourages<br>a long-term view of asset management and requires all stakeholders to<br>understand and then meet the impacts of operational change in ways that ensure<br>sustainable use of physical and financial resources  |
| Insurance Management<br>Policy | The objective of this policy is to ensure that Fetakgomo Tubatse Local Municipality's assets, councillors and employees are always insured adequately  |

| Sector Plan   | A brief description and overview   |
|---|--|
|   | and economically. Detailed procedures, to ensure that management and<br>employees within the municipality understand their respective responsibilities<br>and duties, are provided in the standard operating procedures.   |
| Loss Control Policy   | The aim of this policy provides a framework to enable the municipality to prevent,<br>limit or reduce losses such as damage to property, loss of income, theft of assets<br>as well as material and equipment. This policy is part of the internal Control<br>Framework of the municipality. Strategically, the policy forms part of the<br>Administrations endeavours to reach the IDP objective of ensuring good<br>governance and institutional development. It also serves as a basis for the<br>development of loss control plans and procedures. |
| Supply Chain Management policy  | The purpose of this policy is to create an environment that enables The Municipality to procure goods, services and work in manner that is fair, equitable, transparent, competitive and cost effective.   |
| Cash Management and<br>Investment Policy  | The CIF for the Fetakgomo Tubatse Local Municipality is developed in accordance with the local government: Municipal Finance Management Act (MFMA) Act No: 56 of 2003 and the investment and PPP regulations for the MFMA published in Government Gazette 27431 of 2005.   |
|   | The purpose of this policy is to ensure that investment of surplus funds forms part<br>of the financial management procedures of the Fetakgomo Tubatse Local<br>Municipality and to ensure that prudent investment procedures are applied<br>consistently.   |
| Property Rates By-Law (the<br>by-law has been developed,<br>just has to go for public<br>participation) | Section 6 of the Local Government: Municipal Property Rates Act, 2004 requires<br>a municipality to adopt by-laws to give effect to the implementation of its property<br>rates policy; the by-laws may differentiate between the different categories of<br>properties and different categories of owners of properties liable for the payment<br>of rates.   |

|--|--|--|
|  | both the Public Service Anti-Corruption Strategy and   |  |
|  | the Local Government Anti-Corruption Strategy.   |  |
| Risk Management<br>Strategy              | The risk management strategy outlines a high level<br>plan on how the Municipality will go about<br>implementing its risk management policy. The risk<br>management strategy is informed by the risk<br>management policy.<br>The risk management strategy and risk management<br>implementation plan are developed together to ensure<br>connectivity and continuity. Both documents should be<br>approved and reviewed in three years or when need<br>arise.   | Adopted September 2023   |
| Fraud Risk Management                    | Fraud represents a significant potential risk to the Municipality's assets and reputation.   | Adopted September 2023   |
| Risk Management<br>Committee Charter     | The Risk Management Committee Charter has been<br>established to assist the Accounting Officer to fulfil his<br>/ her risk management and control responsibilities in<br>accordance with prescribed legislation and corporate<br>governance principles.<br>The primary objective of the Committee is to assist the<br>Accounting Officer in discharging his / her<br>accountability for risk management by reviewing the<br>effectiveness of the institution's risk management<br>systems, practices and procedures, and providing<br>recommendations for improvement.   | Adopted September 2023   |
| Business Continuity<br>Management Policy | The FTLM is fragile to disruptions that tend to hamper<br>service delivery, because such disruptions contain high<br>risks that impact the Institutions' survival. This policy<br>endeavours to raise considerations on possible<br>business disruptions and also to mitigate or prevent all<br>foreseeable disruptions that may impact normal<br>business operations.<br>The major goal of the BCM policy is to ensure the<br>Municipality is prepared to carry on, recover from, and<br>resume its main commercial operations should it be<br>affected by a business disruption.<br>This policy aims to take a position on how FTLM<br>maintains business continuity operations. | Adopted September 2023   |
| Security Policy                          | A security policy is the essential basis on which an<br>effective and comprehensive security program can be<br>developed. The importance of this critical component<br>of the overall security system, however, is often<br>overlooked. A security policy is the primary way in<br>which management's expectations for security are<br>translated into specific and measurable goals and<br>objectives. It is crucial to take a top down approach  | This policy was initially<br>adopted by council on the<br>26th October 2017,<br>Resolution No:<br>OC42/2017.<br>The policy has been<br>reviewed recently, the<br>draft policy was noted by |

## OTHER DISTRICT (SDM)'S PLANS COVERING FTM'S DEVELOPMENTAL ISSUES

The table below highlights some of the SDM's plans which have substantive bearing on FTM and consequently FTM did not deem develop own, additional plans as they (SDMá) adequately cater and attend to the needs as identified in the Analysis Phase - the FTM makes use of the following SDM's plans:

| SDM's Sector Plan                   | A brief description and overview   |
|-------------------------------------|--|
| Road Master Plan                    | The SDM has developed the district wide Road Master Plan which provides basis for engagement to address the road backlogs identified in the previous discussion, Analysis Phase.   |
| Integrated Waste<br>Management Plan | The FTM's refuse removal project has its persuasion in the SDM's Integrated<br>Waste management Plan (IWMP). This means that the SDM's IWMP finds<br>application at FTM. The SDM's IWMP is supplemented by the FTM's IEP as<br>previously shown developed and adopted in 2003. |

| Air Quality<br>Management Plan<br>(AQMP) | As its function (environmental management / air quality), the SDM's AQMP of 2008 gives prominence to air quality issues that are commonplace within the FTM in line with s15(2) of the NEMA (National Environmental Management Act) as well as Air Quality Act (no.39 of 2004). It presents qualitative extent of air pollution rather than quantitative description because the main causes of air pollution within FTM are insignificant. |
|--|---|
| Integrated Transport<br>Plan             | Adopted by council in 2021  |
